Renewing Development In Africa Policy Performance And Prospects:

Renewing Development in Sub-Saharan Africa Deryke Belshaw, the late Arthur Ian Livingstone, 2005-06-29 *Renewing Development in Sub-Saharan Africa* reviews the debates and brings together specialist contributions to provide a clear guide to the major complexities of African development. They lay the foundation for designing a range of individual country specific policy sets in which the strategic components are prioritized according to each country's constraints and opportunities. The emphasis of the book is on the identification of effective strategies that will enable individual countries to most effectively exploit their growth opportunities and to meet poverty reducing and other key equity objectives. Development Economics and Social Justice John Thoburn, 2017-11-28 Professor Ian Livingstone is one of a small group of British development economists who have achieved international renown and recognition. The objective of this book is to pay tribute to his life's work particularly those aspects which related to key but challenging development issues. These issues include at a broad level the understanding of the economic forces determining the development of low income economies more detailed micro work on agricultural development irrigation in particular decentralisation and local government finance small scale enterprises and large scale manufacturing development. Themes running through his work relate to his over-riding concern for rigour and for socio-economic justice. Ian Livingstone consistently used the traditional tools of economic analysis as a means to increase understanding of development issues in a way which was itself just as radical as the contributions of political scientists and sociologists. This volume has been produced with similar aims. **Routledge Handbook of Industry and Development** John Weiss, Michael Tribe, 2015-09-16 The *Routledge Handbook of Industry and Development* is a global overview of industrialisation. Each chapter will provide readers with contemporary insights into this essential aspect of economic development. Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics. But over the last fifty years the manufacturing sectors of different countries and regions have grown at strikingly different rates. In 1960 developing countries took a very small share of global manufacturing production. Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world particularly in China and the rest of East Asia. On the other hand countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation. This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies. This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries. Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation. Several chapters discuss individual country experiences with examples from

India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers
