material the intent of this monograph is to help business professionals use waiting line queuing analysis methods to improve both service and manufacturing business applications of queuing situations Emphasis is given to discussing the caveats in applying waiting line theory and becoming aware of the assumptions used in developing that theory The importance of accounting for variability in waiting line processes is discussed in some detail because the basic queuing equations provide only average performance data under steady state conditions Understanding how much variability can exist for a given waiting line scenario provides a manager with the insight required to reduce these effects and develop innovative solutions for improving service while reducing operating costs In general the mathematical tone of the book is focused on applications not the derivation of the formulas presented The few derivation exceptions illustrate some approaches not commonly discussed in textbooks for example the use of state diagrams and random number approximations of the probability distributions for use in simple simulation models To aid in understanding the material presented some practical examples are given at appropriate points in the text and some simulation approaches using common spreadsheet software are described

Reluctant Witness James J. Mahoney, Brian H. Mahoney, 2005-12-30 The late James Mahoney went overseas in the spring of 1944 as the leader of one of the four bomb squadrons in a B 24 bomb group the original 492nd which endured extraordinary losses for 89 days of operation before being disbanded The enduring mystery of why such an exceptionally well qualified and prepared group suffered so singularly is one of many significant themes he addresses in his 52 vignettes Mahoney was reassigned to a bomb group with much better luck the 467th and finished the war as their Deputy Commander As both a man among men and a recognized natural leader he was positioned to note character and ability and took it as his charge to develop both of these in the course of administering to the technical and demanding business of a combat organization comprising 3 000 souls Later in life wanting to make sense of what he experienced and to record the terrific sacrifice of his peers he distilled and organized his memories Overcoming his natural reticence to show his hand emotionally and fearful that grisly accounts might register as sensational horror instead of sobering lesson he labored carefully to build for his readers a rich context for his war stories These memoirs take the reader through the methodology and equipment of aviation and strategic bombing in the era before stand off weaponry when hundreds of planes at a time each with ten man crews flew in unpressurized planes through flak and fighter filled skies for hours at a time at 40 degrees below zero to bomb targets in Hitler occupied Europe He introduces the reader to his acquaintances and friends commanders and charges a range of memorable rascals unforgettable heroes and ordinary mortals showing their true mettle and courage under dire circumstances Jim Mahoney s account of his 13 months in combat is an engaging mix of timeless morals and enduring humor The big themes are laid out with common sense while the practical joke the stroke of genius or personal quirk are offered as clear windows to the host of characters and their relationships These certainly capture the fact and flavor of the daylight bombing campaign over northern Europe and make a contribution to the historical record but they also transcend that specific time and place drawing the readers in any era into human drama played out in all of its variety in the pressure cooker of wartime The son s contribution has been to document some of the

more unusual aspects of his father's account so that these can be received as more than just precious memoir as contributions to the historical record. This has entailed many interviews, travel to remnants of his father's Rackheath and North Pickenham bases in East Anglia and contemplation of the horrible effectiveness of aerial bombardment on several of the Mighty Eighth Air Force's ground zeros in Germany. Additionally, the son supplies the reader with a variety of material designed to make the dated technology of aviation in its 20th-century adolescence more understandable and to put into broader contexts the struggles to control European airspace and weaken the foe through costly strategic bombardment. Tables and an extensive WW II timeline give a framework for understanding American involvement and the role of air power. A comprehensive glossary of terms makes the aviation and military lingo clear, and his bibliography will equip the motivated reader to delve deeper. Photographs from then and now bring the reader along on the son's odyssey retracing the father's steps and honoring the sacrifices of survivors and the fallen alike. A foreword by Brigadier General Robin Olds, USAF Ret., fighter leader in three wars and a WW II ace, adds important insight to the riddle of why survivors of grisly combat action are typically so tight-lipped about their experience. *Reluctant Witness* is the combined effort of a pragmatic realist and a hardened optimist. This rich account of one witness's experience is offered to a general audience of conscientious citizens everywhere with encouragements to never let their guard down and enable the tyrant or ever despair of their ability when committed to what is just and fair to set things right. Widespread appreciation of the waste and senselessness of war impels practical efforts to wage peace.

The Paper and Pulp Makers' Journal, 1917 **The Paper Makers Journal**, 1917 The First Soviet Cosmonaut Team Colin Burgess, Rex Hall, 2009-03-27. The First Soviet Cosmonaut Team will relate who these men were and offer far more extensive background stories in addition to those of the more familiar names of early Soviet space explorers from that group. Many previously unpublished photographs of these missing candidates will also be included for the first time in this book. It will be a detailed but highly readable and balanced account of the history, training, and experiences of the first group of twenty cosmonauts of the USSR. A covert recruitment and selection process was set in motion throughout the Soviet military in August 1959, just prior to the naming of America's Mercury astronauts. Those selected were ordered to report for training at a special camp outside of Moscow in the spring of 1960. Just a year later, Senior Lieutenant Yuri Gagarin of the Soviet Air Force, promoted in flight to the rank of major, was launched aboard a Vostok spacecraft and became the first person ever to achieve space flight and orbit the Earth.
