Representation Gap Change And Reform In The British And American Workplace:

The Representation Gap Brian Towers, 1997 This comparative study shows how since the early 1980s British and American employees have experienced a critical weakening of their defenses against the growing managerial prerogative and have borne a greater part of the business and organizational risk The author explains the growth in this representation gap primarily through the withdrawal of public policy support for collective bargaining He argues that this development has serious implications for economic efficiency and competitiveness but above all for the health of the democratic process

certain legal mechanisms from one another The variance in the outcomes of any attempts at borrowing seems to demonstrate that despite apparent membership of a common law family there are significant differences between industrial systems and constitutional traditions thereby casting doubt on the notion that there are definitive legal solutions which can be applied through transplantation Instead it seems worth studying the diverse possibilities for worker voice offered in divergent contexts not only through traditional forms of labour law but also such disciplines as competition law human rights law international law and public law In this way the comparative study highlights a rich multiplicity of institutions and locations of worker voice configured in a variety of ways across the English speaking common law world This book comprises contributions from many leading scholars of labour law politics and industrial relations drawn from across the jurisdictions and is therefore an exceedingly comprehensive comparative study It is addressed to academics policymakers legal practitioners legislative drafters trade unions and interest groups alike Additionally while offering a critique of existing laws this book proposes alternative legal tools to promote engagement with a multitude of voices at work and therefore foster the effective deployment of law in industrial relations
