Reproductive Rights And Wrongs The Global Politics Of Population Control And Contraceptive Choice:

Reproductive Rights and Wrongs Betsy Hartmann, 1995 With a new introduction this fully revised edition of a feminist classic reveals the dangers of contemporary population control tactics especially as they affect women in developing countries

Reproductive Rights and Wrongs Betsy Hartmann, 1987 Looks at government population policies in the U S China and South America discusses family planning contraception and sterilization and examines the political economic and social consequences

Population Control Steven Mosher, 2017-07-05 For over half a century policymakers committed to population control have perpetrated a gigantic costly and inhumane fraud upon the human race They have robbed people of the developing countries of their progeny and the people of the developed world of their pocketbooks Determined to stop population growth at all costs those Mosher calls population controllers have abused women targeted racial and religious minorities undermined primary health care programs and encouraged dictatorial actions if not dictatorship They have skewed the foreign aid programs of the United States and other developed countries in an anti natal direction corrupted dozens of well intentioned nongovernmental organizations and impoverished authentic development programs Blinded by zealotry they have even embraced the most brutal birth control campaign in history China s infamous one child policy with all its attendant horrors There is no workable demographic definition of overpopulation Those who argue for its premises conjure up images of poverty low incomes poor health unemployment malnutrition overcrowded housing to justify anti natal programs The irony is that such policies have in many ways caused what they predicted a world which is poorer materially less diverse culturally less advanced economically and plagued by disease The population controllers have not only studiously ignored mounting evidence of their multiple failures they have avoided the biggest story of them all Fertility rates are in free fall around the globe Movements with billions of dollars at their disposal not to mention thousands of paid advocates do not go quietly to their graves Moreover many in the movement are not content to merely achieve zero population growth they want to see negative population numbers In their view our current population should be reduced to one or two billion or so Such a goal would keep these interest groups fully employed It would also have dangerous consequences for a global environment

The Oxford Handbook of the History of Eugenics Alison Bashford, Philippa Levine, 2010-09-24 Eugenic thought and practice swept the world from the late nineteenth to the mid twentieth century in a remarkable transnational phenomenon Eugenics informed social and scientific policy across the political spectrum from liberal welfare measures in emerging social democratic states to feminist ambitions for birth control from public health campaigns to totalitarian dreams of the perfectibility of man This book dispels for uninitiated readers the automatic and apparently exclusive link between eugenics and the Holocaust It is the first world history of eugenics and an indispensable core text for both teaching and research Eugenics has accumulated generations of interest as experts attempted to connect biology human capacity and policy In the past and the present eugenics speaks to questions of race class gender and sex evolution governance

nationalism disability and the social implications of science In the current climate in which the human genome project stem cell research and new reproductive technologies have proven so controversial the history of eugenics has much to teach us about the relationship between scientific research technology and human ethical decision making

Reproductive Rights Sonia Corrêa, Rebecca Lynn Reichmann, 1994 Evolution of the framework

Population and A World of

Populations Heinrich Hartmann, Corinna R. Unger, 2014-09-01 Demographic study and the idea of a population was developed and modified over the course of the twentieth century mirroring the political social and cultural situations and aspirations of different societies This growing field adapted itself to specific policy concerns and was therefore never apolitical despite the protestations of practitioners that demography was natural Demographics were transformed into public policies that shaped family planning population growth medical practice and environmental conservation While covering a variety of regions and time periods the essays in this book share an interest in the transnational dynamics of emerging demographic discourses and practices Together they present a global picture of the history of demographic knowledge

Global Feminisms Since 1945 Bonnie G. Smith, 2000 This is an innovative introduction to the issues of contemporary feminism with a truly global perspective It analyses the roots development and in some cases the conclusions of feminisms and how they have interacted

Contraception across Cultures Andrew Russell, Mary Thompson, Elisa J. Sobo, 2020-06-04 Contraception is an issue of considerable concern to a great many heterosexually active people Yet the impact of contraceptive technologies in the world today in particular their implications for kinship gender relations and other aspects of social life receives relatively little scholarly attention This book brings a new perspective to the study of contraception by collecting together in one volume leading experts in the fields of contraception family planning and reproductive health Contributors look at the social economic political and cultural contexts in which contraceptive providers and recipients make decisions about whether and what forms of contraception to use User perspectives whether those of recipients or providers of contraceptive services are taken seriously as are the perspectives of policy makers and development experts With its in depth case study approach this challenging book will appeal to practitioners and planners in the fields of family planning and reproductive health as well as to students and academics of applied and medical anthropology health studies gender and development studies or anyone interested in the social cultural and ethical issues raised by contraceptive technologies

Fertility, Family Planning and Population Policy in China Chiung-Fang Chang, Che-Fu Lee, Sherry L. McKibben, Dudley L. Poston, Carol S. Walther, 2005-12-16 China's one child population policy first initiated in 1979 has had an enormous effect on the country's development By reducing its fertility in the past two decades to less than two children per woman and developing a family planning program focused heavily on sterilization and abortion China has undergone a significant transition in status to a demographically developed country Bringing together contributions from leading academics this book looks at the impact of the government's strict control over planning and population growth on the family the wider

society and the country's demography The contributors examine developments such as family planning policy and contraceptive use biological and social determinants of fertility patterns of family and marriage and China's future population trends As such it will be essential reading for academics researchers policy makers and government officials with an interest in China's population policy *Population And Environment* Lourdes Arizpe, M. Priscilla Stone, David Major, Priscilla Stone, 2019-06-04 This ambitious interdisciplinary volume places population processes in their social political and economic contexts while it considers their environmental impacts Examining the multi faceted patterns of human relationships that overlay alter and distort our ties to urban and rural landscapes the book focuses especially on the essential experi

Feminism and the Legacy of Revolution Karen Kampwirth, 2004 Drawing on more than 200 interviews with women in Nicaragua El Salvador and the Mexican state of Chiapas Karen Kampwirth tells the story of how the guerilla wars led to the rise of feminism why certain women became feminists and what sorts of feminist movements they built Population and Development Robert Cassen, 1994-01-01 This volume presents the latest thinking concerning the effect of population growth on economic development and other areas of global concern The authors address the complex issues that currently face both developed and developing country governments in all areas of population growth exploring impacts within their country and internationally **Women's Rights?** Masae Kato, 2009 This book analyses the debates between handicapped people's movement and women's movement in Japan about the issue of selective abortion focusing on the concept of right *World*

At The Crossroads: New Conflicts New Solutions A - Proceedings Of The 43rd Pugwash Conference On Science And World Affairs Joseph Rotblat, 1994-11-08 Photonics and nanotechnology are popular emerging fields of technology This proceedings volume contains over 12 selected papers from the International Workshop and Conference on Photonics and Nanotechnology ICPN 2007 held in Pattaya Thailand from December 16 18 2007 The papers cover a wide range of topics from optical and nonlinear optical physics to nanoelectronics **Globalisation and the Third World** Ray Kiely, Phil Marfleet, 2004-08-02

This book examines the changing position of the Developing World within the world system It focuses on particular issues which cut across communities nations regions and in consequence the world These include migration health and disease the media transnational corporations religion and political and economic institutions The contributors draw on a wealth of illustrations and global examples to examine topics such as HIV AIDS transmission the mediatized Gulf War consumption patterns the Third World in the First Orientalism and Islam environmental and urban movements liberation theology in Latin America and the impact of the media This book provides a critical introduction to the Third World around the unifying theme of globalisation **The Oxford Encyclopedia of Women in World History** Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work

Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and

effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography, and history; comparative culture and society; including adoption, abortion, performing arts, organizations, and movements such as the Egyptian Uprising and the Paris Commune; women's and gender studies; and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students, and general readers alike.

The Environmental Impact of Overpopulation Trevor Hedberg, 2020-04-14. This book examines the link between population growth and environmental impact and explores the implications of this connection for the ethics of procreation. In light of climate change, species extinctions, and other looming environmental crises, Trevor Hedberg argues that we have a collective moral duty to halt population growth to prevent environmental harms from escalating. This book assesses a variety of policies that could help us meet this moral duty, confronts the conflict between protecting the welfare of future people and upholding procreative freedom, evaluates the ethical dimensions of individual procreative decisions, and sketches the implications of population growth for issues like abortion and immigration. It is not a book of tidy solutions; Hedberg highlights some scenarios where nothing we can do will enable us to avoid treating some people unjustly. In such scenarios, the overall objective is to determine which of our available options will minimize the injustice that occurs. This book will be of great interest to those studying environmental ethics, environmental policy, climate change, sustainability, and population policy. Chapter 5 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International license.

Globalizing Family Values Doris Buss, 2003. With little fanfare and profound effect, family values have gone global, and the influence of the Christian Right is increasingly felt internationally. This is the first comprehensive study of the Christian Right's global reach and its impact on international law and politics. Doris Buss and Didi Herman explore tensions, contradictions, victories, and defeats for the Christian Right's global project, particularly in the United Nations. The authors consult Christian Right materials from pamphlets to novels, conduct interviews with people in the movement, and provide a firsthand account of the World Congress of Families II in 1999, a key event in formulating Christian Right global policy and strategy. The result is a detailed look at a new global player, its campaigns against women's rights,

population policy and gay and lesbian rights its efforts to build an alliance of orthodox faiths with non Christians and the tensions and strains as it seeks to negotiate a role for conservative Christianity in a changing global order Negotiating Normativity Nikita Dhawan, Elisabeth Fink, Johanna Leinius, Rirhandu Mageza-Barthel, 2016-07-01 This volume presents the critical perspectives of feminists critical race theorists and queer and postcolonial theorists who question the adoption of European norms in the postcolonial world and whether such norms are enabling for disenfranchised communities or if they simply reinforce relations of domination and exploitation It examines how postcolonial interventions alter the study of politics and society both in the postcolony and in Euro America as well as of the power relations between them Challenging conventional understandings of international politics this volume pushes the boundaries of the social sciences by engaging with alternative critical approaches and innovatively and provocatively addressing previously disregarded aspects of international politics The fourteen contributions in this volume focus on the silencing and exclusion of vulnerable groups from claims of freedom equality and rights while highlighting postcolonial queer feminist struggles for transnational justice radical democracy and decolonization drawing on in depth empirically informed analyses of processes and struggles in Asia Africa Europe and Latin America They address political and social topics including global governance and development politics neo colonialism international aid and empire resistance decolonization and the Arab Spring civil society and social movement struggles international law democratization and subalternity body politics and green imperialism By drawing on other disciplines in the social sciences and humanities this book both enriches and expands the discipline of political science and international relations Primary readership for this volume will be academics and students concerned with globalization studies postcolonial theory gender studies and international relations as well as political activists and policy makers concerned with social and transnational justice human rights democracy gender justice and women s rights
