The Korean Developmental State Iain Pirie,2007-09-12 The Korean Developmental State is a comprehensive and up to date analysis of processes of state and economic restructuring in South Korea since the 1997 crisis The book distinguishes itself from previous studies by consistently arguing that structural changes in the global political economy have played a crucial role in reshaping the Korean state s own economic project More precisely Iain Pirie seeks to demonstrate how the Korean state increasingly adopted neo liberal policies from the 1980s onwards as a rational response to the evolution of global economic structures an evolution which has been driven by the continuous attempts of major global firms and leading capitalist states to overcome the chronic profitability problems that have dogged the core capitalist area since the late 1960s The radical restructuring programme the Korean state initiated after the 1997 crisis must be understood as a logical conclusion to these earlier more incremental processes of reform it initiated almost two decades earlier This book seeks to establish the neo liberal character of the Korean state through a close analysis of key institutional and policy reforms and serious engagement with more theoretical debates concerning the nature of the neo liberal state itself The Korean Developmental State offers a new perspective on the economic experience of Korea as a development model one that emphasizes global trends and contradictions for Korea s economic crisis and resulting transformation and as such will be of significant interest to scholars of Korean studies and the Asian economy

The Struggle of Entertainment and Neoliberal Postcolonial Capitalist Politics in "New" Saudi Arabia Anas M. Alahmed,2022-07-07 Anas M Alahmed argues that the Entertainment Authority of Saudi Arabia created in 2016 was meant to introduce a new Saudi to the Western outsider audience and that the new Saudi state is on a mission to transform the country from a traditional and conservative kingdom to a new state dedicated to social modernization and openness Alahmed contends that

globalization and the neoliberalism capitalist mode of politics have reinforced the transformation of cultural production into global entertainment production Therefore the author shows how the entertainment sector relies heavily on reproducing the Western culture of entertainment production and depends on Western businesses to bring entertainment into the country instead of investing in local entertainment businesses which forces the state to adopt neoliberal capitalism The author provides evidence on how the new modernity of Saudi Arabia has become a political tool through which neoliberal capitalists can create positive relationships with Western capitals as part of the postcolonial struggle of neoliberalism in the Global South Alahmed argues that there is a connection between the role of geopolitical power in globalization and postcolonial studies that explains the struggles of indigenous cultures related to providing their own production to society *Korea* Keith Pratt, Richard Rutt, 2013-12-16 Compiled by specialists from the University of Durham Department of East Asian Studies this new reference work contains approximately 1500 entries covering Korean civilisation from early times to the present day Subjects include history politics art archaeology literature etc The Dictionary is intended for students teachers and researchers and will also be of interest to the general reader Entries provide factual information and contain suggestions for further reading A name index and comprehensive cross reference system make this an easy to use multi purpose guide for the student of Korea in the broadest sense Historical Dictionary of the Republic of Korea Andrew C. Dunbabin, 2014-07-15 This volume looks at the impact on the wider world of the end of the European empires and their replacement by a new international order dominated by East West rivalries After surveying the decolonization process the book looks successively at the different patterns of experience in Southern Africa South East Asia and India East Asia and the Pacific the Middle East and the Americas It concludes with a sustained analysis of the International System the functioning of international organizations and the global role of money and trade *Japan* Ardath W. Burks, 2019-03-04 Japan has been among the first of the handful of countries to move beyond modern and in this third edition of a much praised book Ardath Burks brings the blur of the nation s rapid change into focus In his newly revised and updated Japan Professor Burks also traces the history of the Japanese exploring their traditions their continuity and their cultural heritage He devotes a chapter to the remarkable introspection boom Nihonron the Japanese asking Who are we

Japanese In discussing the country's swift modernization the author looks not only at the initial transition from primary agriculture to an industrial economy but also at the current evolution into a service centered society On both domestic and international levels the book evaluates the maturing of Japanese industry and its growing investment abroad as well as the global tensions fueled by Japan's enormous trade surpluses In response to the intense trade pressure it feels the country is beginning to shift from export driven growth to a consumer oriented economy a shift that will demand the building of a heretofore neglected yet essential infrastructure of housing and transportation The author analyzes domestic political developments including the regime of Nakasone Yasuhiro and the fall of Takeshita Noboru and Uno Sosuke precipitated by financial scandal within the majority Liberal Democratic Party LDP Burks assesses the formidable tasks facing the revamped ruling LDP as its new generation of younger leaders grapples with an evolving economy an expanding regional role and the dissatisfaction of women and young people who have begun to rebel against the growth ethic and their marginalized role in society In his well drawn lucid portrait of this complex country Professor Burks reflects on Japan as a nation in historical transition envisioning a postindustrial future filled with friction and promise As he writes in his introduction Americans and Japanese too often look
