**Advanced Information Systems Engineering** Anne Persson, Janis Stirna, 2004-05-25 The CAiSE 2004 was the 16 in the series of International Conferences on Advanced Information Systems Engineering In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology Riga Technical University Latvia Since the late 1980s the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations Modern businesses and IT systems are facing an ever more complex environment characterized by openness variety and change Organizations are coming less self sufficient and increasingly dependent on business partners and other actors These trends call for openness of business as well as IT systems i e the ability to connect and interoperate with other systems Furthermore organizations are experiencing ever more variety in their business in all conceivable dimensions The different competencies required by the workforce are multiplying In the same way the variety in technology is overwhelming with a multitude of languages platforms devices standards and products Moreover organizations need to manage an environment that is constantly changing and where lead times product life cycles and partner relationships are shortening

The demand of having to constantly adapt IT to changing technologies and business practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years such as autonomic computing component and services marketplaces and dynamically generated software
