sions and with the encouragement of students to develop both particularistic and generalistic research skills. The most important factor in communication and interaction, it is a hopeful sign that so far we have avoided the situation Harvey says prevails among geographers of different theoretical persuasions: "... the failure to indulge in methodological debate which specifically considers the relationship between the methodology of geography and scientific epistemology in general, has led to the development of multiple methodological frameworks within which specialist geographers pursue their own interests in relative isolation" (Harvey 1969:66).

If, in contrast to such a situation, we can continue to be honest and outspoken about our differences without coming to blows or incurring lifelong enmity, then we are in a good position to work toward a consensus on goals and methods for archeology.

9. ARCHEOLOGY AS THE SCIENCE OF TECHNOLOGY: MORMON TOWN PLANS AND FENCES

MARK P. LOONE
Department of Anthropology
Princeton University
Princeton, New Jersey

For as long as archeology has been practiced, archeologists have been concerned with what the discipline is about. That is probably as it should be and, when compared with similar preoccupations in other disciplines, is not unusual. Whether long-standing concern with rationales is a uniquely American phenomenon is unclear, but not at all unclear is that American archeologists have long been making public statements devoted to what makes them do what they do. Worsley, Taylor, Binford and almost every practitioner who has seriously lifted a spade has felt compelled to explain why he did so. The contributions presented in this volume are concerned with the

Research And Theory In Current Archeology:

Research and Theory in Current Archeology Charles L. Redman, 1973 *Research and Theory in Current Archeology* Charles L. Redman, 1973 *Method and Theory in Historical Archeology* Stanley South, 2002-12-31 Described by Lewis Binford in his new foreword as a solid foundation on which to build a vital and growing historical archaeology Stanley South's famous book on historical archaeology includes a new introduction by the author that discusses how the book came to be written and the evolution of the field Widely regarded as one of the most influential books in historical archaeology the book was originally published by Academic Press in 1977 *Advances in Archaeological Method and Theory* Michael B Schiffer, 2014-06-30 *Advances in Archaeological Method and Theory* Volume 5 presents the progressive explorations in methods and theory in archaeology This book provides information pertinent to the developments in urban archaeology Organized into nine chapters this volume begins with an overview of cultural resource management developed to assess the significance of and to manage the cultural resources on public lands This text then explores the basic aspects of natural and human caused changes on the portion of the archaeological resource base consisting of archaeological sites Other chapters consider the practice of urban archaeology in the United States with emphasis on the relationships between human behavior and material culture in an urban setting This book discusses as well the applications of computer graphics in archaeology The final chapter deals with the types of skeletal and population changes that accompany malnutrition This book is a valuable resource for anthropologist archaeologists urban planners and graduate students *Advances in Archaeological Method and Theory*, 2014-06-28 *Advances in Archaeological Method and Theory* *Archaeological Method and Theory* Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning

the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Method and Theory in American Archaeology Gordon R. Willey, Philip Phillips, 2001-02-14 A Dan Josselyn Memorial Publication This invaluable classic provides the framework for the development of American archaeology during the last half of the 20th century In 1958 Gordon R Willey and Philip Phillips first published *Method and Theory in American Archaeology* a volume that went through five printings the last in 1967 at the height of what became known as the new or processual archaeology The advent of processual archaeology according to Willey and Phillips represented a theoretical debate a question of whether archaeology should be the study of cultural history or the study of cultural process Willey and Phillips suggested that little interpretation had taken place in American archaeology and their book offered an analytical perspective the methods they described and the structural framework they used for synthesizing American prehistory were all geared toward interpretation *Method and Theory* served as the catalyst and primary reader on the topic for over a decade This facsimile reprint edition of the original University of Chicago Press volume includes a new foreword by Gordon R Willey which outlines the state of American archaeology at the time of the original publication and a new introduction by the editors to place the book in historical context The bibliography is exhaustive Academic libraries students professionals and knowledgeable amateurs will welcome this new edition of a standard maker among texts on American archaeology

The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to

this new field and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods, and case studies from diverse contexts in different parts of the world which have not previously been considered collectively.

Field Methods in Archaeology
Thomas R. Hester, Harry J. Shafer, Kenneth L. Feder, 2016-09-16
Field Methods in Archaeology has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary Robert Heizer. Left Coast has arranged to put the most recent Seventh Edition back into print after a brief hiatus, making this classic textbook again available to the next generation of archaeology students. This comprehensive guide provides an authoritative overview of the variety of methods used in field archaeology, from research design to survey and excavation strategies to conservation of artifacts and record keeping. Authored by three leading archaeologists with specialized contributions by several other experts, this volume deals with current issues such as cultural resource management, relations with indigenous peoples, and database management, as well as standard methods of archaeological data collection and analysis.

Handbook of Archaeological Theories
R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16
This handbook, a companion to the authoritative Handbook of Archaeological Methods, gathers original, authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory. It is the definitive resource for understanding how to think about archaeology.

Expanding Archaeology
James M. Skibo, 1995-12-31
Attempts to define behavioral archaeology more comprehensively than is common in order to illustrate its role in the theoretical landscape of contemporary archaeology. To flesh out points of agreement or dissent, the perspectives of the chapters range from those of behavioral archaeology, old and new, to those of historical selectionist and postprocessual archaeology. Many of the 15 papers were first presented at a symposium titled "From Airline Trash to Potsherds" held at the 56th annual meeting of the Society for American Archaeology in 1992.

Marx's Ghost
Thomas C. Patterson, 2020-08-06
How did our current society come into being, and how is it similar to, as well as different from, its predecessors? These key questions have transfixed archaeologists, anthropologists, and historians for decades and strike at the very heart of intellectual debate across a wide range of disciplines. Yet scant attention has been given to the key thinkers and theoretical traditions that have shaped these debates and the conclusions to which they have given rise. This pioneering book explores the profound influence of one such thinker, Karl Marx, on the course of twentieth-century archaeology. Patterson reveals how Australian archaeologist V. Gordon Childe, in the late 1920s, was the first to synthesize discourses from archaeologists, sociologists, and Marxists to produce a corpus of provocative ideas. He analyzes how these ideas were received and rejected and moves on to consider such important developments as the emergence of a new archaeology in the 1960s and an explicitly Marxist strand of archaeology in the 1970s. Specific attention is given to the discussion arenas of the 1990s where archaeologists of differing theoretical perspectives debated issues of historic specificity.

social transformation and inter regional interaction How did the debates in the 1990s pave the way for historical archaeologists to investigate the interconnections of class gender ethnicity and race In what ways did archaeologists make use of Marxist concepts such as contradiction and exploitation and how did they apply Marxist analytical categories to their work How did varying theoretical groups critique one another and how did they overturn or build upon past generational theories Marx's Ghost Conversations with Archaeologists provides an accessible guide to the theoretical arguments that have influenced the development of Anglophone archaeology from the 1930s onwards It will prove to be indispensable for archaeologists historians anthropologists and social and cultural theor

Maritime Archaeology Lawrence E. Babits, Hans Van Tilburg, 2013-11-11 This volume initiates a new series of books on maritime or underwater archaeology and as the editor of the series I welcome its appearance with great excitement It is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline The layman will enjoy the book as well Academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors Every year there are 80 to 90 research papers presented at the Society for Historical Archaeology's Conference on Historical and Underwater Archaeology and the Proceedings are published Public interest is shown by extensive press coverage of shipwreck investigations One of the most important advances in recent years has been the passage of the Abandoned Shipwreck Act of 1987 for the first time providing national level law concerning underwater archaeological sites The legislation has withstood a number of legal challenges by commercial treasure salvors a very hopeful sign for the long term preservation of this nonrenewable type of cultural resource The underwater archaeological discoveries of 1995 were particularly noteworthy The Texas Historical Commission discovered the Belle one of La Salle's ships and the CSS Hunley was found by a joint project of South Carolina and a private nonprofit organization called NUMA

Down to Earth Archaeology William Y. Adams, 2022-05-19 Professor William Y Adams presents sixteen papers on Nubia written at various times during his lengthy and productive academic career Most of those selected had been previously published only in a limited way encompassing a wide range of topics Adams wanted to enable them to reach a wider readership than they had originally

Earth Sciences and Archaeology Paul Goldberg, Vance T. Holliday, C. Reid Ferring, 2013-11-11 Earth Sciences and Archaeology brings together contributions from an experienced group of archaeologists and geologists whose common objective is to present thorough and current reviews of the diverse ways in which methods from the earth sciences can contribute to archaeological research Many areas of research are addressed here including artifact analysis and sourcing landscape reconstruction and site formation analysis soil micromorphology and geophysical exploration of buried sites Archaeology has benefited from geological methods in many ways in recent decades However in the past ten to twenty years this informal collaboration between geologists and archaeologists has grown into a formal integration of earth science and

archaeology on a significant scale This book allows the contributors to assess where we are in terms of interdisciplinary research which approaches work best in specific situations and where this collaborative approach should progress to in the future

Archaeological Anthropology James M. Skibo, Michael W. Graves, Miriam T. Stark, 2016-09 In this collection four generations of Longacre protégés show how they are building upon and developing but also modifying the theoretical paradigm that remains at the core of Americanist archaeology The contributions focus on six themes prominent in Longacre's career the intellectual history of the field in the late twentieth century archaeological methodology analogical inference ethnoarchaeology cultural evolution and reconstructing ancient society

Anthropological Archaeology Guy E. Gibbon, 1984-12-03 Anthropological Archaeology

Tell El-Hesi Bruce T. Dahlberg, Kevin G. O'Connell, 1989 In 1970 The Joint Archaeological Expedition to Tell el Hesi sponsored by the American Schools of Oriental Research and a consortium of educational institutions entered the site with the objectives of investigating in greater detail and with more refined methods the stratigraphic divisions identified by Petrie and Bliss This book appears as the fourth volume in the Joint Expedition's series of final publications regarding their field experience and findings The Joint Expedition had its first field season in June 1970 and returned to the site for further excavation in the summers of odd numbered years The first four seasons 1970-75 have been designated Phase One and were largely limited to the later occupation levels on the summit and southern slope of the site's northeast hill or acropolis although there were also probes and limited exploration of the larger Early Bronze EB city

Metaarchaeology Lester Embree, 2012-12-06 An idea of the philosophy of archaeology can best be gained by showing what it is what the issues are who is working in the field and how they proceed Reading Lester Embree's Metaarchaeology provides the best possible introduction to the field since in it several leading archaeologists show how accessible and interesting the current archaeological literature is and currently active philosophers of archaeology reveal something of the current state of discussion on the subject Bibliographies have also been developed of the philosophy of archaeology as well as of selected parts of the component that can be called metaarchaeology Finally an historical introduction has been included to show the variety of metascientific as well as orientational standpoints that philosophers of archaeology have had recourse to for over two decades followed by speculation about the future of the discipline within the philosophy of science
