Alternative Real Estate Research Ling Hin Li,2014-09-15 This book aims to provide insight into the soft side of real estate research and the interesting results and implications of the real estate research outside the traditional realm of investment financial aspects The book also attempts to answer what constitutes the so called soft side of real estate research if we shift our focus from the usual financial returns and investment analysis It also attempts to address whether there is such thing as an alternative real estate research

paradigm The book also argues that research in real estate should not only be limited to land and property market performance analyses as this may greatly impair the potential research implications of various real estate studies The book argues that such analyses take on a very myopic view of real estate research This book will interest many who wish to learn more about the alternative aspect of real estate research which is more than just about investment analysis Managing Successful Business Sachin Naha,2023-08-06 Managing Successful Business is a comprehensive book that serves as a valuable resource for individuals interested in starting and growing a successful goods trading business The book focuses on providing practical insights strategies and step by step instructions to navigate the complexities of the trading industry The book covers various aspects crucial to goods trading including market research sourcing suppliers product selection pricing marketing logistics and risk management It helps explore different trading models such as wholesale retail e commerce and international trading offering guidance on identifying the most suitable approach for a particular business Readers will find a wealth of information on establishing effective supply chain networks negotiating with suppliers and managing inventory to maximize profitability The book also emphasizes the importance of understanding consumer behavior market trends and competition analysis to make informed decisions and gain a competitive edge Escalation in Decision-Making Ms Julia Hodgson,Professor Helga Drummond,2012-08-28 When a venture seems to be faltering do you persist and hope that things will get better or do you cut your losses This may be one of the most important decisions business or project owners may ever have to make Persistence involves the risk of throwing good money or resources after bad but owners may feel they have too much invested to quit now Escalation in Decision Making reveals why social scientists believe that owners may not respond rationally to such predicaments Instead of exiting when the odds are clearly stacked against them they re invest and end up compounding their losses a phenomenon known as escalation of commitment The authors Helga Drummond and Julia Hodgson also introduce the concept of entrapment a variation whereby decision makers passively drift towards insolvency as the cost of changing direction becomes too high So what drives escalation why do some owners quit whilst others persist until the bailiffs arrive what can we learn from owners mistakes what makes newcomers believe they can succeed where others are conspicuously failing These questions of behavioural economics are answered using a narrative that analyses decisions made by market traders facing economic extinction Many highly successful entrepreneurs started their careers in markets it was once an almost guaranteed route to prosperity now market traders are struggling to survive Although the market traders featured are small entrepreneurs the ubiquitous phenomenon of escalation at the heart of these stories is widely relevant to practitioners such as project managers in large organizations and to those responsible for managing risk in many situations Rich in case studies involving real business decisions and dilemmas Escalation in Decision Making provides an accessible introduction to the application of theory against a background of growing interest in behavioural economics now being researched and taught in universities and increasingly attracting the attention of business practitioners
