Homeless Youth of Pakistan Muhammad Naveed Noor, 2021-08-17 While homeless young people (HYP) are typically perceived as irresponsible and morally suspect individuals who lack essential social skills to navigate their lives, this book offers an alternative and more positive perspective. It demonstrates that HYP improvise with resources available on the streets to improve their social and financial status, although they experience significant social structural constraints. This ground-breaking text provides an analysis of social processes that contribute to young people's homelessness: their engagement in sex work, their establishment of intimate partnerships and sexual practices which may increase their risk of HIV and other sexually transmitted infections (STIs). The book demonstrates how the ongoing social and financial instability and insecurity neutralises HYP's knowledge of HIV/STIs and how financial considerations, fear of violence by clients and social obligations in intimate partnerships contribute to their sexual risk-taking. The author argues that the conventional approach of promoting health through raising awareness regarding HIV/STI prevention may continue to bring less than promising outcomes unless we focus on how structural and contextual conditions operate in the backdrop and produce conditions less conducive for young people. Included in the coverage are factors that contribute to youth homelessness, factors that shape sexual practice, a Bourdieusian analysis of youth homelessness and sexual risk-taking, a health promotion approach that can potentially reduce youth homelessness and their risk of HIV/STIs. *Homeless Youth of Pakistan: Survival, Sex and HIV Risk* will attract undergraduate and postgraduate students and researchers interested in exploring issues such as youth homelessness, sexual risk-taking and HIV/STIs.
