Improving the Characterization and Treatment of Radioactive Wastes for the Department of Energy's Accelerated Site Cleanup Program National Research Council, Division on Earth and Life Studies, Board on Radioactive Waste Management, Committee on Opportunities for Accelerating Characterization and Treatment of Waste at DOE Nuclear Weapons Sites, 2005-01-06 The Department of Energy's Office of Environmental Management EM directs the massive cleanup of more than 100 sites that were involved in the production of nuclear weapons materials during the Manhattan Project and the Cold War This report offers suggestions for more effectively characterizing and treating the orphan and special case wastes that are part of EM's accelerated cleanup program It identifies technical opportunities for EM to improve the program that will save time and money without compromising health and safety The opportunities identified include making more effective use of existing facilities and capabilities for waste characterization treatment or disposal eliminating self imposed requirements that have no clear technical or safety basis and investing in new technologies to improve existing treatment and characterization capabilities For example the report suggests that EM work with DOE classification officers to declassify to the extent possible classified materials declared as wastes The report also suggests a new approach for treating

the wastes that EM will leave in place after cleanup *Waste Forms Technology and Performance* National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Waste Forms Technology and Performance, 2011-09-05 The Department of Energy's Office of Environmental Management DOE EM is responsible for cleaning up radioactive waste and environmental contamination resulting from five decades of nuclear weapons production and testing A major focus of this program involves the retrieval processing and immobilization of waste into stable solid waste forms for disposal Waste Forms Technology and Performance a report requested by DOE EM examines requirements for waste form technology and performance in the cleanup program The report provides information to DOE EM to support improvements in methods for processing waste and selecting and fabricating waste forms Waste Forms Technology and Performance places particular emphasis on processing technologies for high level radioactive waste DOE's most expensive and arguably most difficult cleanup challenge The report's key messages are presented in ten findings and one recommendation **Independent Assessment of Science and Technology for the Department of Energy's Defense Environmental Cleanup Program** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Independent Assessment of Science and Technology for the Department of Energy's Defense Environmental Cleanup Program, 2019-03-27 The National Defense Authorization Act for fiscal year 2017 contained a request for a National Academies of Sciences Engineering and Medicine review and assessment of science and technology development efforts within the Department of Energy's Office of Environmental Management DOE EM This technical report is the result of the review and presents findings and recommendations **Energy and Water Development Appropriations for 2002: Department of Energy fiscal year 2002 budget justifications** United States.
