Monitoring and Evaluation of Practice and Methods in Applied Social Research Sada H. Shah, 2024-07-12 Monitoring and Evaluation of Practice and Methods in Applied Social Research is a comprehensive guide delving into the core concepts tools methods and approaches of monitoring and evaluation M E This book reveals the roots of M E illustrating its evolution from academia into a burgeoning field of science across various contexts The challenge practitioners face lies in the inconsistent terminology used for identical concepts among humanitarian organizations hindering the growth of M E through shared learning Embracing an abductive approach this book seeks to establish M E as distinct fields within social research In doing so it bridges the philosophical gap between novice and expert social researchers and provides a consolidated resource based on real world experiences Written by an expert with over a decade of hands on experience in applied social research this book serves as an invaluable tool offering insights into the diverse landscape of M E enabling students and practitioners to navigate various contexts with ease Nongovernmental organizations NGOs United Nations UN bodies and organizations involved in M E will also find this book instrumental creating a bridge of standardized concepts nomenclature and approaches

Applied Social Science Approaches to Mixed Methods Research Baran, Mette Lise, Jones, Janice Elisabeth, 2019-10-25 Research that has been presented primarily by quantitative research can benefit from the voice of the participants and the added value of the different perspective that qualitative research can provide The purpose of mixed methods research is to draw from the positive aspects of both research paradigms to better answer the research question This type of research is often used in schools businesses and non profit organizations as they strive to address and resolve questions that will impact their organizations Applied Social Science Approaches to Mixed Methods Research is an academic research publication that examines more traditional and common research methods and how they can be complimented through qualitative counterparts The content within this publication covers an array of topics such as entrepreneurship social media and marginalization It is essential for researchers academicians non profit professionals business professionals and higher education faculty and specifically targets master or doctoral students committed to writing their theses dissertations or scholarly articles who may not have had the benefit of working on a traditional research team

Researching Possibilities in Mathematics, Science and Technology Education Mamokgethi Setati, 2009 Mathematics Science and Technology Education MSTE emerged as a research discipline in the 1960s and continues to reflect the distinctive flavour and character of its roots in Western societies and science In this mode often based on positivist frameworks research

environments are characterised by idealised environments sanitised research conditions depoliticised neutralised data and contested analyses The book arises from needs in the mathematics and science education research community in Southern Africa for a methodology text that is responsive to rapidly changing educational environments and to the challenges and possibilities of research in contexts characterised by inequality diversity poverty violence the particular history within which research takes place and the consequent ethical and socio political considerations The book also acknowledges and works with the practical and political realities of education and schooling in much of Southern Africa where schools are often poorly resourced and communication with them is often difficult and where research methodologies and ethics have to take account of the complexities of school operations and school community relationships The book does not aim to position itself as a counterpoint to conventional research methodologies It aims to build on the established base of mainstream MSTE and seeks to elevate and widen the debates raise methodological issues and offer innovative possibilities and pedagogies To this end the chapters present theoretical meta level reflections on issues in research design in the fields of mathematics science and technology education In this shift of focus the book draws on a number of fairly recent research approaches These include ethno mathematics cultural studies in science education place based education community based education environmental education socially critical theory and education for social and economic development
