Belief and Experience Benjamin Beit-Hallahmi, Michael Argyle, 2014-03-18 Because society is increasingly secular it may seem irrelevant to consider the psychology of religion But the diversity of our multi ethnic and multi cultural society in fact makes religion more important to the social sciences than it has ever been before What are the social consequences of religion Every day the news is full of events that can be blamed on religion perpetrated by a range of groups from whole societies to individuals Beit Hallami and Argyle are renowned for their clear analytical approach to topics and this new state of the art study of psychology and religion is no exception It will be welcomed as an update to their previous work in the area by social psychologists sociologists and theologians worldwide **Selected Readings in the Anthropology of Religion**

Stephen D. Glazier, Charles A. Flowerday, 2003-12-30 Brings together in one volume a number of key theoretical and methodological advances in the anthropological study of religion Chapters cover important topics not ordinarily included in books dealing with the anthropology of religion e g bipedalism the study of alcohol film and video images notions of religious agency In addition this collection is intended to build bridges between anthropologists of religion and religious studies scholars Over the last four decades anthropologists have grappled with the dialectical relationship between the examination of cultures from the emic or insider perspective and the etic or outsider perspective Nowhere is this creative tension more evident than in the anthropological study of religion In this volume anthropologists and religious studies scholars come to terms not only with a landscape that has shifted fundamentally but a landscape that is still shifting Essays in this collection raise new and important issues for the anthropological study of religion in new and important ways In intensely personal essays a number of contributors address two fundamental concerns in the study of religion 1 how should anthropologists deal with the beliefs and practices of others and 2 how should anthropologists deal with their own religious backgrounds and beliefs as these may affect their understanding of the beliefs and practices of others A partial resolution to both questions is necessary before the anthropological study of religion can advance to a higher level *Religion and Mental Health*, 1980

An Introduction to Psychology of Religion Robert W. Crapps, 1986 Developed in almost thirty years of classroom experience this book is designed to introduce students and other readers to the psychological study of religion Robert W

Crapps deals with the major questions and figures that have dominated the psychological study of religion over the past century dividing the discussion into four parts Two chapters in part one suggest the problems and possibilities for the psychological study of religion in light of the nature of religion and the scientific method Part two sketches the contributions to the study of religion of three intellectual currents in contemporary psychology psychoanalysis behaviorism and humanistic psychology part three explores the relationship between religion and human development while part four directs attention to religious lifestyles and that weave differentiated parts of human experience into a cohesive whole Publisher description

Dictionary of Concepts in Cultural Anthropology Robert H. Winthrop, 1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop's dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth *Psychiatry and the Cults* John A. Saliba, 2018-09-24 Originally published in 1987 this title was

compiled in response to the concern in some segments of society about the presence of new religious movements in the West in the second half of the twentieth century There are lots of psychological questions surrounding cults and the influence they have over their members These questions have been operative in the accumulation of this annotated bibliography which was intended primarily as a reference guide for psychiatrists and counsellors who advise cult members ex cult members and their bewildered parents and lawyers who use psychiatric arguments in the courts **Advances in the Psychology of Religion**

Michael Argyle, 2013-10-22 This collection of previously unpublished papers written by well known researchers in the psychology of religion is unique in its broad coverage and in its comparison between quite different and strictly theoretical perspectives The subjects range from theoretical analyses of social science perspectives on religion and its methods to reports of experimental correlational or descriptive studies of religious experience and attitudes The emphasis throughout is on the directions in which this work might move in the future **Psychology and Its Allied Disciplines** M. A. Smith, Amos Yong, 2010-08-26 What might be described as a Pentecostal worldview has become a powerful cultural phenomenon but it is often at odds with modernity and globalization Science and the Spirit confronts questions of spirituality in the face of contemporary science The essays in this volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences The authors conclude that Pentecostals with their unique perspectives on spirituality can contribute new insights for a productive interaction between theology and science *Academic Advocacy for New Religious Movements* Benjamin Beit-Hallahmi, 2025-03-21 This book explores the intersection of advocacy and academic practice within the social sciences focusing on the ethical dimensions and potential consequences of researchers engaging in political action on behalf of the groups they study Investigating the ethical and practical implications of advocacy in academic work specifically within the social sciences It examines how scholars guided by their research and vision for social change engage politically to support the groups they study The book addresses the debate surrounding academic advocacy is it harmful or a necessary pursuit Through a detailed study of a historical advocacy movement it analyzes the global campaign to gain legitimacy for new religious movements NRMs between 1980 and 2000 It is an important read for scholars of New Religious Movements and those interested in the way religion is studied *Self and School Success* Edwin William Farrell, 1994-01-01 Data for the book were collected by young people in neighborhood schools who taped unstructured dialogue with successful students Vignettes told in the words of the young people themselves address issues of schools and their relation to students careers the roles of teachers and parents the support of community and religious agencies as well as the influence of peers regarding drugs violence and sexuality **Catalog of Copyright Entries. Religious Discourse, Social Cohesion and Conflict Thomas Joseph Ndaluka, 2012 This book analyzes socio religious transformation in Tanzania Some scholars claim that religion has returned to the public domain since the collapse of Tanzanian socialism and that there is a tension between Muslims and Christians Based on focus group discussions in Dar es Salaam author Thomas Joseph Ndaluka acquires insight into Muslim Christian relations using Critical Discourse Analysis He analyzes how Muslims and Christians identify and position themselves in relation to each other and the conditions which make them elevate their religious identity over other identities Ndaluka reveals that some peripheral voices threaten social cohesion but in general Muslims and Christians maintain friendly relations and avoid conflict He also shows individualization or de institutionalization as dominant trends in the country However educational institutions have remained strong and influence other institutions such as the family Series Interreligious Studies Vol 5 *Review of Religious Research* , 1967
