

## 301 Research Topics From Skinner's Book *Verbal Behavior*

Mark L. Sundberg  
Sundberg and Associates, Concord, CA

Skinner's (1957) analysis of verbal behavior addresses some of the most important issues in human behavior. However, relatively few of the analyses presented by Skinner in *Verbal Behavior* have been subjected to an experimental analysis. The current list of topics was assembled in an effort to stimulate empirical research on verbal behavior. The list contains thirty research areas with ten topics suggested for each area. A final topic, education, is presented as a challenge to behavior analysts.

Skinner's (1957) book *Verbal Behavior* contains a conceptual analysis of the topic of language. This book has not received the abundant amount of experimental attention that Skinner's other works have, yet Skinner stated several times that this book would prove to be his most important work (e.g., 1978, p. 122). There are a variety of reasons why Skinner's analysis of verbal behavior has been slow in affecting the behavioral community (e.g., see Eshleman, 1991; Michael, 1984; Vargas, 1986). A frequently raised point is the lack of supporting data for the analysis. McPherson, Bonem, Green, and Osborne (1984) conducted a citation analysis of *Verbal Behavior* and found that of the 836 citations only 31 were of an empirical nature. These authors have made a rather pessimistic prediction concerning the book stating that "*Verbal Behavior* has not provided a conception that has led to the empirical examination and explanation of verbal behavior. If the past is a predictor of the future there is no reason to suspect that it will eventually do so" (p. 165). The current list was developed to show that the book does contain many suggestions for empirical research, and that any observed lack of research is not due to a paucity of topics, but rather to a paucity of researchers. Also, the list lends

support to Skinner's proclamation that "The formulation is inherently practical and suggests immediate technological applications at almost every step" (1957, p. 12).

The list contains thirty research areas, each containing ten suggestions for specific research topics. The suggestions are brief and at times it may be difficult to determine exactly how to conduct a research project given so little information. Unfortunately, further elaboration of each topic is beyond the scope of the present paper. Nevertheless, it is hoped that individual readers will find topics of interest to them and conduct empirical research.

### 1. ESTABLISHING OPERATIONS AND VERBAL BEHAVIOR

Establishing operations (Michael, 1982, 1988) play a major role in controlling verbal behaviors (as well as nonverbal behaviors). The mand, for example, is always under the control of an establishing operation (EO). Skinner (1957) defined the mand "as a verbal operant in which the response is reinforced by a characteristic consequence and is therefore under the functional control of the relevant conditions of deprivation or aversive stimulation" (pp. 35-36). Many who use this definition focus only on the specific reinforcement, and neglect the importance of "relevant conditions of deprivation or aversive stimulation" (i.e., establishing operations). These motivative variables can be strong

Portions of this paper were presented at the annual meeting of the Association for Behavior Analysis, Atlanta, GA, May, 1991. I would like to thank Cindy A. Sundberg for her comments on an earlier version of the paper. Reprints may be obtained from the author, P.O. Box 21492, Concord, CA 94521.

**New Developments in Behavioral Research: Theory, Method and Application** Barbara C. Etzel, Judith M. LeBlanc, Donald M. Baer, 2020-09-10 Originally published in 1977 these examples of research and scholarly argument were collected in honor of Professor Sidney W Bijou In the language of academics they constitute a Festschrift a festival of scholarly writing performed to celebrate the career of a person who produced and stimulated others to produce exactly such contributions throughout a long valuable and productive professional history Since 1955 Dr Bijou had worked almost exclusively within the approach variously labelled as the functional analysis of behavior the experimental analysis of behavior operant conditioning or Skinnerian psychology From his point of view it seems clear the first of these labels was the correct one It was the principle of objective direct observable analysis that attracted him New Autism Research Developments Barbara S. Mesmire, 2007 This book presents the latest research in the battle against autism According to numerous news reports the increase in special needs children has reached epidemic proportions Autism is a complex developmental disability that typically appears during the first three years of life The result of a neurological disorder that affects the functioning of the brain autism and its associated behaviours have been estimated to occur in as many as 2 to 6 in 1 000 individuals Autism is four times more prevalent in boys than girls and knows no racial ethnic or social boundaries Autism is a spectrum disorder The symptoms and characteristics of autism can present themselves in a wide variety of combinations from mild to severe Although autism is defined by a certain set of behaviours children and adults can exhibit any combination of the behaviours in any degree of severity People with autism process and respond to information in unique ways In some cases aggressive and or self injurious behaviour may be present Psycholinguistic Research (PLE: Psycholinguistics) Doris Aaronson, Robert Rieber, 2013-11-20 Originally published in 1979 this book represents an effort to bring together the two disciplines at the core of psycholinguistics psychology and linguistics It discusses a broad variety of theoretical approaches to psycholinguistics as well as covering a wide range of topics At the time the book had four goals to discuss many of the important contemporary issues in psycholinguistics to explore the different views on major theoretical controversies to provide an analysis of background literature as a framework in which to evaluate the issues and controversies and to describe interesting high quality research currently being done by the authors and some of their colleagues Today it can be read and enjoyed in its historical context with many of the chapters still relevant in psycholinguistic research today *The Text of the New Testament in Contemporary Research* Bart Ehrman, Michael W. Holmes, 2001-08-22 Compiled in honor of Bruce M Metzger the most highly respected American textual critic in the history of the discipline this volume comprises twenty two full length essays on every major issue relating to New Testament textual criticism each written by an internationally recognized scholar in the field **New Methods in Reading Comprehension Research** David E. Kieras, Marcel A. Just, 2018-04-17 Published in 1984 this volume presents methodologies for studying the ongoing psychological processes that occur as a person reads a

text as well as discussing the major findings that these methodologies have produced to provide a handbook of reading comprehension research techniques Focusing on the comprehension processes that occur when a person is reading rather than the representation that remains after the text has been read the methodologies use measures such as reading times that reflect ongoing processes rather than relying exclusively on conventional measures of memory performance such as recall These methods make use of computer technology for rapid and flexible stimulus representation and data acquisition This book will allow researchers and students to select appropriate methodologies to investigate a range of fascinating questions about reading comprehension
