Research Process And Studies In Physical Education And Sports Sciences:

Research Process in Physical Education and Sports Sciences Dr Ravinder Pal Ahlawat, 2020-11-19 Research is a powerful tool for decision making which plays an important role in forecasting the way forward for growth and development and produce new knowledge. There are four cornerstones of a good research which are a well formulated proposal that is well executed, analyzed, discussed and concluded. Creativity and critical thinking are of particular importance. The research in physical education and sports sciences has enhanced the development of the subject in all forms. Researchers within physical education aim to engage in research that enhance the understanding on how professional development can be improved, challenged and even transformed. The importance of research in physical education and sports sciences are becoming more and more performance focused. The book allows to learn about the research process and how it can be applied in the area of research. The book is written as per the revised syllabus prescribed by N C T E for Master of Physical Education. The focus behind this book is to provide adequate source of information to the students and language of the book is simple and easy to understand.

Research Process And Studies In Physical Education And Sports Sciences Rakesh Gupta, Manmohan Singh Bedi, 2003

The Research Process in Sport, Exercise and Health Rich Neil, Sheldon Hanton, Scott Fleming, Kylie Wilson, 2013-12-04 What are the challenges and potential pitfalls of real research? What decision making process is followed by successful researchers? The Research Process in Sport Exercise and Health fills an important gap in the research methods literature. Conventional research methods textbooks focus on theory and descriptions of hypothetical techniques while the peer reviewed research literature is mainly concerned with discussion of data and the significance of results. In this book a team of successful researchers from across the full range of sub disciplines in sport exercise and health discuss real pieces of research describing the processes they went through the decisions that they made the problems they encountered and the things they would have done differently. As a result the book goes further than any other in bringing the research process to life helping students identify potential issues and problems with their own research right at the beginning of the process. The book covers the whole span of the research process including identifying the research problem justifying the research question choosing an appropriate method data collection and analysis identifying a study's contribution to knowledge and or applied practice disseminating results. Featuring real world studies from sport psychology biomechanics sports coaching ethics in sport sports marketing health studies sport sociology performance analysis and strength and conditioning the book is an essential companion for research methods courses or dissertations on any sport or exercise degree programme.
