

HISTORICAL GEOGRAPHY AND LOCAL HISTORY

Dr A.J. Christopher

The two disciplines of historical geography and local history have experienced considerable growth in the last twenty-five years. They operate in the borderland between the wider subjects of History and Geography, with the aim of elucidating the history and appearance of particular portions of the earth's surface. This may be summed up in the study of the evolution of the man-made landscape, including an attempt to unravel its origins and reconstruct its appearance at significant times. The relationship between the two has been a profitable one, and has been explored on a philosophical plane by writers such as Darby from the geographical viewpoint, and Hoskins from the historian's point of view.¹

In a journal devoted to local history some apology for historical geography is undoubtedly needed. The simple idea that history is about past events and geography is about present places dies hard, and the concept of an area of co-operation between them had little place in most geographical writings before the 1950's. However, an increasing awareness of the imprint of the past upon the landscape of the present led to a re-appraisal in the 1950's.² Historical geography has advanced rapidly in the last quarter of a century and is an accepted field of study in most countries.

WHAT IS HISTORICAL GEOGRAPHY?

Seeking an answer to this question presents a number of problems. Historical geography has had a multitude of definitions.³ As fields of study, such as cartography and exploration, have become separate disciplines, so the focus has sharpened. Probably only four definitions remain of significance today, namely: the geography behind history; the reconstruction of past landscapes; the evolution of the cultural landscape; and the study of relict features. As will be seen, the impact of local history upon the direction of historical geography has been profound, while its deviation from what might be regarded as pure geography has been cause for concern in some quarters.

the geography behind history

The concept of geography as a service to the study of history is an old one. Macaulay's survey of late Stuart England at the beginning of his *History of England* (1848) remains a classic which has to some extent been emulated by others.⁴ Thus the eight-volume *Cambridge History of Iran* (1968) devoted the first volume to a geographical appraisal of the country.⁵ However, the *Oxford history of South Africa* (1969-1971) did not devote more than a few pages to the geographical background, and these were contributed by an economist.⁶ Such an approach is basically unsatisfactory from the geographer's position, as he remains the servant of the historian. Such, however, is the position under Marxist-Leninist thought in the U.S.S.R. where historical geography remains essentially background reading for economic history.⁷

the reconstruction of past landscapes

This has long been regarded as the most orthodox of approaches to historical geography and indeed the only one recognised by Hartshorne in his major philosophical work published in 1939.⁸ The reconstruction of the landscape as it existed at a particular time has elicited some major pieces of research. Probably Darby's monumental five-volume study of Domesday (1086 AD) England is one of the most thorough and scholastic works to come out

of this field.⁹ Historical geography as a series of reconstructions of the landscape at different dates remains one of the major approaches. Thus in the *New historical geography of England* (1973) reconstructions of the England of several significant dates have been made, with commentaries on the changes which occurred between them.¹⁰ Other authors have attempted to produce studies of one particular year as a complete work in itself.¹¹

Reconstructions rely heavily upon the sources of material available. Many reconstructions have had to use what has been accessible and the dates have been determined by censuses, inventories and so forth. Thus Goheen in his study of Victorian Toronto had to rely upon the censuses at ten-year intervals.¹² Indeed the nineteenth and twentieth centuries are generally more fully documented and readily lend themselves to the time series of reconstruction because of the regularity of

The Treasures Ships. Ming China on the seas: history of the Fleet that could conquer the world and vanished into thin air

Stefano Cariolato, 2017-12-18 In 1400 an immense Chinese fleet of hundreds of ships and tens of thousands of men sailed through the seas reaching Indonesia India Persia Arabia and Africa sent by a proud emperor to bring to the world the glory and the power of the Ming was commanded by the most famous of the Chinese admirals an eunuch named Zheng He The ships carried valuable books precious fabrics delicate and beautiful ceramics in addition to gold and silver destined for the princes of the visited countries and were taking back in China exotic merchandise to show at court with the ambassadors of the Asian world who prostrated themselves in submission for this reason they were called Treasures Ships The history and descriptions of the peoples met are presented based on the news collected by previous and following travellers as well as by the chroniclers who followed the fleet leaving a testimony of the voyages that had been accomplished Despite the fact that the surviving information is very limited this book narrates the missions of the Fleet of the Treasures between 1405 and 1433 attempting to reconstruct the routes likely to have been followed on the basis of the sea and wind conditions phased by the monsoon cycle and detected today with precision by the satellites After a thirty year long endeavour the Chinese retired from the sea cancelled the travels reports destroyed the ships renouncing to sail and remained helpless in face of the penetration of European Navies before and of the Japanese aggression afterward Today China is currently rebuilding a large fleet that is already carrying its weight in home and neighbouring waters and its flag in the oceans retracing the endeavour accomplished 600 years ago *BiblioAsia National Library (Singapore), 2014*

Le Navi dei tesori. La Cina sul mare: storia della flotta che poteva conquistare il mondo e che sparì nel nulla

Stefano Cariolato, 2016-12-07 Nel 1400 una immensa flotta cinese composta da centinaia di navi e con decine di migliaia di uomini percorse i mari giungendo in Indonesia in India in Persia in Arabia ed in Africa inviata da un imperatore orgoglioso per far conoscere al mondo la gloria e la potenza dei Ming era comandata dal pi famoso degli ammiragli cinesi un eunuco di nome Zheng He Le navi trasportavano libri stoffe preziose ceramiche delicate e bellissime oltre ad ori ed argenti destinati ai principi dei paesi visitati e riportavano in Cina merci esotiche da mostrare a corte insieme agli ambasciatori del mondo asiatico che si prostravano in segno di sottomissione per questo erano chiamate Navi dei Tesori La storia e le descrizioni delle destinazioni toccate sono esposte basandosi sulle notizie raccolte da viaggiatori precedenti e successivi oltre che dai cronisti che seguirono la Flotta lasciando una testimonianza dei viaggi compiuti Nonostante che le informazioni sopravvissute siano molto poche questo libro narra le missioni compiute dalla Flotta dei Tesori tra il 1405 ed il 1433 tentando di ricostruire le rotte probabilmente seguite sulla base delle condizioni del mare e dei venti cadenzate dal ciclo monsonico e rilevate oggi con precisione dai satelliti Un'impresa enorme che avrebbe potuto cambiare la storia se fosse proseguita nel tempo ma ci non accadde Dopo un'epopea durata trent'anni i cinesi si ritirarono dal mare cancellarono i resoconti dei viaggi distrussero le

navi rinunciando a navigare e rimasero impotenti di fronte alla penetrazione delle marine europee prima e dell'aggressione giapponese dopo. Oggi la Cina sta ricostruendo una grande flotta che gli fa sentire il suo peso nelle acque di casa ed in quelle dei paesi vicini rivendicandone il dominio e ripercorrendo nuovamente l'impresa compiuta 600 anni fa.
