From the Tree to the Labyrinth Umberto Eco, 2014-02-25 How we create and organize knowledge is the theme of this major achievement by Umberto Eco Demonstrating once again his inimitable ability to bridge ancient medieval and modern modes of thought he offers here a brilliant illustration of his longstanding argument that problems of interpretation can be solved only in historical context *Nicholas of Cusa and the Making of the Early Modern World* ,2019-01-14 Nicholas of Cusa and Early Modern Reform sheds new light on Cusanus relationship to early modernity by focusing on the reform of church the reform of theology the reform of perspective and the reform of method which together aim to encompass the breadth and depth of Cusanus own reform initiatives In particular in examining the way in which he served as inspiration for a wide and diverse array of reform minded philosophers ecclesiastics theologians and lay scholars in the midst of their struggle for the renewal and restoration of the individual society and the world our volume combines a focus on Cusanus as a paradigmatic thinker with a study of his concrete influence on early modern thought This volume is aimed at scholars working in the field of late medieval and early modern philosophy theology and history of science As the first Anglophone volume to explore the early modern reception of Nicholas of Cusa this work will provide an important

Burton, 2024 Ramism and the Reformation of Method explores the popular early modern movement of Ramism and its ambitious attempt to transform Church and society It considers the relation of Ramism to Reformed Christianity and its development as a divine logic attuned to understanding both Scripture and the world In doing so it reveals how Ramists rejected the notion of a philosophy or worldview independent of God and sought to encompass everything under an overarching Christian philosophy indebted to Franciscan ideals The supreme goal of the Ramists was the remaking of the world in the image of the Triune God

**The Loom of God** Clifford A. Pickover, 2010-08-17 From the mysterious cult of Pythagoras to the awesome mechanics of Stonehenge to the gargoyles and fractals on today's computers mathematics has always been a powerful even divine force in the world In a lively intelligent synthesis of math mysticism and science fiction Clifford Pickover explains the eternal magic of numbers Taking a uniquely humorous approach he appoints readers Chief Historian of an intergalactic museum and sends them along with a quirky cast of characters hurtling through the ages to explore how individuals used numbers for such purposes as predicting the end of

the world finding love and winning wars      **Hermeticism and the Renaissance** Ingrid Merkel, Allen G. Debus, 1988

**The Historiographical Concept 'System of Philosophy'** Leo Catana, 2008-03-31 Jacob Brucker 1696-1770 established the history of philosophy as a philosophical discipline in the 1740s. In order to separate this new discipline from other historical disciplines, he introduced the historiographical concept system of philosophy. The historian of philosophy should use this concept as a criterion of inclusion of past philosophies and as an ideal form of exposition. The present book describes the origin of this historiographical notion, its implicit Protestant assumptions, and it traces the concept's impact upon the methods of history of philosophy and history of ideas as developed over the following centuries. Finally, it discusses the concept's strengths and weaknesses as a historiographical tool, arguing that it ought to be given up.
