Maastricht Model A Canadian Perspective On The European Model:

The Maastricht Model Peter M. Leslie, Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, Queen's University (Kingston, Ont.). School of Policy Studies, 1996 Leslie provides an accessible and clear description of the complex governing machinery of the European Union as created by the Maastricht Treaty of 1993 underlying dynamics of European integration and applicability of the model to Canada

The Maastricht Model Peter M. Leslie, Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, 1995

The Secession of Quebec and the Future of Canada Robert Andrew Young, 1998 Based on the premises that Quebecers vote for independence in a referendum and Canada accepts this result *The Secession of Quebec and the Future of Canada* is a timely examination of the implications of separation for Quebec and the rest of Canada

European Integration after Amsterdam Karlheinz Neunreither, Antje Wiener, 2000-03-16 European integration is at a turning point with implications for all member states and their citizens The Amsterdam treaty marks a shift towards constitutional issues Integration has involved a continually evolving process of constitution making A group of leading scholars argue that the shift towards constitutional issues is rooted not only in the issues on the European level but also in shifting models of political and economic organisation in the member states Paradoxically however this push towards integration is accompanied by a number of institutional changes and political decisions which challenge the picture of on going integration and indicate a shift towards a new pluralism in the Euro polity The contributors address questions such as what are the likely effects of the Amsterdam treaty changes in comparison with Maastricht how will these changes effect the complex balance among the governing institutions of the EU and what will be the implications for the lingering quest for democracy

The EU in the Global Political Economy Finn Laursen, 2009 The EU has become an important international actor Its internal policies often have repercussions far beyond its borders It is also increasingly becoming a proactive global actor defending its interests and projecting its norms and values in both bilateral and multilateral external relations This volume has a special focus on external economic relations and includes chapters on the Euro trade policy and competition policy as well as on specific bilateral relationships The section on relations with industrialized countries deals with the United States Canada Russia Japan and China while the section on relations with developing countries has chapters on administrative reform environmental cooperation Cuba Central America and Iran The book thus gives an up to date overview of important aspects of the EU s external relations With a focus on political economy it traces the continuous interplay of economics and politics that has characterized the EU s development of a fully fledged foreign policy What emerges is a picture of a European Union that is better equipped institutionally to deal with economic rather than political issues

Struggle for Quebec Robert Andrew Young, 1999 Young political science U of Western Ontario follows his analysis of the Quebec situation in *The Secession of Quebec and the Future of Canada* written in mid 1994 with an update of developments since then He describes the prelude to the 1995 referendum campaign on Quebec

secession and analyzes the arguments deployed by federalists and sovereignists seeking to explain why the Yes forces gained ground in 1995 and almost won. He then assesses the fallout of the referendum and describes how the sovereignists and federalists are maneuvering around the prospect of another referendum. He provides predictions on what would happen after a Yes vote. Annotation copyrighted by Book News Inc. Portland, OR

Market Rules Douglas Brown, 2003. Federalism is about dividing and sharing government often in complex ways that involve some tasks being done jointly. Are federal systems capable of effective joint policy making? Is this possible in the fast moving context of globalization? In *Market Rules* Douglas Brown examines these questions through a comparative study of Australia and Canada looking at recent major reforms to the economic union in the two federations and comparing them with the evolving European Union (EU). Brown argues that internal barriers to trade and competition in these countries were significant obstacles to competition in the global economy and shows that the old market rules were rooted in longstanding political and regional compromises. He describes the process of detailed and difficult intergovernmental collaboration required for the EU and now Canada and Australia to produce new market rules. The resulting reforms created new regimes that provide deeper and broader national economic integration in Canada and Australia than in the EU. The new rules entrench neo liberal values retaining some room for diversity and flexibility for equity goals. Built on a careful analysis of the differences and similarities in political economy, constitutional design, federal culture and history of intergovernmental relations in Canada and Australia, *Market Rules* provides fresh evidence that federal states can be strong and autonomous in the global society while underscoring the conditions for effective collaboration that make this sustainable. Rich in detail, broad in scope, *Market Rules* makes a significant contribution to knowledge about federalism and economic policy making in the era of globalization.

Canada Patrick C. Fafard, Douglas Mitchell Brown, 1996. Part of an annual series of essays surveying the state of the Canadian federation, the 1996 volume of *Canada: The State of the Federation* explores major developments and new trends in Canadian federalism and intergovernmental relations in 1996.

Globalization, Governance and Identity Guy Lachapelle, John E. Trent, 2000. The International Political Science Association (IPSA) attempted to seek theoretical explanations for the established and emerging forms of political and economic partnerships. This is the result of these efforts following a roundtable organized by IPSA in Quebec City in 1998.

The Nation State in a Global/information Era Thomas J. Courchene, John Deutsch. Institute for the Study of Economic Policy, 1997. *The Nation State in a Global Information Era*, the fifth volume of the *Bell Canada Papers on Economic and Public Policy*, examines the nature and role of the nation state in an era of globalization and information. The essays represent a diverse set of views on the relationship between states and markets domestically and internationally, the relevance of the nation state vis-à-vis both international regimes and sub-national regions, and the nature of the relationship between states and their citizens.

Europe at the End of the 90s Walter Schütze, Jon Bingen, 1996.

Macroeconometric Models and European Monetary Union Ullrich Heilemann, Stephen G. Hall, Peter Pauly, 2004-02-02. This volume contains the

contributions of a conference dealing with the consequences of the European Monetary Union for the macroeconomic modelling of the Euro area which took place in Essen in 2000 At the end of the conference the participants were convinced that the discussions including a great variety of theoretical methodical and factual aspects from the producers as well as the consumers perspective will not fail to have a certain impact on the future development of macroeconomic modelling in the Euro area Once more it became clear however that an ideal way to a solution of the problems is still not in sight The future development will be characterized by a plurality of approaches and models Thus trends continue which have had a more or less strong durable or temporary influence on the model landscape since the emergence of the monetarist revolution the rational expectations or the real business cycle models We are still at the beginning of the theoretical and empirical exploration of the macroeconomic development of the Euro area it is not always clearly perceptible what is transitory and what is permanent and this openness should facilitate the reception of the experiences and results which have been presented The idea for this event was developed in the course of the Project LINK One of the highlights of the conference was the participation of the nobel prize winner Professor Dr Lawrence Klein pioneer and Nestor of macroeconomic modelling who as his contribution shows is following up the creation of the European Monetary Union with critical interest

Theories of Federalism D. Karmis,W. Norman,2016-04-30 This project pulls together classic and modern readings and essays that explore theories of federalism Spanning the Seventeenth through Twenty first centuries of European U S and Canadian thinkers this attempts to be a comprehensive reader for students in political theory The emphasis throughout is on the normative argument the advantages or disadvantages of federal and confederal arrangements compared to unitary states and on the relative merits of various proposals to improve particular federations or confederations These also draw on the full range of political science subfields from political sociology political economy and constitutional studies to comparative politics and international relations There are also readings both contemporary and historical that attempt to clarify conceptual issues *Constitutional Law of Canada: Federalism, Aboriginal Peoples, procedure and remedies* Joseph Eliot Magnet,2001 **A Bibliography on Foreign and Comparative Law** ,1955 **Comparing Federal Systems** Ronald Lampman Watts,2008 Countries studied include the United States Switzerland Australia Austria and Germany as examples of developed industrial societies India and Malaysia as examples of multilingual and multicultural federations Belgium and Spain as examples of emerging federal systems that illustrate bicommunal and asymmetrical approaches and Czechoslovakia and Pakistan as examples of bicommunal federations that have failed Watts compares the interaction of social diversity and political institutions distribution of powers and finances processes contributing to flexibility or rigidity in adjustment extent of internal symmetry or asymmetry degree of centralization and decentralization character of representation in federal institutions role of constitutions and courts provisions for constitutional rights and secession and pathology in federations

The Spending Power in Federal Systems Ronald Lampman Watts,Queen's University (Kingston, Ont.). Institute of

Intergovernmental Relations, Queen's University (Kingston, Ont.). School of Policy Studies, 1999 **The EU Economic and Social Model in the Global Crisis** Prof Dr Dagmar Schiek, 2014-01-28 This book addresses the viability of the EU economic and social model within and after the global economic crisis. It identifies four key issues which warrant further discussion: 1. the asymmetry of the legal and policy framework of the euro and potential recalibration; 2. substantive tensions between the EU economic constitution and its normative aim of social justice and impacts on national policy; 3. the role of civil society including the two sides of industry in overcoming these tensions; and 4. the EU's global aspirations towards the creation of a viable socio-economic model. Its chapters offer two perspectives on each of the four main issues. In drawing these debates together, the book provides a broad understanding as well as starting points for future research. Bringing together different disciplinary approaches ranging from legal studies to political economy, sociology and macroeconomics, it is a valuable contribution to the debate on the European social model and introduces new insights by focusing on legal and political tensions, the impact of the financial crisis and other economic contexts as well as global dimensions. **Der kanadische Föderalismus** Jörg Broschek, 2009-04-05 **Federalism and Civil Societies** Jutta Kramer, Hans-Peter Schneider, 1999
