cost Throughout the many definitions you are going to come across several manufacturing related phrases like analysis plan maintenance construction efficiency and so on It s to be expected that people will have diverse interpretations but ultimately they all boil down to the same thing Tool design engineers despite their many variances all strive to do the same thing create machinery that ensures the highest possible quality of a produced product at the lowest possible cost In the industrial sector all the necessary tasks are carried out Engineers who specialize in designing tools have always been a part of the human experience Ancestors first resorted to using stones as tools and bamboo for fishing poles It s a line of work where you re constantly forced to come up with new solutions
