Bruce Uhrmacher, 2020 This book takes readers on a journey through many pathways to engaging and meaningful educational experiences The text first discusses Perceptive Teaching and then explores five unique approaches to lesson planning behaviorist constructivist aesthetic ecological and integrated social emotional learning Chapters end with a sample lesson that can be compared across approaches **Resources in Education**, 2001 *Arts and Activities*, 1988 **CGCT Toolkit Manual**, Exhibitions as Research Peter Bjerregaard, 2019-08-13 Exhibitions as Research contends that museums would be more attractive to both researchers and audiences if we consider exhibitions as knowledge in the making rather than platforms for disseminating already established insights Analysing the theoretical underpinnings and practical challenges of such an approach the book questions whether it is possible to exhibit knowledge that is still in the making whilst also considering which concepts of knowledge apply to such a format The book also considers what the role of audience might be if research is extended into the exhibition itself Providing concrete case studies of projects where museum professionals have approached exhibition making as a knowledge generating process the book considers tools of application and the challenges that might emerge from pursuing such an approach Theoretically the volume analyses the emergence of exhibitions as research as part of recent developments within materiality theories object oriented ontology and participatory approaches to exhibition making Exhibitions as Research will be of interest to academics and students engaged in the study of museology material culture anthropology and archaeology It will also appeal to museum professionals with an interest in current trends in exhibition making **Content-Based Curriculum for High-Ability**
