Identity Flexibility During Adulthood Jan D. Sinnott, 2017-09-15 This volume seeks to explore the idea of identity as a flexible center of events around which aspects of the self and events in the outside world are organized Historically in much of the literature identity was conceptualized as a somewhat fixed unchanging construct Scholars now have a greater awareness of more nuanced theories about identity and there is a greater

willingness to accept that identity is not fixed concrete and permanent but rather evolving and fluid Although this volume discusses a wide variety of aspects of identity as it flexibly changes during adulthood in the face of numerous experiences it is really addressing one key question How adaptive and fluid is identity and how can we know ourselves as both continuing and changing Exploring these ideas raises the importance of future research on adult identity With a firm grounding in the historical and theoretical background of identity research this volume begins by defining identity and the psychological self as a center around which the person's behaviors and self concepts revolve The following chapters gather the wisdom of many writers who all accepted the challenge of talking about creating a flexible adult self and identity during adulthood They come at this challenging question from many different perspectives using different tools Some survey existing literature and theory then summarize prior work in a meaningful way Some discuss their own research some reflect on personal experiences that have demanded a flexible identity Also included in the coverage are discussions of methodology and validity issues for studies and scales of identity With its dual focus on research and applied fields ranging across social and personality psychology industrial occupational psychology cross cultural psychology mental health existential issues relationships and demographic categories Identity Flexibility During Adulthood Perspectives on Adult Development is a fascinating and complex resource for psychologists sociologists anthropologists gerontologists and all those interested in our changing identities

Dilemmas of Adulthood Nancy R. Rosenberger,2019-01-31 In Dilemmas of Adulthood Nancy Rosenberger investigates the nature of long term resistance in a longitudinal study of more than fifty Japanese women over two decades Between 25 and 35 years of age when first interviewed in 1993 the women represent a generation straddling the stable roles of post war modernity and the risky but exciting possibilities of late modernity By exploring the challenges they pose to cultural codes Rosenberger builds a conceptual framework of long term resistance that undergirds the struggles and successes of modern Japanese women Her findings resonate with broader anthropological questions about how change happens in our global local era and suggests a useful model with which to analyze ordinary lives in the late modern world Rosenberger's analysis establishes long term resistance as a vital type of social change in late modernity where the sway of media global ideas and friends vies strongly with the influence of family school and work Women are at the nexus of these contradictions dissatisfied with post war normative roles in family work and leisure and yet in Japan as elsewhere committed to a search for self that shifts uneasily between self actualization and selfishness The women's rich narratives and conversations recount their ambivalent defiance of social norms and attempts to live diverse lives as acceptable adults In an epilogue their experiences are framed by the aftermath of the 2011 earthquake and tsunami which is already shaping the future of their long term resistance Drawing on such theorists as Ortner Ueno the Comaroffs Melucci and Bourdieu Rosenberger posits that long term resistance is a process of tense irregular but insistent change that is

characteristic of our era hammered out in the in between of local and global past and future the old virtues of womanhood and the new virtues of self actualization Her book is essential for anyone wishing to understand how Japanese women have maneuvered their lives in the economic decline and pushed for individuation in the 1990s and 2000s The Essentials of Lifespan Development Tara L. Kuther,2022-05-12 Chronologically organized The Essentials of Lifespan Development examines the ways in which contexts culture society socioeconomic status home family and even community impact each stage of a person s life **Handbook of Psychology, Developmental Psychology** Irving B. Ann Easterbrooks,Jayanthi Mistry,2012-10-16 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can t help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology s new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology **Adult Development, Therapy, and Culture** Gerald D. Young,2013-06-29 This volume proposes a theoretical integration of several major streams in contemporary psychological theory about adult development and therapy It adopts the perspective that there are steps in development throughout the adult period and that they are characterized by a union of the cognitive and affective the self and the other and idea with idea in second order collective abstractions That is they are at once postformal in terms of Piaget s theory sociocultural in terms ofVygotsky s theory and postmodern with the latter perspective providing an integrating theme The affirmative multivoiced contextual relational other sensitive side ofpostmodernism is emphasized Levinas s philosophy of responsibility for the other is seen as congruent with this ethos The neopiagetian model of development on which the current ap proach is based proposes that the last stage in development concerns collective intelligence or postmodern postformal thought Kegan 1994 has attempted independently to describe adult development from the same perspective His work on the development of the postmodern mind of the adult is groundbreaking and impressive in its depth However I ana lyze the limitations as well as the contributions of his approach under scoring the advantages of my particular model
