Making Of Citizens Cities Of Peasants Revisited:

The Making of Citizens Bryan R. Roberts, 1996-02-12 Originally published as *Cities of Peasants* this highly acclaimed account of the expansion of capitalism in the developing world has now been extensively reworked and updated The book links contemporary differences in the political and economic structure of developing countries to the historically specific way in which these have become part of the world economy

Enduring Violence Cecilia Menjivar, 2011-04 A rare and groundbreaking contribution to the study of everyday violence Richly textured by the experiences of Ladino women in eastern Guatemala *Enduring Violence* is not only informed by but serves to inform cutting edge theoretical debate which links multiple aspects of personal abuse and rights violations with broader structural and institutional factors Menjivar's scholarly and sensitive monograph makes a profoundly persuasive case for an holistic conceptualisation of violence that positions women's human rights at the centre of development in post conflict and other developing states A must read for all interested in issues of gender ethnic and other forms of social economic and political injustice Sylvia Chant London School of Economics and Political Science Violence in Guatemala can be a mind numbing though urgent and necessary topic of study Horrific data mount from state sponsored genocide in the 1980s to femicide lynchings and shadow state violence today but clarifying analysis does not always follow This insightful and beautifully crafted monograph is a welcome exception Rather than recognizable interpersonal or overtly political acts Menjivar focuses on the mundane insults and indignities that women endure violence so normalized that it often fades from view she then turns standard causal reasoning on its head arguing that these misrecognized processes of daily dehumanization are profoundly diagnostic an unexamined key to why the horrific data keep mounting Though somber in content Menjivar's book offers inspiring confirmation that innovative engaged scholarship on intractable social problems can make a difference Charles R Hale University of Texas at Austin *Enduring Violence* is of great scholarly importance as it fills a gap in the literature about Guatemala and allows for a nuanced understanding of the ways that women live with violence in their everyday lives Menjivar's focus on women's discourses of illness surveillance and endurance is particularly insightful since these narratives symbolize the multiple levels of violence in women's lives and the often imperceptible practices through which a daily life with violence is mediated M Gabriela Torres Wheaton College Menjivar's deep commitment to shedding light on the many forms of violence that women experience is evident throughout her book She effectively shows how the violence faced by women goes beyond physical violence and has structural origins as well in various forms This is a great and informative work that needs to be read to understand the structural causes that bring injury to Guatemalan women Nestor Rodriguez University of Texas at Austin In *Enduring Violence* Cecilia Menjivar presents a perceptive and powerful account of the multiple and entwined layers of violence that permeate the lives of diverse women in Guatemala The book offers both a valuable theoretical lens and a textured ethnographic analysis which brings into sharp focus not only the most egregious forms of gender based physical violence but

also a range of invisible injurious practices rooted in pervasive structures of inequality. Written with empathy while retaining a critical edge, this accessible and insightful volume sheds light on complex political, economic and social processes shaping the violent realities of many women in Latin America. Barbara Sutton, author of *Bodies in Crisis: Culture, Violence and Women's Resistance in Neoliberal Argentina*. So much has been written about the spectacular agony of Central America's recent history. In *Enduring Violence*, Cecilia Menjívar seeks to understand the structures that gird not only the publicly visible violence but also the unspectacular, slow, often silent suffering that defines so many lives in the region. Her moving ethnography may explore the painful particulars of gendered existence in eastern Guatemala, but it also does so in such a way that reveals how deeply embedded inequalities can contort all human relations. Ellen Moodie, author of *El Salvador in the Aftermath of Peace: Crime, Uncertainty and the Transition to Democracy*.

Barton,2002-11 This book approaches the diversity of south and central America from a critical human geography perspective It seeks to overcome stereotypes by stressing the

need for an inclusionary political geography which cuts across traditional boundaries After the Pink Tide Marina Gold,Alessandro Zagato,2020-03-01 The left wing Pink Tide movement that swept across Latin America seems now to be overturned as a new wave of free market thinkers emerge across the continent This book analyses the emergence of corporate power within Latin America and the response of egalitarian movements across the continent trying to break open the constraints of the state Through an ethnographically grounded and localized anthropological perspective this book argues that at a time when the regular structures of political participation have been ruptured the Latin American context reveals multiple expressions of egalitarian movements that strive and sometimes momentarily manage to break through the state s apparatus Water, Power and Citizenship José Esteban Castro,2005-11-21 Water Power and Citizenship investigates the interrelationship between water politics and institutions and the development of citizenship rights from a historical sociological perspective The evolution of water s manifold social character and values as a source of power as a public good as a commodity or as a universal right is examined in the light of ever changing and mutually binding social and ecological processes The Basin of Mexico s rich water history becomes the vantage point to cast light on one of the most crucial challenges facing the international community that of eliminating water inequality and injustice Limiting Resources LaDawn Haglund,2010 Using empirical evidence from Costa Rica and El Salvador outlines alternative principles underlying water and electricity provision including social rights accountability and environmental sustainability Argues that an excessive market orientation marginalized these principles while weakening state structures and accountability mechanisms and benefiting a small group of elites Provided by publisher Latin American Development David A. Preston,2014-06-03 Provides an up to date analysis of many aspects of Latin America through a series of short essays written by experienced geographers Development Sociology Norman Long,2003-09-02 In this exciting and challenging work Norman Long brings together years of work and thought in development studies to provide a key text for guiding future development research and practice Using case studies and empirical material from Africa and Latin America Development Sociology focuses on the theoretical and methodological foundations of an actor oriented and social constructionist form of analysis This style of analysis is opposed to the traditional structuralist institutional analysis which is often applied in development studies With an accessible mix of general debate critical literature reviews and original case study materials this work covers a variety of key development issues Among many important topics discussed the author looks at commoditisation small scale enterprise and social capital knowledge interfaces networks and power globalisation and localisation as well as policy formulation and planned intervention processes This book should be read for its desire to pursue a form of analysis that helps us to understand better and more realistically the kinds of development interventions and social transformations that have characterised the second half of the twentieth century and will no doubt continue to characterise future development studies Migration, Urbanization, and Development Richard E. Bilborrow,1998 Internal migration

and urbanization are key dimensions of the process of socioeconomic development. The unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century. Policy analysts, especially those from developing countries where internal migration can be felt at first hand, view migration as one of the most important factors affecting the course of development. It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996. The final results of the symposium are found in this book. This volume provides a better understanding at global level of internal migration issues of concern to policy analysts.

Geographies of Development in the 21st Century Sylvia H. Chant, Cathy McIlwaine, 2009-01-01. This is an excellent book and should prove to be a valuable text for geography and development studies students. Hedley Knibbs, *Geography*. *Geographies of Development in the 21st Century* provides a very accessible and comprehensive account of a broad spectrum of key contemporary issues of concern to geographers and development studies specialists the world over. I am sure that this excellent volume will be widely read and appreciated. Professor Andrea Cornwall, University of Sussex, UK. Uneven, contradictory and complex is how Sylvia Chant and Cathy McIlwaine describe the processes of development that constitute the subject of this distinctive and lively introductory text. Seeking to comprehend let alone portray with any degree of accuracy the burden of these three adjectives with reference to the sheer diversity within what is sometimes called the majority world is a daunting challenge. Chant and McIlwaine draw on their first hand experience on the ground in several countries spread across all the major continents of the global South stretching well beyond conventional academic research into NGOs, social movements and major international agencies. Students will find the blend of accessibly written broad survey and case study very helpful. In addition to lists of important websites, further reading and learning outcomes, the text is interspersed with focused activities to foster active learning. Professor David Simon, Royal Holloway University of London, UK. Written by two widely published academics with many years experience in university teaching, research and consultancy, *Geographies of Development in the 21st Century* provides a concise yet informative introduction to development in the contemporary Global South. Incorporating field research from Mexico, Costa Rica, Guatemala, Colombia, El Salvador, the Philippines, Botswana and The Gambia, Sylvia Chant and Cathy McIlwaine bring alive a body of fascinating subject matter extending across gender, family, poverty, employment, household livelihoods, the informal economy, housing, migration, civil society, conflict and violence. Reflecting both authors' enduring interests in the academic-policy interface, the book is also informed by assignments they have undertaken for various international organisations such as the World Bank, Inter-American Development Bank, UNDP, UNICEF, ILO and the Commonwealth Secretariat. This timely and engaging volume will be an essential companion for undergraduate students taking introductory courses in development and globalisation as well as a useful reference and repository of teaching and learning ideas for those lecturing on the subject. Students will not only

find this resource refreshingly accessible and user friendly but will be able to further their knowledge guided by annotated readings key internet sources and a range of learning activities
