Making Of Knowledge In Composition Portrait Of An Emerging Field:

The Making of Knowledge in Composition Stephen M. North, 1987 In a style that combines scholarly care with remarkable readability North examines the development of the field of composition in a way it has not been examined before Rather than focusing on what people claim to know about teaching writing he concerns himself primarily with how they claim to know it Eight groups of knowledge makers are treated in separate chapters Practitioners Historians Philosophers Critics Experimentalists Clinicians Formalists and Ethnographers Each of these chapters orients the reader by tracing the mode's first uses in the field and listing its best known and most important adherents then goes on to explain how the mode of inquiry works illustrating key points with painstaking analysis of well known studies In his final three chapters North turns from these individual modes to consider the field as a whole How have these different ways of making knowledge come together What is Composition now and what is it likely to become **"Rimmed Indications"** Glynis R.

Benbow-Niemier, 1994 **Bibliographic Research in Composition Studies** Vicki Byard, 2009-10-02 Bibliographic Research in Composition Studies is a student friendly guide to how knowledge is constructed and disseminated in composition studies as well as a thorough handbook on how to conduct bibliographic research in the discipline Student readers are taught Stephen North's taxonomy of scholarship empirical research and practice so that they can better contextualize the sources they read and they learn the unique ways that some genres of publication function in composition studies The book also leads students through the entire process of completing a bibliographic assignment **Microhistories of Composition** Bruce McComiskey, 2016-04-01 Writing studies has been dominated throughout its history by grand narratives of the discipline but in this volume Bruce McComiskey begins to explore microhistory as a way to understand enrich and complicate how the field relates to its past Microhistory investigates the dialectical interaction of social history and cultural history enabling historians to examine uncommon sites objects and agents of historical significance overlooked by social history and restricted to local effects by cultural history This approach to historical scholarship is ideally suited for exploring the complexities of a discipline like composition Through an introduction and eleven chapters McComiskey and his contributors including major figures in the historical research of writing studies such as Louise Wetherbee Phelps Kelly Ritter and Neal Lerner develop focused narratives of particular significant moments or themes in disciplinary history They introduce microhistorical methodologies and illustrate their application and value for composition historians contributing to the complexity and adding momentum to the emerging trend within writing studies toward a richer reading of the field's past and future Scholars and historians of both composition and rhetoric will appreciate the fresh perspectives on institutional and disciplinary histories and larger issues of rhetorical agency and engagement enacted in writing classrooms that are found in Microhistories of Composition Other contributors include Cheryl E Ball Suzanne Bordelon Jacob Craig Matt Davis Douglas Eyman Brian Gogan David Gold Christine Martorana Bruce McComiskey Josh Mehler Annie S Mendenhall Kendra Mitchell Antony N Ricks David

Everyone Can Write Peter Elbow, 2000-01-27 With Writing without Teachers OUP 1975 and Writing with Power OUP 1995 Peter Elbow revolutionized the teaching of writing His process method and its now commonplace free writing techniques liberated generations of students and teachers from the emphasis on formal principles of grammar that had dominated composition pedagogy This new collection of essays brings together the best of Elbow's writing since the publication of *Embracing Contraries* in 1987 The volume includes sections on voice the experience of writing teaching and evaluation Implicit throughout is Elbow's commitment to humanizing the profession and his continued emphasis on the importance of binary thinking and nonadversarial argument The result is a compendium of a master teacher's thought on the relation between good pedagogy and good writing it is sure to be of interest to all professional teachers of writing and will be

Lynn Z. Bloom, Donald A. Daiker, Edward Michael White, 1997 The essays in this book stemming from a national conference of the same name focus on the single subject required of nearly all college students composition Despite its pervasiveness and its significance composition has an unstable status within the curriculum Writing programs and writing faculty are besieged by academic political and financial concerns that have not been well understood or addressed At many institutions composition functions paradoxically as both the gateway to academic success and as the gatekeeper reducing access to academic work and opportunity for those with limited facility in English Although writing programs are expected to provide services that range from instruction in correct grammar to assisting or resisting political correctness expanding programs and shrinking faculty get caught in the crossfire The bottom line becomes the firing line as forces outside the classroom determine funding and seek to define what composition should do In search of that definition the contributors ask and answer a series of specific and salient questions What implications intellectual political and institutional will forces outside the classroom have on the quality and delivery of composition in the twenty first century How will faculty and administrators identify and address these issues What policies and practices ought we propose for the century to come This book features sixteen position papers by distinguished scholars and researchers in composition and rhetoric most of the papers are followed by invited responses by other notable compositionists In all twenty five contributors approach composition from a wide variety of contemporary perspectives rhetorical historical social cultural political intellectual economic structural administrative and developmental They propose solutions applicable to pedagogy research graduate training of composition teachers academic administration and public and social policy In a very real sense then this is the only book to offer a map to the future of composition

theory and disability theory and guides novice and experienced researchers through the finer points of methods such as ethnography corpus analysis and mixed methods research Ideal for courses on writing center studies and pedagogy it is essential reading for researchers and administrators in writing centers and writing across the curriculum or writing in the disciplines programs

The Lure of Literacy Michael Harker, 2014-12-03 Examines proposals for freshman composition s abolition and reform while providing a new model for courses The Lure of Literacy promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students attitudes about composition and interrogates the very idea of literacy itself Harker clearly builds on current scholarship and brings his inquiries down to the very pragmatics of the classroom In a field full of critiques but little substance his voice is refreshing in that what he has been arguing about is fully fleshed out in his lesson plans at the end

William H Thelin author of *Writing without Formulas* The Lure of Literacy presents an incredibly accessible account of New Literacy Studies scholarship which serves the book s larger purpose i e to propose a First Year Literacy Studies curriculum extremely well Unlike a lot of books that rush through a discussion of an assignment or course that illustrates the pedagogical impact of the theory or historical research this book presents a carefully thought out course complete with identifiable outcomes and lessons that really does seem to have the potential to address the persistent misconceptions of literacy that fuel the abolition debate

Chris Warnick College of Charleston [Something Old, Something New](#) Wendy Bishop, 1990-03-05 How do college writing teachers learn new ways to teach Most current composition research focuses almost exclusively on student writers ignoring the role the teacher plays in classroom development Here is the first book to focus on college writing teachers and the ways in which they are affected by graduate rhetoric pedagogy courses Wendy Bishop observed teachers enrolled in a doctoral seminar titled Teaching Basic Writing and then conducted case studies of five of those teachers in their college writing classrooms to investigate how their teaching practices changed and how their previous professional and personal histories influenced their ability to make those changes [Rhetoric and Composition](#)
