Making Of Rhodes:

Growth Growth Growth Julian Cobbing, 2024-04-11 *Growth Growth Growth* retells history as a succession of pivotal crises linked to economic growth Beginning with agriculture ten thousand years ago each crisis led to an impasse until human ingenuity devised a technical solution to fix it These solutions included the alphabet paper clocks guns the printing press the steam engine the petrol engine electricity nitrogen fertilizer and the computer Each solution however played a part in the next crisis Growth driven crises led to the world wars of the first half of the twentieth century including the atrocities of Stalin Hitler and Hiroshima The brief golden age of capitalism of the 1950s and 1960s gave way to the ultra corporate capitalism that in one variant or another is now the global economic system Julian Cobbing's lively account exposes the historical roots of our converging problems the destruction of the environment the massacre of other species the running down of oil reserves global heating and the nuclear threat to all of us This time there is no technical solution since we are devouring the Earth's finite resources Cobbing reminds us that we are just one species in a planetary life system which could dispense with us if we are not needed *Savannah River Site at Fifty* Mary Beth Reed, 2002 The heart of the book is a historical treatment of Savannah River Site's operations its peak period of production 1953 to 1979 Developments in reactor technology and chemical separations heavy water production waste management and the research goals of the Savannah River Laboratory are described in layman's terms and are amply illustrated This history profiles the individuals who brought the plant to maturity and explores the two themes that define the nuclear weapons workplace safety and security

Downwind of the Atomic State James C. Rice, 2025-04 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health *Downwind of the Atomic State* focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we

being exposed to by large organizations under the guise of security and science **Bombing the Marshall Islands** Keith M. Parsons, Robert A. Zaballa, 2017-07-26 A narrative history of the nuclear tests conducted by the United States in the Marshall Islands from 1946 to 1958 Senate documents, 1881 **Index to Documents** The Senate of the United States, During the Second of the Twenty-Sixth Congress, 1841 **The Republic of Nature** Mark Fiege, 2012-03-20 In the dramatic narratives that comprise *The Republic of Nature* Mark Fiege reframes the canonical account of American history based on the simple but radical premise that nothing in the nation's past can be considered apart from the natural circumstances in which it occurred Revisiting historical icons so familiar that schoolchildren learn to take them for granted he makes surprising connections that enable readers to see old stories in a new light Among the historical moments revisited here a revolutionary nation arises from its environment and struggles to reconcile the diversity of its people with the claim that nature is the source of liberty Abraham Lincoln an unlettered citizen from the countryside steers the Union through a moment of extreme peril guided by his clear eyed vision of nature's capacity for improvement In Topeka Kansas transformations of land and life prompt a lawsuit that culminates in the momentous civil rights case of *Brown v Board of Education* By focusing on materials and processes intrinsic to all things and by highlighting the nature of the United States Fiege recovers the forgotten and overlooked ground on which so much history has unfolded In these pages the nation's birth and development pain and sorrow ideals and enduring promise come to life as never before making a once familiar past seem new *The Republic of Nature* points to a startlingly different version of history that calls on readers to reconnect with fundamental forces that shaped the American experience For more information visit the author's website <http://republicofnature.com> **List of Private Claims Brought Before the Senate, from the Commencement of the Fourteenth to the Close of the Thirtieth Congress** United States. Congress. Senate, 1849 *Critical Mass* Carter Hydrick, 2016-08-01 On May 19 1945 eleven days after the surrender of Nazi Germany in Europe a U boat was escorted into Portsmouth Naval Yard New Hampshire News reporters covering the surrender of U 234 were ordered contrary to all previous and later U boat surrender procedures to keep their distance from crew members and passengers of U 234 on threat of being shot by the attending Marine guards Why the tight security Buried in the nose of the specially built mammoth boat sealed in cylinders lined with gold was 1 120 pounds of enriched uranium labeled U235 the fissile material from which atom bombs are made *Critical Mass* documents how these Nazi bomb components were then used by the Manhattan Project to complete both the uranium bomb dropped on Hiroshima and the plutonium bomb dropped on Nagasaki to defeat the Japanese and win World War Two and global domination in the modern age **The Politics of Think Tanks in Europe** Jesper Dahl Kelstrup, 2016-05-20 In the 21st century think tanks have become more than a buzzword in European public discourse They now play important roles in the policy making process by providing applied research building networks and advocating policies The book studies the development of think tanks and contemporary consequences in the United Kingdom

Germany Denmark and at the EU level A Continental think tank tradition in which the state plays a pivotal role and an Anglo American tradition which facilitates interaction in public policy on market like terms have shaped the development of think tanks On the basis of a typology of think tanks quantitative data and interviews with think tank practitioners the interplay between state and market dynamics and the development of different types of think tanks is analysed Although think tanks develop along different institutional trajectories it is concluded that the Anglo American tradition has had a significant cross cutting impact in Europe in recent years The contention over the politics of think tanks runs deeper at the EU level than in the member states and reflects disagreement over how the EU should develop in the future This text will be of key interest to scholars students and practitioners of political communication public policy European politics and comparative politics

Bulletin of the Atomic Scientists ,1987-11 **World War II and the West It Wrought** Mark Brilliant,David M. Kennedy,2020-04-28 Few episodes in American history were more transformative than World War II and in no region did it bring greater change than in the West Having lifted the United States out of the Great Depression World War II set in motion a massive westward population movement ignited a quarter century boom that redefined the West as the nation s most economically dynamic region and triggered unprecedented public investment in manufacturing education scientific research and infrastructure an economic revolution that would lay the groundwork for prodigiously innovative high tech centers in Silicon Valley the Puget Sound area and elsewhere Amidst robust economic growth and widely shared prosperity in the post war decades Westerners made significant strides toward greater racial and gender equality even as they struggled to manage the environmental consequences of their region s surging vitality At the same time wartime policies that facilitated the federal withdrawal of Western public lands and the occupation of Pacific islands for military use continued an ongoing project of U S expansionism at home and abroad This volume explores the lasting consequences of a pivotal chapter in U S history and offers new categories for understanding the post war West Contributors to this volume include Mark Brilliant Geraldo L Cadava Matthew Dallek Mary L Dudziak Jared Farmer David M Kennedy Daniel J Kevles Rebecca Jo Plant Gavin Wright and Richard White Nuclear Zero? George H. Quester,2017-12-02 George H Quester argues that the possibility of nuclear war continues to loom despite the reduction in stockpiles by the major powers Supporters of total nuclear disarmament often dismiss pessimistic objections to the possibility of reaching nuclear zero as being hypothetical but this book looks at real illustrations for this possibility taken from the years that gave the world the Manhattan Project Any advocate of total nuclear disarmament must deal with the challenge of realist analysts of international relations those who worry that being at zero nuclear weapons or even close to zero would be unstable and dangerous Mutual fears could be self confirming leading to cheating on disarmament and even nuclear war While such fears are often dismissed as theoretical or hypothetical this book attempts to test them against the real life experience of the last time we were at nuclear zero The years from 1933 to 1945 saw many such self confirming fears leading to the Manhattan Project and the nuclear destruction

of Hiroshima and Nagasaki Optimism about the future cannot be ruled out totally but the history of our experience with nuclear disarmament must be examined carefully to identify the crucial prerequisites for elimination of such weapons of mass destruction This book is required reading for courses on arms control defense policy and international relations or for readers looking for historical background on a critical global issue *Annual Publication of the Historical Society of Southern California* ,1918 Beyond Engineering Robert Pool,1997-07-17 Drawing on such disparate fields as history economics risk analysis management science sociology and psychology the author of *Eve's Rib* illuminates the complex often fascinating interplay between machines and society in this highly readable account of how technology and the modern world shape each other Transcultural Italies Charles Burdett,Loredana Polezzi,Barbara Spadaro,2020-12-01 The history of Italian culture stems from multiple experiences of mobility and migration which have produced a range of narratives inside and outside Italy This collection interrogates the dynamic nature of Italian identity and culture focussing on the concepts and practices of mobility memory and translation It adopts a transnational perspective offering a fresh approach to the study of Italy and of Modern Languages **The Briefcase** Heath A. Dawson,2010-08 Preston O Neil a twenty eight year old public relations associate isn't satisfied with his life despite making close to six figures He despises his job at Stenson Rhodes and often dreams of working at a golfing paradise in the Carolinas He is in the wrong place at the wrong time when a group steals a briefcase and a book that contains secret codes and kidnaps him along with them The valuable briefcase and book are the property of a trio of evil men who will continue the search for their treasures no matter how many lives are destroyed They want their possessions back and will summon assassins to finish the job if necessary During the roller coaster ride of his abduction Preston is taken to a mysterious abandoned warehouse He discovers that he has friends who are fighting for his freedom among those more concerned with finding the briefcase and book Startling truths about his family and a massive cover up link the old tattered briefcase and secret coded book to an evil triumvirate and Preston learns he may be far more involved than he originally believed Although an innocent discovery turns Preston into a hostage he soon realizes this event may turn him into a happy man as his lifelong dreams may finally come true **The Asiatic Journal and Monthly Register for British and Foreign India, China, and Australia** ,1838 A Call to Arms Maury Klein,2013-07-16 The colossal scale of World War II required a mobilization effort greater than anything attempted in all of the world's history The United States had to fight a war across two oceans and three continents and to do so it had to build and equip a military that was all but nonexistent before the war began Never in the nation's history did it have to create outfit transport and supply huge armies navies and air forces on so many distant and disparate fronts The Axis powers might have fielded better trained soldiers better weapons and better tanks and aircraft but they could not match American productivity The United States buried its enemies in aircraft ships tanks and guns in this sense American industry and American workers won World War II The scale of the effort was titanic and the result historic Not only did it determine the outcome of the war but it transformed

the American economy and society Maury Klein's *A Call to Arms* is the definitive narrative history of this epic struggle told by one of America's greatest historians of business and economics and renders the transformation of America with a depth and vividness never available before The English Catalogue of Books [annual] Sampson Low, 1927 Vols for 1898-1968 include a directory of publishers
