Making Pictures Move:

Making Images Move Gregory Zinman, 2020-01-03 *Making Images Move* reveals a new history of cinema by uncovering its connections to other media and art forms In this richly illustrated volume Gregory Zinman explores how moving image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices including painting and scratching directly on the film strip deteriorating film with water dirt and bleach and applying materials such as paper and glue This book provides a comprehensive history of this tradition of handmade cinema from the early twentieth century to the present opening up new conversations about the production meaning and significance of the moving image From painted film to kinetic art and from psychedelic light shows to video synthesis Gregory Zinman recovers the range of forms tools and intentions that make up cinema's shadow history deepening awareness of the intersection of art and media in the twentieth century and anticipating what is to come [Moving Pictures](#) Claire Llewellyn, 2005 Looks at the different ways pictures can move Includes activities such as designing a flap and planning making and evaluating a moving picture based on a nursery rhyme Suggested level junior primary [How to Make and Operate Moving Pictures](#) Bernard Edward Jones, 1916 *Moving Pictures* Anne Hollander, 1989 Hollander explores the premise that paintings prints and movies move us similarly by virtue of their narrative element which evokes our memories and feelings She argues that we respond to the depiction of glimpses of human life to the realization that we cannot see everything at once and how the rendering of light and spatial composition translates them and keeps them moving into our awareness Thus there is a continuum from the paintings and graphic arts of 15th century northern Europe to the proto cinematic arts of the present ISBN 0 394 57400 1 29 95 [MAKING IMAGES MOVE](#) Jan-Christopher Horak, 1997-09-17 In *Making Images Move* Jan Christopher Horak looks at the work of eight European and American photographers whose films illustrate the gradual fragmentation of realistic narratives during the last eighty years In close analyses of specific works he shows how the visions of early practitioners such as Paul Strand and Laszlo Moholy Nagy who tried to create meaningful political statements using modernist techniques gave way to the more personal though no less socially conscious creations of 1960s and 1970s filmmakers such as Chris Marker Robert Frank and Danny Lyon Even documentary became more subjective with Helen Levitt pioneering the use of the handheld camera and intuitive editing in her 1946 film *In the Street* Horak argues that photographers who have ventured into filmmaking while fruitfully exploiting the differences between the two genres often have been able to retain both their technical styles and complex thematic concerns Including a filmography of more than 130 photographer filmmakers *Making Images Move* illuminates the instrumental role of these artists in the evolution of experimental cinema *Art that Moves* John Bliss, 2011 Discusses various forms of animation around the world **Making History Move** Kim Nelson, 2024-03-15 *Making History Move* Five Principles of the Historical Film builds upon decades of scholarship investigating history in visual culture by proposing a methodology of five principles to analyze history in moving

images in the digital age It charts a path to understanding the form of history with the most significant impact on public perceptions of the past The book develops insights across these fields including philosophical considerations of film and history to clarify the form and function of history in moving images It addresses the implications of the historical film on public historical consciousness presenting criteria to engage and assess the truth status of depictions of the past Each chapter offers a detailed aspect of this methodology for analyzing history in moving images Together they propose five principles to organize past and future scholarship in this vital interdisciplinary field of study The Moving Picture World
