Harper, Stanley Stein, 2018-02-06 The culmination of a critical study of neo pragmatism philosophy and its application to planning Dialogical Planning in a Fragmented Society begins with philosopher Stanley M Stein s examination of neo pragmatism and his thoughts on how it can be useful in the field of environmental design specifically how it can be applied to planning procedures and problems Neo pragmatism is an approach that has been in the past best expressed or implied in the writing of Hilary Putnam Richard Rorty and in particular Donald Davidson John Rawls and Ludwig Wittgenstein Thomas L Harper furthers this tradition by providing the context for this theoretical application from his academic background in economics and management as well as his practical experience with political decision making processes community planning and economic development The result is a fresh synthesis of ideas a new approach to thinking about planning theory and its implications for and relationship with practice Philosopher Michael Walzer has asserted that philosophy reflects and articulates the political culture of its time and politics presents and enacts the arguments of philosophy Similarly the authors view planning theory as planning reflected upon in tranquility away from the tumult of battle and planning practice as planning theory acted out in the confusion of the trenches Each changes the other in a dynamic way and the authors demonstrate the intimate and inextricable link between them      Encyclopedia of Urban Studies Ray Hutchison, 2009-09-15 The United Nations estimates that by 2030 more than two thirds of the total world population will live in urban areas Most of this increase will take place not in Europe or in the United States but in the megacities and newly emerging urban regions of what used to be called the developing world Urban studies is an expansive and growing field covering many disciplines and professional fields each with its own schedule of conferences journals and publication series These two volumes address the specific theories key studies and important figures that have influenced not just the individual discipline but also the field of urban studies more generally The Encyclopedia of Urban Studies is intended to present an overview of current work in the field and to serve as a guide for further reading in the field Key Features Includes important work and traditions from each of the urban disciplines including urban anthropology urban economics urban geography urban history urban politics urban psychology and urban sociology Addresses both the growth and expansion of urban areas urbanization and the nature and quality of urban life urbanism Demonstrates the international and interdisciplinary nature of the field with contributions from scholars in many different countries Confronts a number of important issues ranging from individual problems of poverty to societal problems of provision of adequate housing and social exclusion Provides entries on a number of cities including those in different historical periods and regions of the world and those that have been important in the development of urban studies Key Themes Disciplinary Approaches in Urban
