

The background of the entire image is a photograph of a forest floor. Sunlight filters through the dense canopy of green trees, creating a pattern of bright, dappled light and deep shadows on the ground covered with fallen leaves and pine needles. The overall color palette is dominated by various shades of green and brown, with the white text providing a high-contrast foreground.

Marx And Nature Red Green Perspect:

Marx and Nature P. Burkett, 1999-02-14 With Marx and Nature Paul Burkett reconstructs Marx's approach to nature, society, and environmental crisis. While recognizing that production is structured by historically developed relations among producers, Marx also insists that production as a social and material process is shaped and constrained by natural conditions, including the natural condition of human bodily existence. Marx's value analysis places him squarely in the camp of the growing number of ecological theorists questioning the ability of monetary and market-based calculations to adequately represent the natural conditions of human production and development. **A Social Ecology of Capital** Éric

Pineault, 2023-02-20 An original theory of contemporary capitalist growth and its socio-ecological contradictions. A timely and urgent analysis which seeks to comprehend our ecological plight through an elucidation of monopoly capital. Gareth Dale, Reader in Political Economy, Brunel University. Capital is pushing into motion ever larger global material flows. In doing so, it has come to depend on massive expenditures of energy, putting to work fossil fuels and the machines they animate to transform the world, accumulate power, and grow the economy. The ecological relations and crises of today's societies are driven by the processes of extraction of the elements that come together as a throughput of material and energy flows controlled by capital and shaped by its imperative of valorization. In *A Social Ecology of Capital*, Éric Pineault proposes an original model of the fossil social metabolism that has sustained the growth of advanced capitalism in the last century. Drawing on ecological economics and critical political economy, the book analyses how the social structures of accumulation, production, consumption, and waste determine and regulate the material flow and the accumulation of material artifacts. Showing how social relations shape the ecology of capital, the book highlights the contradictions humanity now faces.

Intersectionalities of Class in Early Modern English Drama Ronda Arab, Laurie Ellinghausen, 2023-08-26 Defining class broadly as an identity categorization based on status, wealth, family, bloodlines, and occupation, *Intersectionalities of Class in Early Modern English Drama* explores class as a complicated contingent phenomenon modified by a wider range of social categories apart from those defining terms, including but not limited to race, gender, religion, and sexuality. This collection of essays, featuring a range of international contributors, explores a broad range of questions about the intersectional factors influencing class status in early modern England, including how cultural behaviors and non-class social categories affected status and social mobility, in what ways hegemonies of elite prerogatives could be disrupted or entrenched by the myriad of intersectional factors that informed social identity, and how class position informed the embodied experience and expression of affect, gender, sexuality, and race, as well as relationships to place, space, land, and the natural and civic worlds. Ecojustice and Education Kathryn Ross Wayne, David A. Gruenewald, 2014-05-22 First Published in 2004. This is Volume 36 in the Educational Studies series. A Journal of the American Educational Studies Association, which focuses on Ecojustice and Education. Alongside articles and book reviews, this features guest editors Kathryn Ross Wayne and

David A Gruenewald This volume contains an examination of educational research theory policy and practice seeking to highlight an overwhelming absence of attention toward the ecological contexts of existence The articles in this issue aim to further stimulate and encourage a wide and rich web of inquiry into ecojustice and ecodevelopment

The Politics of Ecosocialism Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound it is clear that we need a fundamentally new approach to tackle these issues This innovative book offers a unique perspective stressing the necessity of both ecological and social change as it discusses how to create a red green or eco socialist society Examining the current crises of welfare capitalism as well as the challenges and conflicts of an eco socialist society the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability It analyses the key social and ecological issues related to the welfare state including green Keynesianism ecological Marxism the limits of growth and no growth capitalist barriers to a renewable energy transition proposals for a universal basic income and the role of technology Finally the book outlines possible paths of transformation towards creating an eco socialist society drawing out lessons that can be applied internationally This book will be of great interest to students and researchers in economics environmental studies and political science

Ecosocialism Salvatore Engel-Di Mauro, 2024-11-30 This book offers an extensive critical overview of eco socialism one of the most generative and significant aspects of contemporary debates within socialism Marxism has played a foundational role in the development of ecosocialism since its inception and has also led to critical reflections on the 20th century Marxism and ecological interpretation of Marxist writings Despite the relevance of ecosocialism to the pressing debates on the ecological crisis and the growing literature on ecosocialism there has not been a comprehensive account on ecosocialism and its variations This volume seeks to fill this important gap and to pave the way for a more systematic development of this emerging paradigm The book not only engages with a critique of other non socialist ecological schools of thought in defence of ecosocialism but also provides a critical overview of debates within ecosocialism and of ecosocialism itself The latter includes an appraisal of ecosocialism in Bolivarian Venezuela and the implications of current efforts in the People's Republic of China to build an ecological civilisation Furthermore the book contains a crucial discussion about the relation between eco socialism and indigenous studies and movements

Marxism and the Capitalist State Rob Hunter, Rafael Khachaturian, Eva Nanopoulos, 2023-10-30 This book builds on the recent revival of interest in Marx and Marxism calling for a renewal and refinement of Marxist state theory It aims to provoke and encourage new debates and critiques that build on but also update and extend the rich tradition of Marxist analyses of the capitalist state including the well known debates of the 1970s The chapters present a dynamic and diverse constellation of arguments and perspectives on a range of topics from general re appraisals of the capitalist state to investigations of contemporary challenges including digitalisation the ecological crisis the coronavirus pandemic social reproduction and critical political

economy What they share is a commitment to an understanding of the specifically capitalist character of the modern state and its significance for any serious discussion of the causes of our current age of global catastrophe and the overcoming of capitalist social relations

Workers and Trade Unions for Climate Solidarity Paul Hampton, 2015-06-05 This book is a theoretically rich and empirically grounded account of UK trade union engagement with climate change over the last three decades It offers a rigorous critique of the mainstream neoliberal and ecological modernisation approaches extending the concepts of Marxist social and employment relations theory to the climate realm The book applies insights from employment relations to the political economy of climate change developing a model for understanding trade union behaviour over climate matters The strong interdisciplinary approach draws together lessons from both physical and social science providing an original empirical investigation into the climate politics of the UK trade union movement from high level officials down to workplace climate representatives from issues of climate jobs to workers climate action This book will be of great interest to students and researchers in environmental politics climate change and environmental sociology

Elgar Encyclopedia of Environmental Sociology Christine Overdevest, 2024-04-12 The Elgar Encyclopedia of Environmental Sociology serves as a repository of insight on the complex interactions challenges and potential solutions that characterize our shared ecological reality Presenting innovative thinking on a comprehensive range of topics expert scholars researchers and practitioners illuminate the nuances complexities and diverse perspectives that define the continually evolving field of environmental sociology

Marx's Theory of Value at the Frontiers Güney Işıkara, Patrick Mokre, 2025-09-30 Why do humans produce the things they do in the way they do it As this book shows the classical political economics approach to value and prices has fundamental implications for analyzing the historical trajectory of capitalism It demonstrates that the classical political economists approach to value and prices which finds its most advanced formulation in Marx sheds light on the source of profits exploitation whether equivalents are exchanged in trade dynamics of asymmetric and uneven accumulation and the relationship of production to non human natures at large Understanding these phenomena is key to understanding the economic regularities underlying the key issues facing the world in the twenty first century imperialism and ecological breakdown It argues powerfully that deviations between market prices production prices and labor values are central to understanding international value transfers due to differential capital compositions and rates of exploitation as well as the central role of rent and accumulation in capitalism induced ecological crisis The book is structured to provide an understandable introduction to the classical approach to value and prices and its modern expression in empirical applications making it of great interest to readers in Economics Political Economy Politics and Sociology
