

Marxian Theory of Origin of State

SABYASACHI SAHANI

Best Exposition/Explanation

- ⇒ Marxian theory of state explained by **Frederick Engel** in his book – The Origin of the Family, Private Property and state – “The State is therefore, by no means a power forced in society from without, just as little is it the reality of the ‘ethical ideas’, ‘the image and reality’ of reason
- ⇒ **Hegel** – State is a product of society at a certain stage of social development
- ⇒ State is not a natural organisation, it didn’t exist from eternity
- ⇒ When the 2 antagonistic contending classes (capitalists vs proletariat) become irreconcilable with both having conflicting economic interests, it becomes necessary for a power seemingly above society that can moderate the conflict – that is State !

Major Aspects of Marxian Theory of State

Marxian Theory Of The State:

Recent Marxian Theory John F. Sitton,1996-01-01 Brings together prominent recent analyses within the Marxist tradition that bear on class formation and social conflict in contemporary capitalism and concludes that class relations continue to be important for analyzing the historical trajectory of and challenges to capitalism although not in the way Marx imagined

The Marxian Theory of the State Sherman Hsiao-Ming Chang,1931

The Marxist Theory of the State Ernest Mandel,2013

Alien Politics Paul Thomas,2019-06-04 Alien Politics retrieves from the writings of Marx an original theory of the state which remains viable and relevant today Paul Thomas traces the process by which Marx's theory of the state as the instrument of the capitalist ruling class became transformed into communist dogma under the auspices of Lenin and other official Marxist stalwarts He argues that Marx's writings still have something to teach us and should not be pulled down with the monoliths and mausoleums of communism

Reinterrogating the Classical Marxist Discourses of Revolutionary Democracy Soma Marik,2008

The State and International Relations John M. Hobson,2000-04-27 This book first published in 2000 provides students with an overview of the main theories of the state found in International Relations Many International Relation scholars are proclaiming the state to be dead while others lament the lack of an adequate theory of the state in International Relations John Hobson seeks to resolve this confusion by introducing readers to state theory arguing that existing theories of the state are limited and proposing a framework based around the agent structure debate The book surveys realist liberal Marxist constructivist and neo Weberian approaches to the state and places each perspective's view of the state in relation to its theory of International Relations as a whole It offers readers a unique introduction to state theory in International Relations and will be of interest to students and scholars of sociology and politics as well as International Relations

Marxism and the State P. Wetherly,2005-06-07 Paul Wetherly provides a restatement and defence of the classical Marxist theory of the state developing an analytical approach that draws on G A Cohen's functional interpretation of Marx's theory of history Instrumentalist and structuralist arguments are conceived as related causal mechanisms within the functional approach and the principle of economic determination is shown to be consistent with the relative autonomy of the state as an institution with its own interests and capacities This old fashioned interpretation is defended against rival approaches within contemporary Marxism

Karl Marx's Theory of Revolution I Hal Draper,1977 Volume I of Hal Draper's definitive and masterful study of Marx's political thought which focuses on Marx's attitude toward democracy the state intellectuals as revolutionaries and much much more This series Karl Marx's Theory of Revolution represents an exhaustive and definitive treatment of Marx's political theory policy and practice Marx and Engels paid continuing attention to a host of problems of revolution in addition to constructing their grand theory All these political and social analyses are brought together in these volumes as the author draws not only on the original writings of Marx and Engels but also on the sources that they used in formulating their ideas and the many commentaries on their published work

Draper's series is a massive and immensely valuable scholarly undertaking. The bibliography alone will stand as a rich resource for years to come. Yet despite the scholarly treatment the writing is direct, forceful and unpedantic throughout and will appeal to the beginning student as much as the advanced reader. Marx's Construction of Social Theory (RLE Marxism) J.M. Barbalet, 2015-04-17 This study first published in 1983 explores the connections between Marx's philosophy and his empirical analysis of society and state by showing the different meanings of many of Marx's concepts as their role in his theory changes and the theory itself develops. Beginning with an examination of Marx's search for a sound epistemological basis on which to build a social theory, Dr Barbalet then gives an analysis of the way in which Marx continually modifies the concepts he uses and continues with an examination of the different functions they are given in different theoretical settings. Various nuances of Marx's thought often obscured by the simplistic early/late dichotomy are revealed by Dr Barbalet's close attention to the progressive transformation of Marx's concepts and by his scrupulous analysis of them in not only their textual but also their theoretical context. Finally the book examines the manner in which Marx's construction of social theory by its very nature means that some material is replaced by other theoretical fabric as the theoretical structure itself is in different ways dismantled and reorganised as Marx's thought evolves and develops. *Karl Marx's Theory of Revolution Vol IV* Hal Draper, 1990-01-01 Much of Karl Marx's most important work came out of his critique of other thinkers including many socialists who differed significantly in their conceptions of socialism. The fourth volume in Hal Draper's series looks at these critiques to illuminate what Marx's socialism was as well as what it was not. Some of these debates are well known elements in Marx's work such as his writings on the anarchists Proudhon and Bakunin. Others are less familiar such as the writings on Bismarckian socialism and Boulangism but promise to become better known and understood with Draper's exposition. He also discusses the more general ideological tendencies of utopian and sentimental socialisms which took various forms and were ingredients in many different socialist movements.
