Step outside your door and reconnect with nature From the author of *Writing and the Spiritual Life* comes a guide that will replenish your connection to the earth and inspire you to develop and strengthen your imagination The natural world has inspired artists seekers and thinkers for millennia but in recent times as the pace of life has sped up its demands have moved us indoors Yet nature s capacity to lead us to important truths to invigorate and restore our imagination and equilibrium is infinite Step into Nature makes nature personal again by stimulating awareness and increasing our understanding of the environment But being in nature doesn t mean flying off to remote faraway places Nature is as close as opening your front door and opening your heart to the sky above the miniature gardens that push their way up between the sidewalk cracks in

our cities and the small stream just down the road Patrice Vecchione demonstrates how nature can support and enhance your creative output invigorate your curiosity and restore your sense of connection to and love of the earth Included throughout the book is The Cabinet of Curiosities exercises and suggestions for practical and unexpected ways to stimulate your imagination deepen your relationship with nature and experience the harmony between creativity and the natural world

Cohen,2016-09-19 Coming of Age at the End of Nature explores a new kind of environmental writing This powerful anthology gathers the passionate voices of young writers who have grown up in an environmentally damaged and compromised world Each contributor has come of age since Bill McKibben foretold the doom of humanity s ancient relationship with a pristine earth in his prescient 1988 warning of climate change The End of Nature What happens to individuals and societies when their most fundamental cultural historical and ecological bonds weaken or snap In Coming of Age at the End of Nature insightful millennials express their anger and love dreams and fears and sources of resilience for living and thriving on our shifting planet Twenty two essays explore wide ranging themes that are paramount to young generations but that resonate with everyone including redefining materialism and environmental justice assessing the risk and promise of technology and celebrating place anywhere from a wild Atlantic island to the Arizona desert to Baltimore and Bangkok The contributors speak with authority on problems facing us all whether railing against the errors of past generations reveling in their own adaptability or insisting on a collective responsibility to do better Contributors include Blair Braverman Jason Brown Cameron Conaway Elizabeth Cooke Amy Coplen Ben Cromwell Sierra Dickey Ben Goldfarb CJ Goulding Bonnie Frye Hemphill Lisa Hupp Amaris Ketcham Megan Kimble Craig Maier Abby McBride Lauren McCrady James Orbesen Alycia Parnell Emily Schosid Danna Staaf William Thomas and Amelia Urry The Nut-grower ,1912 **Natural Capital** Peter Kareiva,2011-04-07 In 2005 The Millennium Ecosystem Assessment MA provided the first global assessment of the world s ecosystems and ecosystem services It concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services This bleak prophecy has galvanized conservation organizations ecologists and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy The editors have assembled the world s leading scientists in the fields of conservation policy analysis and resource economics to provide the most intensive

and best technical analyses of ecosystem services to date A key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world In addition the book documents a toolbox of ecosystem service mapping modeling and valuation models that both The Nature Conservancy and the World Wide Fund for Nature WWF are beginning to apply around the world as they transform conservation from a biodiversity only to a people and ecosystem services agenda The book addresses land freshwater and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services
