## **My Of Inventions:**

**My Inventions** Nikola Tesla, 2013-04-08 Nikola Tesla has been called the most important man of the twentieth century. Certainly he contributed more to the field of electricity, radio, and television than any other person living or dead. Ultimately, he died alone and impoverished, having driven all of his friends away through his neurotic and eccentric behavior. Tesla was never able to fit into the world that he found himself in. This autobiography, originally serialized in *Electrical Experimenter*, is an intensely fascinating glimpse into the mind of a genius, his inventions, and the magical world in which he lived. **My Inventions and Other Writing and Lectures** Nikola Tesla, 2021-02-17 A carefully curated library of the world's greatest literature, Dover Thrift Editions are the most affordable choice for today's readers. The series offers a vast selection of complete and unabridged titles, each a classic work of fiction, nonfiction, poetry, or drama. This volume presents one of the richest collections of writing and lectures by Nikola Tesla, a founding figure of the modern electrical power industry and a longtime rival of Thomas Edison. After working for Edison's electrical company, the engineer and scientist developed his own legacy of inventions, experiments, and nearly 200 patents. Tesla contributed to and improved many scientific fields by developing the alternating current electrical system, radio transmissions, X-ray imaging, turbines, and much more. In addition to Tesla's autobiography *My Inventions* and his essay *The Problem of Increasing Human Energy*, this book features five lectures, including *A New System of Alternate Current Motors and Transformers* and *On Light and Other High Frequency Phenomena*. Book jacket **The Repertory of Patent Inventions**, 1842 English Patents of Inventions, Specifications, 1868

**Specifications of Letters Patent for Inventions and Provisional Specifications**, 1879 *The Repertory of patent inventions [formerly The Repertory of arts, manufactures and agriculture]. Vol.1-enlarged ser., vol.40*, 1845 **My Invention Testimony** Linda C., 2019-12-03 The title *My Invention Testimony* came from the journal I kept as I worked on my invention called Food Separators. As I was being introduced to the world of inventions, I persevered through a lot of frustrations and hostile ordeals during my learning experiences. I've heard in several sermons from various pastors, including my own, that when one commits themselves to carry out an assignment for God, one would most likely experience an aloofness of family and friends. What a true statement! I did lose a closeness with my family, biological and Christian alike. I became like a plague to them because I no longer did the things I used to do. I wanted as well as needed to spend as much time with the Lord as possible. My desire to spend more time with Him brought about undesirable situations with people of whom I used to have a closeness to. Not only did I have personal attacks, but in terms of business, it has been a long and tough journey with my endeavors to get prototypes of my invention as well as making decisions to manufacture, license, or self-distribute. The decision that I make would determine my success or failure. I had a lot of decisions to make before I could even get my invention on the market. I so often found myself praying and asking God for His direction and guidance. After about six

months into the invention process I heard the Holy Spirit speak to me and say Here is your book Continue to write and place glory on my name I couldn't believe what I heard but after hearing the Lord speak I looked at my journal and realized Wow this is a book I was a little hesitant because I had no inclination of writing a book The thought never crossed my mind Besides I was so caught up in venturing out and searching for information on how to make the right decisions concerning my invention that I didn't have time for anything else As I stated before I had no thoughts of writing a book but I was obedient to God This book is an actual testimony of almost everything that I've gone through to get this far with my invention I say almost because I'm not finished with publicizing my invention and it is not yet fully on the market I've done two illustrations with self-made prototypes and they were a big hit Everyone liked them but I still have a long way to go I thank God for His vision and for allowing me to partner with Him in sharing the experience of this venture
