Running to Resurrection Clark Berge, 2019-10-30. At the age of forty-five, unfit and overweight, Clark Berge, a professed Franciscan friar, took up running. In his younger life, he had struggled with alcoholism and with his sexual identity. Running became cathartic, not just for his body but for making peace with the lingering shame of a troubled past, facing unresolved questions, and coming to a fuller acceptance of who he was. As the elected leader of a worldwide religious community, Clark had the opportunity to run in widely differing urban and wild places, from the English countryside to a South African shantytown, to remote Pacific islands. His running adventures opened up larger spiritual insights into the nature of religious life, social activism, contemplation, life on the margins, solitude, and community, fear and fortitude, simplicity, and living in harmony with creation. This unique memoir of running and religion explores Christian spirituality with a disarming honesty and depth.

Waking from a Dream Lawrence Clarke, 2013-08-31. A 95-year-old Missourian diagnosed with an inoperable brain tumor decides to write the story of his unusual life before he passes into history. Chester Hanley, born in 1907 in Gault's Gap, Missouri, has had an unusual existence. When he is born, a friend of his father's donates a small orange bush as a birthing gift. It fruits every few months as the boy matures, but each harvest only yields two oranges. Just like life, sometimes they are sweet, sometimes bitter, and very occasionally one is bitter and one is sweet. The fruit appears during his early years to be a catalyst in triggering dreams, and in those dreams, Chester sees glimpses of the present and future. Quincy Rawlins, the tree donor, warns Chester and his father in no uncertain terms that the boy can benefit others from what he learns in his dreams, but he can never profit from the magic himself. In 1916, his father goes off to war but comes home a shell of his former self. Where before he was a non-violent man, he now strikes his wife a few times. He assaults some fellow farmers and is sent to Prison in Springfield. When he returns, he is more violent, and Chester's mother banishes him from the home. He

goes to New York and becomes a street fighter where he is accidentally injured when he falls and strikes his head on a kerb. He comes back home as a shadow of a robust man he once was. He is put into a nursing home near Saint Louis where Chesters mother begins an affair with the treating doctor. Chester sees this in a dream and goes to the clinic finds his neglected father and brings him back home. Later his father suffers a brain aneurism and finally he dies. The story encompasses the lives of Chesters three younger siblings three ex wives his involvement in World War II and his ongoing battles with his mother. He becomes a best selling author albeit involuntarily and travels the USA and abroad but never lives anywhere except Gaults Dip. He stops writing in the 1960s but when in late 2002 he diagnosed with the inoperable brain tumour he decides to write his life story.

Breaking Down the Barriers Ricardo A. Ramirez, 2012-05. This book was written with an open heart. It contains no elaborate linguistic or rhetorical features. The events narrated in it flow without constraints like in a conversation with a good friend. My dreams struggles and most importantly my triumphs through the practice of positive thinking are the main topics of this conversation with the reader. By putting my story on paper I aspire to nothing more than to share my life experiences with others who may find them helpful.

International Perspectives on Gender and Mathematics Education Olof Steinthorsdottir, Helen J. Forgasz, Joanne Rossi Becker, Kyeonghwa Lee, 2010-06-01. Why a book on gender issues in mathematics in the 21st century? Several factors have influenced the undertaking of this project by the editors. First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998. Surely it was time for an updated look at this critical area of mathematics education. Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries. Some publication seemed essential to share this new knowledge emerging from a

wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts
