Plenishment Of The Earth:

Replenishing the Earth Wangari Maathai, 2010-09-14 An impassioned call to heal the wounds of our planet and ourselves through the tenets of our spiritual traditions from a winner of the Nobel Peace Prize It is so easy in our modern world to feel disconnected from the physical earth Despite dire warnings and escalating concern over the state of our planet many people feel out of touch with the natural world Nobel laureate Wangari Maathai has spent decades working with the Green Belt Movement to help women in rural Kenya plant and sustain millions of trees With their hands in the dirt these women often find themselves empowered and at home in a way they never did before Maathai wants to impart that feeling to everyone and believes that the key lies in traditional spiritual values love for the environment self betterment gratitude and respect and a commitment to service While educated in the Christian tradition Maathai draws inspiration from many faiths celebrating the Jewish mandate tikkun olam repair the world and renewing the Japanese term mottainai don't waste Through rededication to these values she believes we might finally bring about healing for ourselves and the earth

Dynamics of the Earth V. I. Ferronsky, S.V. Ferronsky, 2010-06-28 In their search for solutions to problems concerning the dynamics of the Earth as a self gravitating body the authors have applied the fundamentals found in their book Jacobi Dynamics 1987 Reidel First satellite observations have shown that the Earth does not remain in hydrostatic equilibrium which forms the physical basis of modern geodynamics Secondly satellite data have established a relationship between the planet's polar moment of inertia and the potential of the Earth's outer force field which proves the most basic point of Jacobi dynamics This allowed the authors to revise their derivation of the classical virial theorem introducing the concept of a volumetric force and volumetric moment and so to obtain a generalized virial theorem in the form of Jacobi's equation The main dynamical effects are the kinetic energy of oscillation of the interacting particles which explains the physical meaning and nature of gravitational forces separation of shells of a self gravitating body with respect to its mass density differences in angular velocities of the shell's rotation continuity in variance of the potential of the outer gravitational force field together with reductions in the envelope of the interacting masses volumetric center of gravity the nature of Earth Moon and satellite precession the nature and generating mechanism of the planet's electromagnetic field the common nature of gravitational and electromagnetic energy and other related issues The work is a logical continuation of the book Jacobi Dynamics and is intended for researchers teachers and students engaged in theoretical and experimental research in various branches of astronomy geophysics planetology and cosmogony and for students of celestial statistical quantum and relativistic mechanics and hydrodynamics

The Drunkenness of Noah H. Hirsch Cohen, 2023-02-06 In the Broadway musical *The King and I* the King is confronted by a problem that is described as a puzzlement In the biblical story of Noah and the flood the reader also is confronted by a puzzlement Here is Noah the most worthy human being saved from the devastating flood and he is found drunk and naked in his tent The narrator says nothing of motivation so what prompts Noah to get so drunk as to appear ready for sexual

intercourse Has God completely misjudged Noah's character A provocative exegesis whose insights derive from psychoanalysis philology and geology THE DRUNKENNESS OF NOAH is additionally innovative in that it leads to a repudiation of the documentary theory once a prime test of most biblical scholars Cohen's insightful interpretation discovers the simple meaning of the text
