Consuming Space Michael K. Goodman,David Goodman,2016-05-23 An examination of the relationship between space place and consumption offers important insights into some of the most powerful forces constructing contemporary societies Space and place are made and remade through consumption Yet how do cultures of consumption discover space and how do they construct place This book addresses these questions by exploring the implications of conceptualizing consumption as a spatial increasingly global yet intensely localized activity The work develops integrative approaches that articulate the processes involved in the production and consumption of space and place The result is a varied engaging and innovative study of consumption and its role in structuring contemporary capitalist political economies

Retail Worker Politics, Race and Consumption in South Africa Bridget Kenny,2018-05-23 This book argues that we need to focus attention on the ways that workers themselves have invested subjectively in what it means to be a worker By doing so we gain an explanation that moves us beyond the economic decisions made by actors the institutional constraints faced by trade unions or the power of the state to interpellate subjects

These more common explanations make workers and their politics visible only as a symptom of external conditions a response to deregulated markets or a product of state recognition Instead through a history of retailing as a site of nation and belonging changing legal regimes and articulations of race class and gender in the constitution of political subjects from the 1930s to present day Wal Mart this book presents the experiences and subjectivities of workers themselves to show that the collective political subject workers abasebenzi is both a durable and malleable political category From white to black women s labour the forms of precariousness have changed within retailing in South Africa Workers struggles in different times have in turn resolved some dilemmas and by other turn generated new categories and conditions of precariousness all the while explaining enduring attachments to labour politics

The Social Cost of Cheap Food Sébastien

Rioux,2019-09-26 The distribution of food played a considerable yet largely unrecognized role in the economic history of Victorian and Edwardian Britain In the midst of rapid urbanization and industrialization retail competition intensified and the channels by which food made it to the market became vital to the country s economic success Illustrating the pivotal importance of food distribution in Britain between 1830 and 1914 The Social Cost of Cheap Food argues that labour exploitation in the distribution system was the key to cheap food Through an analysis of labour dynamics and institutional changes in the distributive sector S bastien Rioux demonstrates that economic development and the rising living standards of the working class were premised upon the growing insecurity and chronic poverty of street sellers shop assistants and small shopkeepers Rioux reveals that food distribution far from being a passive sphere of economic activity provided a dynamic space for the reduction of food prices Positing food distribution as a core element of social and economic development under capitalism The Social Cost of Cheap Food reflects on the transformation of the labour market and its intricate connection to the history of food and society

The Social Science Encyclopedia Adam Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a

variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

Retail Geography Shuguang Wang,Paul Du,2020-05-26 The retail sector is an integral part of a national economy From the political economy perspective all consumer goods have surplus values locked up in them the surplus values are not realized until the consumer goods are purchased by consumers through various distribution channels As such retailing is the essential link between production and consumption The success of a retail business depends on two general factors the location of the retail outlet and management of the business Both factors are equally important If the business is located in the wrong place with the wrong customer base it will not generate expected sales Similarly if the business is poorly managed and operated it will not perform well even if the location is right Influenced by both traditional and new location theories Retail Geography is conceptualized and organized using the retail planning process as the framework The technical and methodological chapters help guide the reader with detailed descriptions of the techniques and are supported with practical examples to reflect the latest software development Retail Geography provides a state of the art summary and will act as a core textbook for undergraduate and graduate students of economic geography interested in specializing in retail and business geography The practical examples also make it a valuable handbook for practitioners in the field as well as students of retail management and commercial real estate management

The Market Makers Gary G. Hamilton,Benjamin Senauer,Misha Petrovic,2012-08-02 The huge expansion of new marketplaces and new retailers over the last fifty years has created a retail revolution These large and globally sophisticated retailers have harnessed the new technologies in communications and logistics to build consumer markets around the world and to create suppliers new types of manufacturers that provide consumers with whatever goods they want to buy These global retailers are at the hub of the new global economy They are the new Market Makers and they have changed the way the global economy works Despite the fact that this retail revolution unfolded right before our eyes this book is the first to describe the market making capabilities of these retailers In eleven chapters by leading scholars The Market Makers provides a detailed and highly readable analysis of how retailers have become the leading drivers of the new global economy
