Reading, Writing, and Speech Problems in Children and Selected Papers Samuel Torrey Orton, 1989 Rev ed of Reading writing and speech problems in children c1937 **Fifty Years in Dyslexia Research** Timothy R. Miles, 2006-08-04 A well known pioneer of dyslexia professor Tim Miles leads the reader through the fifty years of his research into dyslexia Tracing important developments in theories and ways of treating the condition this fascinating autobiographical account shows how scientific understanding has affected policy and practice Tim Miles set up the Bangor Dyslexia Unit in the 1970s when he was Head of the Department of Psychology The Bangor Dyslexia Unit has grown steadily ever since and is now a nationally and internationally renowned specialised Unit Tim Miles is also founder of the journal Dyslexia and the author of several books on dyslexia His best known titles include Dyslexia The Pattern of Difficulties and Dyslexia A Hundred Years On co authored with his wife Elaine Miles *The Founders of Child Neurology* Stephen Ashwal, 1990 **The Unteachables** Keith A. Mayes, 2023-01-24 How special education used disability labels to marginalize Black students in public schools The Unteachables examines the overrepresentation of Black students in special education over the course of the twentieth century As African American children integrated predominantly white schools many were disproportionately labeled educable mentally retarded EMR learning disabled LD and emotionally behavioral disordered EBD Keith A Mayes charts the evolution of disability categories and how these labels kept Black learners segregated in American classrooms The civil rights and the educational disability rights movements Mayes shows have both collaborated and worked at cross purposes since the beginning of school desegregation Disability rights advocates built upon the opportunity provided by the civil rights movement to make claims about student invisibility at the level of intellectual and cognitive disabilities Although special education ostensibly included children from all racial groups educational disability rights advocates focused on the needs of white disabled students while school systems used disability discourses to malign and marginalize Black students From the 1940s to the present social science researchers policymakers school administrators and teachers have each contributed to the overrepresentation of Black students in special education Excavating the deep seated racism embedded in both the public school system and public policy The Unteachables explores the discriminatory labeling of Black students and how it indelibly contributed to special education disproportionality to student discipline and push out practices and to the school to prison pipeline effect *Human Behavior, Learning, and the Developing Brain* Donna Coch, Kurt W. Fischer, Geraldine Dawson, 2010-06-15 Synthesizing the breadth of current knowledge on brain behavior relationships in atypically developing children this important volume integrates theories and data from multiple disciplines Leading authorities present their latest research on specific clinical problems including autism Williams syndrome learning and language disabilities ADHD and issues facing infants of diabetic mothers In addition the effects of social stress and maltreatment on brain development and behavior are thoroughly reviewed Demonstrating the uses of cuttingedge methods from developmental neuroscience

developmental psychology and cognitive science the contributors emphasize the implications of their findings for real world educational and clinical practices

The Mislabeled Child Brock Eide, Fernet Eide, 2006-08-01 An incredibly reassuring approach by two physicians who specialize in helping children overcome their difficulties in learning and succeeding in school For parents teachers and other professionals seeking practical guidance about ways to help children with learning problems this book provides a comprehensive look at learning differences ranging from dyslexia to dysgraphia to attention problems to giftedness In *The Mislabeled Child* the authors describe how a proper understanding of a child's unique brain based strengths can be used to overcome many different obstacles to learning They show how children are often mislabeled with diagnoses that are too broad ADHD for instance or are simply inaccurate They also explain why medications are often not the best ways to help children who are struggling to learn The authors guide readers through the morass of commonly used labels and treatments offering specific suggestions that can be used to help children at school and at home This book offers extremely empowering information for parents and professionals alike *The Mislabeled Child* examines a full spectrum of learning disorders from dyslexia to giftedness clarifying the diagnoses and providing resources to help The Eides explain how a learning disability encompasses more than a behavioral problem it is also a brain dysfunction that should be treated differently

Bridges Between Psychology and Linguistics Donna Jo Napoli, Judy Anne Kegl, Judy Kegl, 2013-03-07 Written as a tribute to Lila Gleitman an influential pioneer in first language acquisition and reading studies this significant book clearly establishes the relationships between psychology and linguistics It begins with a thorough examination of issues in developmental psychology continues with questions on perception and cognition studies the realm of psycholinguistics and concludes with an exploration of theoretical linguistics

Twentieth Century Reading Education: Understanding Practices of Today in Terms of Patterns of the Past Gerard Giordano, 2021-09-13 This book examines twentieth century reading education Among the major educational issues reviewed are testing diagnosis individualized education textbooks readability multiculturalism bi lingualism disability and technology The book explores attempts by educators and psychologists to answer theoretical as well as practical questions about why only some students developed literacy skills It examines the efforts to prevent reading failure as well as to aid those learners who had not learned to read The four types of remedial programs explored are skills based language based literature based and technology based The book identifies the social emotional physical and cognitive factors that have been linked to remedial reading instruction Based on a review of more than 3000 primary sources from the 1800s to the present extensive quotations have been integrated into the text to give readers a sense of intellectual involvement with the educators who are discussed

Reading Instruction in America Barbara Ruth Peltzman, 2015-10-02 The diversity of student populations in the United States presents educators with many challenges To provide effective reading instruction for the individual student teachers must understand the enormous variety of reading methods and materials that exist and make independent decisions based on their students particular needs

Research indicates that educators are often influenced by reading instruction fads that quickly fade making it more challenging to develop a repertoire of teaching strategies in which a teacher may have confidence This book examines a variety of reading methods used in American schools from the 19th to the 21st century and the literature promoting or critiquing them to help teachers become informed decision makers and better meet the needs of students

Handbook of Developmental Cognitive Neuroscience, second edition Charles A. Nelson, Monica Luciana, 2008-07-11 The second edition of an essential resource to the evolving field of developmental cognitive neuroscience completely revised with expanded emphasis on social neuroscience clinical disorders and imaging genomics The publication of the second edition of this handbook testifies to the rapid evolution of developmental cognitive neuroscience as a distinct field Brain imaging and recording technologies along with well defined behavioral tasks the essential methodological tools of cognitive neuroscience are now being used to study development Technological advances have yielded methods that can be safely used to study structure function relations and their development in children s brains These new techniques combined with more refined cognitive models account for the progress and heightened activity in developmental cognitive neuroscience research The Handbook covers basic aspects of neural development sensory and sensorimotor systems language cognition emotion and the implications of lifelong neural plasticity for brain and behavioral development The second edition reflects the dramatic expansion of the field in the seven years since the publication of the first edition This new Handbook has grown from forty one chapters to fifty four all original to this edition It places greater emphasis on affective and social neuroscience an offshoot of cognitive neuroscience that is now influencing the developmental literature The second edition also places a greater emphasis on clinical disorders primarily because such research is inherently translational in nature Finally the book s new discussions of recent breakthroughs in imaging genomics include one entire chapter devoted to the subject The intersection of brain behavior and genetics represents an exciting new area of inquiry and the second edition of this essential reference work will be a valuable resource for researchers interested in the development of brain behavior relations in the context of both typical and atypical development
