Naturalism and Religion Kai Nielsen, 2011-04-29 This elucidation and defense of naturalism argues that an uncompromising secular orientation is the best framework for the search for meaning and interprets religion in purely naturalistic terms Part One seeks to demonstrate that religious symbols arise from facts about human beings and the societies in which they live specifically our needs fears and aspirations Part Two examines arguments for and against naturalism including the defenses of naturalism by Sidney Hook Ernest Nagel Antony Flew and critical reactions to their views The forceful and rigorously analytical case made by Jean Hampton against naturalism is also examined resulting in a clarification of the substantial and sound methodological grounds for naturalism and atheism Part Three considers the strongest intellectual challenge to secularism and naturalism namely that of Ludwig Wittgenstein and some of his followers Norman Malcolm D Z Phillips Hilary Putnam Rush Rhees and Peter Winch Nielsen concludes that none of these critiques diminish the cogency and viability of naturalism as the most reasonable basis for viewing our world today **Icons of Unbelief** S. T. Joshi, 2008-10-30 Discusses the ideas and impact of 27 atheists agnostics and secularists whose ideas have shaped society over the last 200 years In the opinion of many critics and philosophers we are entering an age of atheism marked by the waning of Christian fundamentalism and the flourishing of secular thought Through alphabetically arranged entries written by expert contributors this book profiles 27 iconic figures of unbelief whose ideas have shaped American society over the last 200 years Included are entries on influential figures of the past such as Albert Einstein and Voltaire as well as on such contemporary figures as Richard Dawkins and Sam Harris Each entry discusses the ideas and lasting significance of each person or group provides sidebars of interesting information and illuminating quotations and cites works for further reading The volume closes with a selected general bibliography Students in social studies and history classes will

that will shed light into the mechanisms of human needs politics interaction The text also reviews Maslow s hierarchy of needs along with Marx s opinion on human needs The book will be of great interest to political scientists sociologists and behavioral scientists Modernity, Civilization and the Return to History Anthony F. Shaker,2020-10-06 The modern concept and study of civilization have their roots not in western Europe but in the spirit of scientific investigation associated with a self conscious Islamicate civilization What we call modernity cannot be fathomed without this historical connection We owe every major branch of science known today to the broad tradition of systematic inquiry that belongs to a region of being as Heidegger would say whose theoretical practical and institutional dimensions the philosophy of that civilization played an unprecedented role in creating This book focuses primarily on the philosophical underpinnings of questions relating to civilization personhood and identity Contemporary society and thinking in western Europe introduced new elements to these questions that have altered how collective and personal identities are conceived and experienced In the age of globalization expressions of identity individual social and cultural survive precariously outside their former boundaries just when humanity faces perhaps its greatest challenges environmental degradation policy inertia interstate bellicosity and a growing culture of tribalism Yet the world has been globalized for at least a millennium a fact dimmed by the threadbare but still widespread belief that modernity is a product of something called the West One is thus justified in asking as many people do today if humanity has not lost its initiative This is more a philosophical than an empirical question There can be no initiative without the human agency that flows from identity and personhood i e the way we the acting subject live and deliberate about our affairs Given the heavy scrutiny under which the modern concept of identity has come Dr Shaker has dug deeper bringing to bear a wealth of original sources from both German thought and ikmah Islamicate philosophy the latter based on material previously unavailable to scholars Posing the age old question of identity anew in the light of these two traditions whose special historical roles are assured may help clear the confusion surrounding modernity and hopefully our place in human civilization Proximity to Scholasticism and therefore Islamicate philosophy lent German thought up to Heidegger a unique ability to dialogue with other thought traditions Two fecund elements common to Heidegger Q naw and Mull adr are of special importance Logos utterance speech as the structural embodiment at once of the primary meaning essential reality of a thing and of divine manifestation and the idea of unity in difference which adr finally formulated as the substantial movement of existence But behind this complexity is the abiding question of who Man is which cannot be answered by theory alone Heidegger who occupies a good portion of this study questioned the modern ontology at a time of social collapse and deep spiritual crisis not unlike ours Yet that period also saw the greatest breakthroughs in modern physics and social science The concluding chapters take up more specifically identity renewal in Western literature and Muslim reformism The renewal theme reflects a point of convergence between the Eurocentric worldview in which modernism has its secular aesthetics roots and a current originating in Ibn Taymiyyah s reductionist epistemology and skeptical fundamentalism It expresses a

hopeless longing for origin in a historically pristine golden age an obvious deformation of philosophy's millennial concern with the commanding creative oneness of the Being of beings [Why People Stop Believing](#) Paul Chamberlain, 2018-01-12

This book addresses a growing need in apologetic literature. It is a response to the growing wave of Christian leaders who are rejecting Christianity and becoming some of its most ardent critics often supported by a plethora of new organizations arising to encourage such people to cut ties to their faith. This is a new challenge from a different breed of critics who are using their instant credibility and insider's knowledge of theology, the Bible, church history, even apologetics to debunk the faith they once believed and promoted. They have taken aim at the foundations of Christianity including God, the Scriptures, miracles, and the supernatural, and Christianity's perceived inherent prohibition on free enquiry. Readers will be introduced to arguments against Christianity by these critics which they claim compelled them to leave, followed by responses that use examples, questions, and nontechnical language to make the reasoning accessible. Every issue addressed has been raised by a former Christian leader, and special attention has been paid to their precise formulations. The book makes the case that, however convincing the critics' arguments may appear at first glance, further analysis reveals them to be weaker than they appear, and in many cases entirely unpersuasive. *The Modern Schoolman*, 1971 **Learning Directory**, 1972 *The Court of Reason* Beatrix Himmelman, Camilla Serck-Hanssen, 2021-11-08

The Proceedings present the contributions to the 13th International Kant Congress which was held at the University of Oslo August 6-9, 2019. The congress, which hosted speakers from more than thirty countries and five continents, was dedicated to the topic of the court of reason. The idea that reason stands before itself as a tribunal characterizes the whole of Kant's critical project. Without such a court, reason falls into conflict with itself. With such a court in place, however, it may succeed in establishing the possibility and limits of metaphysics, ethics, aesthetics, law, and science. The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy but can also shed light on the burgeoning fields of meta-philosophy and philosophical methodology. The 2019 Kant Congress put special emphasis on Kant's methodology, his account of conceptual critique, and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law. Additional sections discussed a wide range of topics in Kant's philosophy. The Proceedings will provide anyone who is interested in exploring the variety of present-day work on Kant and Kantian themes with a wealth of fruitful inspiration. **The Dictionary of Modern American Philosophers: K-Q** John R. Shook, Richard T. Hull, 2005. This biographical dictionary contains around 900 entries on philosophers and other intellectuals who impacted philosophical thought in America from 1860 to the present. i.e. 2005

Why be Moral? John Frederick Van Ingen, 1994. Simplistic accounts of egoism have encouraged incomplete and superficial answers to the question: Why should I be moral? This work defends an interpretation of the question as a genuine and fundamental question of practical importance. Detailed description of the egoist's planning language use and reason giving provide a strongest case analysis of the amoral egoistic option in the spirit of Plato's account of the perfectly unjust.

man The framework for an answer is offered which draws out key theoretical assumptions and practical consequences of an egoistic system whose potential adaptability has been consistently underestimated *Philosophical Anthropology* Luigi Bogliolo, 1984

John Dewey and the Challenge of Classroom Practice Stephen M. Fishman, Lucille Parkinson McCarthy, 1998 The first systematic exploration of Deweyan pedagogy in an actual classroom since studies of Dewey's own Laboratory School at the turn of the century In Part I using accessible language Stephen Fishman discusses Dewey's educational theory in the context of Dewey's ideology and process philosophy In Part II Fishman joins composition specialist Lucille McCarthy to examine his own Introduction to Philosophy class In doing so the authors model a collaborative form of practitioner inquiry and bring to life such complex Deweyan concepts as student curriculum integration interest and effort and continuity and interaction
