The Rhetoric of Reason James Crosswhite,2012-11 Responding to skeptics within higher education and critics without James Crosswhite argues powerfully that the core of a college education should be learning to write a reasoned argument A trained philosopher and director of a university wide composition program Crosswhite challenges his readers teachers of writing and communication philosophers critical theorists and educational administrators to reestablish the traditional role of rhetoric in education To those who have lost faith in the abilities of people to reach reasoned mutual agreements and to others who have attacked the right or wrong model of formal logic this book offers the reminder that the rhetorical tradition has always viewed argumentation as a dialogue a response to changing situations an exchange of persuading listening and understanding Crosswhite s aim is to give new purpose to writing instruction and to students writing to reinvest both with the deep ethical interests of the rhetorical tradition In laying out the elements of argumentation for example he shows that claiming questioning and giving reasons are not simple elements of formal logic but communicative acts with complicated ethical features Students must learn not only how to construct an argument but the purposes responsibilities and consequences of engaging in one Crosswhite supports his aims through a rhetorical reconstruction of reason offering new interpretations of Plato and Aristotle and of the concepts of reflection and dialogue from early modernity through Hegel to Gadamer And in his conclusion he ties these theoretical and historical underpinnings to current problems of higher education the definition of the liberal arts and especially the teaching of written communication
