Rebirth Of Rhetoric Essays In Language And Education:

Rebirth of Rhetoric Richard Andrews, 2012 *Rebirth of Rhetoric* brings together contributions from several fields to provide a forum in which a unifying theory for language and literature studies can be debated. The book does not aim to resurrect classical Renaissance rhetoric but to remake it within a contemporary context. The context of texts both spoken and written is one of the main emphases of this collection, whether it is the ideology informing the text or the way in which a text is transformed by its audience. The book also aims to present a range of practical approaches to the study of texts of all kinds: literary, televisual, film and photography. It also argues the case for developments in the Arts and Humanities which will bring together people working in Education, Linguistics, Composition, Literature and Cultural Studies. *Rebirth of Rhetoric* Richard Andrews, 1992. Brings together contributions from several fields to provide a forum in which a unifying theory for language and literature studies can be debated. A range of practical approaches to the study of texts of all kinds are presented. *Literature in Language Education* Geoff Hall, 2015-07-06. A state of the art critical review of research into literature in language education of interest to teachers of English and modern foreign languages. Includes prompts and principles for those who wish to improve their own practice or to engage in projects or research in this area.

Argumentation in Higher Education Richard Andrews, 2009-09-10. *Argumentation in Higher Education* offers professors, lecturers and researchers informative guidance for teaching effective argumentation skills to their undergraduate and graduate students. This professional guide aims to make the complex topic of argumentation open and transparent. Grounded in empirical research and theory but with student voices heard strongly throughout, this book fills the gap of argumentation instruction for the undergraduate and graduate level. Written to enlighten even the most experienced professor, this text contributes to a better understanding of the demands of speaking, writing and visual argumentation in higher education and will undoubtedly inform and enhance course design. The book argues for a more explicit treatment of argument, the product and argumentation, the process in higher education so that the ground rules of the academic discipline in question are made clear. Each chapter concludes with practical exercises for staff development use. Topics discussed include: The importance of argument; The current state of argumentation in higher education; Generic skills in argumentation; The balance between generic and discipline specific skills; Information communication technologies and visual argumentation; How can we best teach argumentation so that students feel fully empowered in their academic composition? Professors, new and experienced lecturers, researchers, professional developers and writing coaches worldwide grappling with this question will find this accessible text to be an extremely valuable resource. Richard Andrews is Professor in English at the Institute of Education, University of London. *Discourse, Dialogue and Technology Enhanced Learning* Rachel Pilkington, 2015-11-19. *Discourse, Dialogue and Technology Enhanced Learning* is invaluable to all those wanting to explore how dialogic processes work and how we facilitate them. Dialogue is an important learning tool and it is by understanding how language affects us and how we

use language to encourage empathise inquire argue and persuade that we come closer to understanding processes of change in ourselves and our society Most researchers in Education will find themselves interpreting some form of data in the form of words whether these words be explanations conversations narrations reflections debates or interviews and whether they are conducted through digital media or face to face Discourse textual or spoken is therefore central to researching education Each chapter focuses on the ways in which alternative levels of discourse analysis provide tools for the researcher enabling insights into the way language works in learning teaching practice and wider society Drawing on the author's own DISCOUNT discourse analysis coding scheme and including a wide range of dialogue examples this book covers Why Dialogue The Role of Dialogue in Education Debate Learning to Argue and Arguing to Learn Towards Meaning Making Inquiry Narrative and Experience The Role of the Significant Other Facilitation Scaffolding and Mediation Inclusion Collaboration and Community Media Mode and Digital Literacy Researching Voices and Texts Discourse Dialogue and Technology Enhanced Learning will be an essential resource for all students educators and educational researchers who have an interest in the role of discourse in educational contexts *Re-framing Literacy* Richard Andrews, 2010-09-13
