Religion In Relation Method Application And Moral Location:

Rationality and the Study of Religion Jeppe Sinding Jensen, Luther Martin, 2013-09-13 Does rationality the intellectual bedrock of all science apply to the study of religion Religion arguably the most subjective area of human behaviour has particular challenges associated with its study Attracting crowd healers conjurers the pious and the prophetic alongside comparativists and sceptics it excites opinions and generalizations whilst seldom explicitly staking out the territory for the discussions in which it partakes Increasingly scholars argue that religious study needs to define and critique its own field and to distinguish itself from theology and other non objective disciplines Yet how can rational techniques be applied to beliefs and states of mind regarded by some as beyond the scope of human reason Can these be made empirically testable or comparable and replicable within academic communities Can science explicate religion without reducing it to mere superstition or redefine its truth in some empirical but meaningful way Featuring contributions from leading international experts including Donald Wiebe Roger Trigg and Michael Pye Rationality and the Study of Religion gets under the surface of the religious studies discipline to expose the ideologies beneath Reopening debate in a neglected yet philosophically significant field it questions the role of rationality in religious anthropology natural history and anti scientific theologies with implications not only for supposedly objective disciplines but for our deepest attitudes to personal experience Interesting and important Religion has long been associated with irrationality both by its defenders and its critics and the topic of rationality has been unjustly neglected The book certainly deserves to be widely circulated Greg Alles Western Maryland College

A Guide to the Phenomenology of Religion James Cox, 2006-08-15 Provides an introduction and overview to the Phenomenology of Religion through describing analysing and evaluating the ideas of key thinkers in the phenomenology of religion This book also examines the thinking of scholars within the Dutch British and North American schools of religious phenomenology

Religion in the Thought of Mikhail Bakhtin Hilary B.P. Bagshaw, 2016-04-08 This book examines the significance of religion in the work of the twentieth century philosopher Mikhail Bakhtin Exploring Bakhtin s contribution to debates on methodology in the study of religion this book argues that his use of religious terminology is derived from his source material in philosophy of religion and not from his confessional commitment to Russian Orthodox Christianity Critiquing Gavin Flood s important work Beyond Phenomenology Hilary Bagshaw explains how Bakhtin s work on otherness presents invaluable insights for scholars of religion particularly pertinent to the contemporary insider outsider debate

Durkheim and the Jews of France Ivan Strenski, 2008-04-15 Ivan Strenski debunks the common notion that there is anything essentially Jewish in Durkheim s work Seeking the Durkheim inside the real world of Jews in France rather than the imagined Jewishness inside Durkheim himself Strenski adopts a Durkheimian approach to understanding Durkheim s thought In so doing he shows for the first time that Durkheim s sociology especially his sociology of religion took form in relation to the Jewish intellectual life of late nineteenth and early twentieth century France Strenski begins each chapter by weighing particular claims some anti

Semitic some not for the Jewishness of Durkheim's work In each case Strenski overturns the claim while showing that it can nonetheless open up a fruitful inquiry into the relation of Durkheim to French Jewry For example Strenski shows that Durkheim's celebration of ritual had no innately Jewish source but derived crucially from work on Hinduism by the Jewish Indologist Sylvain Lévi whose influence on Durkheim and his followers has never before been acknowledged *The Emergence of the Science of Religion in the Netherlands* Arie Molendijk, 2018-08-14 This book explores the emergence of the science of religion in the Netherlands in the second half of the nineteenth century The emphasis is on processes of institutionalization professionalization and internationalization on the one hand and on contemporary discussions about method and conceptualization on the other

Manufacturing Religion Russell T. McCutcheon, 1997 This book offers a powerful critique of traditional religion scholarship and particularly the oft repeated bromide that religion is a sui generis phenomenon

The Oxford Handbook of Friedrich Schleiermacher, 2023-11-22 Schleiermacher is now regarded as an influential figure in the history of Christian thought theories and methods in religious studies and hermeneutics The German language critical edition of his work beginning in 1980 Schleiermacher Kritische Gesamtausgabe and English translations of key portions of his corpus beginning in the late nineteenth century have allowed scholars to investigate the richness of his thought German scholars have often focused on Schleiermacher's ties to early modern philosophy his aesthetics hermeneutics and theory of religion while English speaking scholars have often focused on the theological influences and implications of Schleiermacher's work Over the last 30 years both German and Anglophone scholars have been at work translating and analyzing key texts This Handbook gathers authoritative interpretations of Schleiermacher's work from both German and English speaking scholars bringing together the best that Schleiermacher scholarship has to offer The chapters are divided into three parts The first part offers a clear and nuanced understanding of Schleiermacher's own historical and intellectual context The second part presents a close analysis of the structure and content of Schleiermacher's thought in relation both to questions of method and particular theological themes and to broader inquiries in philosophy and the humanities The third part provides an examination of the reception of his thought and of its contemporary implications for theology and the study of religion

Orality, Literacy, and Colonialism in Southern Africa Jonathan A. Draper, 2003 Literacy is essentially about the control of information memory and belief and with colonialism in Southern Africa came the Bible and text based literacy monitored by missionaries and colonial authorities Old and new oral traditions however are beyond the control of empire and often carry the resistance hopes and dreams of colonized people The essays in this volume recover aspects of Southern Africa's rich oral tradition The authors from disciplines such as anthropology African literature and biblical studies delineate some of the contours of the indigenous knowledge systems which sustained resistance to colonialism and today provide resources for postapartheid society in Southern Africa

A Phenomenology of Indigenous Religions James L. Cox, 2022-02-24 This book compiles James L. Cox's most important writings on a phenomenology of

Indigenous Religions into one volume with a new introduction and conclusion by the author Cox has consistently exemplified phenomenological methods by applying them to his own field studies among Indigenous Religions principally in Zimbabwe and Alaska but also in Australia and New Zealand Included in this collection are his articles in which he defines what he means by the category religion and how this informs his precise meaning of the classification Indigenous Religions These theoretical considerations are always illustrated clearly and concisely by specific studies of Indigenous Religions and their dynamic interaction with contemporary political and social circumstances This collection demonstrates the continued relevance of the phenomenological method in the study of religions by presenting the method as dynamic and adaptable to contemporary social contexts and as responsive to intellectual critiques of the method Modern Societies & the Science of Religions Gerard Wiegers, 2018-11-13 This book brings together studies by seventeen specialists in the science of religions in which they relate the changes in their discipline to the changes which have occurred in a select number of modernising societies worldwide It attempts to study these developments in their relation to and as conditioned and constrained by cultural change changes in educational systems technology population for example migration economic patterns politics and last but not least religious systems The essays focus on resp France Germany the Netherlands Spain the USA Turkey Israel Morocco Saudi Arabia South Africa Indonesia Japan and China Written in honour of Dr Lammert Leertouwer professor of History of Religions and the Comparative Study of Religions at Leiden University from 1979 until his retirement in 1997 the book is particularly important for all those who are interested in the religious social and political contexts of the academic Study of Religions in general and in the various countries dealt with in particular **Fits, Trances, and Visions** Ann Taves, 2020-03-31 Fits trances visions speaking in tongues clairvoyance out of body experiences possession Believers have long viewed these and similar involuntary experiences as religious as manifestations of God the spirits or the Christ within Skeptics on the other hand have understood them as symptoms of physical disease mental disorder group dynamics or other natural causes In this sweeping work of religious and psychological history Ann Taves explores the myriad ways in which believers and detractors interpreted these complex experiences in Anglo American culture between the mid eighteenth and early twentieth centuries Taves divides the book into three sections In the first ranging from 1740 to 1820 she examines the debate over trances visions and other involuntary experiences against the politically charged backdrop of Anglo American evangelicalism established churches Enlightenment thought and a legacy of religious warfare In the second part covering 1820 to 1890 she highlights the interplay between popular psychology particularly the ideas of animal magnetism and mesmerism and movements in popular religion the disestablishment of churches the decline of Calvinist orthodoxy the expansion of Methodism and the birth of new religious movements In the third section Taves traces the emergence of professional psychology between 1890 and 1910 and explores the implications of new ideas about the subconscious mind hypnosis hysteria and dissociation for the understanding of religious experience Throughout Taves follows evolving debates

about whether fits trances and visions are natural and therefore not religious or supernatural and therefore religious She pays particular attention to a third interpretation proposed by such mediators as William James according to which these experiences are natural and religious Taves shows that ordinary people as well as educated elites debated the meaning of these experiences and reveals the importance of interactions between popular and elite culture in accounting for how people experienced religion and explained experience Combining rich detail with clear and rigorous argument this is a major contribution to our understanding of Protestant revivalism and the historical interplay between religion and psychology

The Allure of Decadent Thinking Carl Olson,2013-01-22 Carl Olson offers a compelling and provocative argument against the application of postmodern thought to Religious Studies showing how such radically skeptical thinking undermines subverts and distorts the study of religion

Changing Religious Worlds Bryan Rennie,2001-01-01 Assesses Mircea Eliade's contribution to the contemporary understanding of religion and the academic study of religion *Purity, Sacrifice, and the Temple* Jonathan Klawans,2006 Publisher description *The Allure of Decadent Thinking* Carl Olson,2013-03-07

The use of postmodern thought to approach the study of religion threatens to call into question the values and representational mode of thinking typical of the field Religious studies with a radical scepticism grounded in an embrace of decadence by postmodern thinkers has the potential to undermine subvert and distort the study of religion making it difficult to understand the subject if such an approach is uncritically adopted by scholars seeking new ways to study it Muslims as

Actors Jacques Waardenburg,2012-02-13 This book deals with Islamic studies and with the question how the scholarly study of religion can contribute to the study of Islam The author advocates studying Islamic phenomena as signs and symbols interpreted and applied in diverse ways in existing traditions He stresses the role of Muslims as actors in the ongoing debate about the articulation of Islamic ways of life and construction of Islam as a religion A careful study of this debate should steer clear of political religious and ideological interests Research in this area by Muslims and non Muslim scholars alike should address the question of what Muslims have made of their Islam in specific circumstances Current political contexts have created an unhealthy climate for pursuing an open approach to Islam based on reading observing listening and reflecting Yet precisely nowadays we need to look anew at ways of Muslim thinking and acting that refer to Islam and to avoid certain schemes of interpreting Muslim realities that are no longer adequate for present day Muslim life situations Muslim recourse to Islam can be studied as human constructions of value and meaning and relations between Muslims and others can be seen in terms of human interaction without blame always falling on Islam as such Dimensions of the Sacred Ninian

Smart,1996 *Dimensions of the Sacred* is arguably one of the most comprehensive and readable accounts of religion that we have had in the past thirty years Not only does it provide a rich analysis of religious experience but he also includes much that has been overlooked by other interpreters of the world's religions Richard D Hecht coauthor of *The Sacred Texts of the World* **Fields of Faith** David F. Ford,Ben Quash,Janet Martin Soskice,2005-03-17 This 2005 book asks how will theology

and the religions be studied in higher education in the coming century

Manufacturing Otherness Sergio

Botta, 2014-01-14 The discovery of the New World offered European civilisation the chance to generate a process of circulation of its own cultural values the spiritual conquest that has no comparable precedents The missionary orders played an important role during this Westernisation of the world not only as key players in the spread of Christian values but also as mediators between different worlds Indeed missionary practices imposed the dominating culture's values and institutions on the vanquished peoples At the same time they also promoted the circulation of new knowledge and the negotiation between different cultures during the age of a global integration of space This book looks at the vast field of study concerning the history of missions from a specific viewpoint Firstly it focuses on local processes singling out specific case studies to be used for a general reflection On the other hand it refocuses the attention on the Indigenous cultures which the missionaries helped to bring to light in the field of Western history showing how they succeeded in entering the areas of negotiation created by missionaries and in producing their own cultural subjectivity
