Rembrandt History And Tech Of The Masters:

Monographic Exhibitions and the History of Art Maia Wellington Gahtan, Donatella Pegazzano, 2018-02-19 This edited collection traces the impact of monographic exhibitions on the discipline of art history from the first examples in the late eighteenth century through the present Roughly falling into three genres retrospectives of living artists retrospectives of recently deceased artists and monographic exhibitions of Old Masters specialists examine examples of each genre within their social cultural political and economic contexts Exhibitions covered include Nathaniel Hone's 1775 exhibition the Holbein Exhibition of 1871 the Courbet retrospective of 1882 Titian's exhibition in Venice Poussin's Louvre retrospective of 1960 and El Greco's anniversary exhibitions of 2014 **Rembrandt and His School** John Charles Van Dyke, 1923 Half-hour lectures on the history and practice of the fine and ornamental arts William Bell Scott, 1861 *The International Studio*, 1929 *Rembrandt/not Rembrandt in the Metropolitan Museum of Art: Paintings, drawings, and prints: art-historical perspectives* Hubertus von Sonnenburg, Walter A. Liedtke, Metropolitan Museum of Art (New York, N.Y.), 1995 *Rembrandt* Ernst van de Wetering, 1997 Rembrandt's paintings have been admired throughout centuries because of their artistic freedom But Rembrandt was also a craftsman whose painting technique was rooted in the tradition Rembrandt The Painter at Work is the result of a lifelong search for Rembrandt's working methods his intellectual approach to the art of painting and the way in which his studio functioned Ernst van de Wetering demonstrates how this knowledge can be used to tackle questions about authenticity and other art historical issues Approximately 350 illustrations half of which are reproduced in colour make this book into a monumental tribute to one of the world's most important painters The book is if one may be allowed to say such a thing about a serious scholarly work a gripping good read Christopher White The Burlington Magazine This is a very rich book a deeply felt analysis of an artist whom the author knows better than almost any other living scholar Christopher Brown Times Literary Supplement *A Corpus of Rembrandt Paintings VI* Ernst van de Wetering, 2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research

Project RRP was founded. In particular, he played an important role in developing new criteria for authentication. Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand. In this book, he re-attributes to the master a substantial number of unjustly rejected Rembrandts. He also was closely involved in the re-discovery of a considerable number of lost or completely unknown works by Rembrandt. The verdicts of earlier specialists, including the majority of members of the original RRP up to 1989, were based on connoisseurship, the self-confidence in one's ability to recognise a specific artist's style and hand. Over the years, Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time. In this book, he demonstrates the fallibility of traditional connoisseurship, especially in the case of Rembrandt, who was par excellence a searching artist. The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research. Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account. The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings, richly illustrated and annotated. For all the paintings re-attributed in this book, extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research. *Rembrandt's Paintings Revisited* is the concluding sixth volume of *A Corpus of Rembrandt Paintings* (Volumes I-V, 1982, 1986, 1989, 2005, 2010). It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968-69. At the same time, the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings. This work of art history and art research should belong in the library of every serious art historical institute, university or museum.

Analytical Chemistry for the Study of Paintings and the Detection of Forgeries Maria Perla Colombini, Ilaria Degano, Austin Nevin, 2022-09-08. Forgeries present a daunting problem to art historians, museums, galleries and curators who face challenges in determining the authenticity of paintings. Recent progress in science has led to the development of new methods for investigating works of art and can provide new insights into the materials found in paintings. The rise in the value of paintings together with the knowledge and skills of forgers highlights the need to develop reliable scientific procedures to identify fakes. Given the complexity of materials in paintings and the convergence of various disciplines, a methodological approach for investigations of paintings is based on art historical, curatorial, aesthetic, technical and scientific evaluation. In this book, sophisticated digital and analytical techniques are reviewed for the identification of materials, pigments, binders, varnishes, adhesives and the physical characteristics of paintings such as brushstrokes, craquelure and canvas weaves. This book presents an updated overview of both non-invasive and micro-invasive techniques that enable the

material characterization of paintings The materials constituting a painting are reviewed as are ways that changes in materials over time can provide insights into chronology and physical history State of the art digital methods including multi and hyper spectral imaging and computational approaches to data treatment will be presented Analytical techniques developed and optimized to characterize binders varnishes and pigments are reviewed focusing on materials which can provide information on ageing or provenance Case studies of applications of synchrotron based methods and the analysis of paintings are given as are chapters devoted to legal aspects related to authenticity Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)
