

The background of the cover is a teal-toned photograph. It depicts a coastal scene with a large, white-capped wave breaking in the middle ground. In the foreground, there are dark, silhouetted rocks or small waves. The background features a range of mountains under a cloudy sky. The overall mood is serene yet powerful.

Remembering Edward S. Casey, 1987-01-01 **Remembering Places** Janet Donohoe, 2014-06-18 This book is a phenomenological investigation of the interrelations of tradition memory place and the body Drawing upon philosophers such as Husserl Heidegger Merleau Ponty Gadamer and Ricoeur Janet Donohoe uses the idea of a palimpsest to argue that layers of the past are carried along as traditions through places and bodies such that we can speak of memory as being written upon place and place as being written upon memory In dialogue with theorists such as Jeff Malpas and Ed Casey Donohoe focuses on analysis of monuments and memorials to investigate how such deliberate places of collective memory can be ideological or can open us to the past and different traditions The insights in this book will be of particular value to place theorists and phenomenologists in disciplines such as philosophy geography memory studies public history and environmental studies Remembering to Perform Actions Michael J. DeVries, 1986 **Remembering the Personal Past** Bruce M. Ross, 1992-01-02 In this resonant scholarly work Bruce Ross presents an encompassing theoretical framework and overview of autobiographical memory Drawing on a wide range of ideas from academic psychology the social sciences psychoanalysis and the humanistic disciplines the author presents a stimulating and original perspective on this increasingly important topic Ross description encompasses the full range of subjective responsiveness to personal memories both with

and without awareness including real world social context and examples that can be compared with one's own experience critical assessment of psychoanalytic memory concepts with a clear distinction drawn between Freud's ideas and those of his later followers childhood memories dealt with from dual standpoints of initial origin and adult retrospection explanations of problems and dilemmas in philosophy and the human sciences that determine both what is to be counted as a memory experience and how memories can be validated and the phenomena of individual memories compared with characteristics of group determined memories and socially structured memories that persist across generations Cognizant of the rich intellectual history of the field the book also calls on the works of James Titchener Freud Piaget Baldwin Janet Bartlett Ellis Bergson Bloch Halbwachs and Merleau Ponty among others to broaden our current understanding of the experience of autobiographical memory Students and researchers from a number of disciplines concerned with the psychology of memory cognition and identity will find this volume both insightful and thought provoking

Remembering Violence Nicolas Argenti, Katharina Schramm, 2010 Psychologists have done a great deal of research on the effects of trauma on the individual revealing the paradox that violent experiences are often secreted away beyond easy accessibility becoming impossible to verbalize explicitly However comparatively little research has been done on the transgenerational effects of trauma and the means by which experiences are transmitted from person to person across time to become intrinsic parts of the social fabric With eight contributions covering Africa Central and South America China Europe and the Middle East this volume sheds new light on the role of memory in constructing popular histories or historiographies of violence in the absence of or in contradistinction to authoritative written histories It brings new ethnographic data to light and presents a truly cross cultural range of case studies that will greatly enhance the discussion of memory and violence across disciplines

Buried City, Unearthing Teufelsberg Benedict Anderson, 2017-07-06 Cities are built over the remnants of their past buried beneath their present We build on what has been built before whether over foundations formalising previous permanency or over the temporal occupations of ground But what happens when you shift a city when you dislodge its occupation of ground towards a new ground bury it and forget it Focusing on Berlin's destruction during World War II and its reconstruction after the end of the war this book offers a rethinking of how the practices of destruction and burial combine to reform the city through geography and how burying a city is intricately tied to forgetting destruction ruination and trauma Created from 25 million cubic meters of rubble produced during World War II Teufelsberg Devil's Mountain is the exemplar of the destroyed city Its critical journey is

chronicled in combination with Berlin's seven other rubble hills and their connections to constructing forgetting through burial. Furthermore, the book investigates Berlin's sublime relation to Albert Speer's urban vision to rival the ancient cities of Rome and Athens through their now shared geographies of seven hills. Finally, there is a central focus on the role of the citizens who cleared Berlin's streets of rubble and the subsequent human relationships between people and ruins. This book is valuable reading for those interested in Architectural Theory, Urban Geography, Modern History, and Urban Design. **The**

Collective Memory Reader Jeffrey K. Olick, Vered Vinitzky-Seroussi, Daniel Levy, 2011-01-21. In the last few decades, there are few concepts that have rivaled collective memory for attention in the humanities and social sciences. Indeed, use of the term has extended far beyond scholarship to the realm of politics and journalism, where it has appeared in speeches at the centers of power and on the front pages of the world's leading newspapers. Seen by scholars in numerous fields as a hallmark characteristic of our age, an idea crucial for understanding our present social, political, and cultural conditions, collective memory now guides inquiries into diverse though connected phenomena. Nevertheless, there remains a great deal of confusion about the meaning, origin, and implication of the term and the field of inquiry it underwrites. *The Collective Memory Reader* presents, organizes, and evaluates past work and contemporary contributions on collective memory. Combining seminal texts, hard-to-find classics, previously untranslated references, and contemporary landmarks, it will serve as a key reference in the field. In addition to a thorough introduction which outlines a useful past for contemporary memory studies, *The Collective Memory Reader* includes five sections: Precursors and Classics; History, Memory, and Identity; Power, Politics, and Contestation; Media and Modes of Transmission; Memory, Justice, and the Contemporary Epoch, comprising ninety-one texts. A short editorial essay introduces each of the sections, while brief capsules frame each of the selected texts. An indispensable guide, *The Collective Memory Reader* is at once a definitive entry point into the field for students and an essential resource for scholars. *American Continental Philosophy*, Walter Brogan, James Risser, 2000-07-22.
