Information Systems,1992 Geochemical Remote Sensing of the Sub-Surface M. Hale,2000-04-13 This volume documents
the techniques for geochemical remote sensing of the subsurface to present case history evidence of their successes and
limitations and to consider their further potential The chapters in Part I focus on the mechanisms and models of dispersion
that give rise to the patterns we attempt to detect Part II deals with the detection of dispersion patterns that owe their
origins to processes such as leakage that are allied to resource emplacement Part III describes the detection of dispersion
patterns that are generated by processes such as radiodecay and oxidation taking place in deposits after their emplacement
Every chapter brings a fresh perspective Radon has met with much success in uranium exploration whilst thorough research
studies on helium and mercury lead to conclusions that tend to discourage use of these gases in mineral exploration The case
for light hydrocarbons is one of compelling simplicity whilst elaborate mathematical and electrochemical models are
