The Future of Training in Psychotherapy and Counselling John Rowan, 2014-02-25

The Future of Training in Psychotherapy and Counselling presents a revealing and stimulating account of the current state of training that demonstrates how training will have to adapt if it is to successfully meet the needs and challenges of the future. In an attempt to look afresh at the whole question of training, John Rowan proposes that there are three ways of doing therapy and any examination of training has to consider each of these: the instrumental where the main emphasis is on the treating the client or patient; the authentic way where the main emphasis is on meeting the client or patient; the transpersonal way where main emphasis is on linking with the client in a more personal way. Each approach makes different assumptions about the self, about the relationship and about the level of consciousness involved in doing therapy. By challenging the basic precepts of traditional training, John Rowan encourages the reader to reconsider subjects including the difference between counselling and psychotherapy, culture and ethics, the origins of disturbance in clients and child development. *The Future of Training in Psychotherapy and Counselling* provides a much needed new perspective that will compel all psychotherapists and counsellors to take a closer look at training in the field.

Handbook of Professional and Ethical Practice for Psychologists, Counsellors and Psychotherapists Rachel Tribe, Jean Morrissey, 2004-11

Closer regulation of psychological counselling means that an awareness of the professional, legal and ethical considerations is vital. *The Handbook of Professional and Ethical Practice* brings together leading therapists and psychologists who have a wealth of knowledge and experience of their subjects. Each chapter places particular emphasis on the current codes of practice and ethical principles underpinning safe ethical practice and the implications for practitioners. Comprehensive coverage of the legal, clinical and ethical considerations involved in research and training is provided and the reflective questions at the end of every chapter serve to prompt further discussion of the issues. The following subjects are covered: professional practice and ethical considerations; legal considerations and responsibilities; clinical considerations and responsibilities; working with diversity; professional practice and ethical considerations; research, supervision and training. This innovative Handbook provides a supportive guide to the major professional, legal and ethical issues encountered by trainees on counselling, clinical psychology and psychotherapy courses, as well as providing an invaluable resource for more experienced therapists and other members of the helping professions.

Imagining Animals Caroline Case, 2025-07-30

This classic edition of *Imagining Animals* explores how the making of animal images in art therapy and child psychotherapy can act as a powerful catalyst for children who may be struggling with communication. Readers will benefit from learning about the different ways that animal symbolism can support autistic children and children navigating trauma, abuse and depression in engaging with the therapeutic process. This essential book explores two contrasting primitive states of mind throughout the investing of the world around us with life through animism and participation mystique and the lifeless world in the states of mind.
