Representation Meaning And Thought:

Representation, Meaning, and Thought Grant Gillett, 1992 This study examines the relationship between thought and language by considering the views of Kant and the later Wittgenstein along with many strands of contemporary debate in the area of mental content Building on an analysis of the nature of concepts and conceptions of objects Gillett provides an account of psychological explanation and the subject of experience offers a novel perspective on mental representation and linguistic meaning looks at the difficult topics of cognitive roles and singular thought and concludes with an outline of certain considerations relevant to skeptical arguments and the nature of perception The resulting synthesis demonstrates interesting correlations with current work in cognitive and developmental psychology and is directly relevant to continuing work in epistemology philosophy of mind and philosophical psychology

Reference and Representation in Thought and Language María Ponte, Kępa Korta, 2017 This volume offers novel views on the precise relation between reference to an object by means of a linguistic expression and our mental representation of that object long a source of debate in the philosophy of language linguistics and cognitive science Chapters in this volume deal with our devices for singular reference and singular representation with most focusing on linguistic expressions that are used to refer to particular objects persons or places These expressions include proper names such as Mary and John indexicals such as I and tomorrow demonstrative pronouns such as this and that and some definite and indefinite descriptions such as The Queen of England or a medical doctor Other chapters examine the ways we represent objects in thought particularly the first person perspective and the self and one explores a notion common to reference and representation salience The volume includes the latest views on these complex topics from some of the most prominent authors in the field and will be of interest to anyone working on issues of reference and representation in thought and language

Representation and Objects of Thought in Medieval Philosophy Henrik Lagerlund, 2016-04-08 The notions of mental representation and intentionality are central to contemporary philosophy of mind and it is usually assumed that these notions if not originated at least were made essential to the philosophy of mind by Descartes in the seventeenth century The authors in this book challenge this assumption and show that the history of these ideas can be traced back to the medieval period In bringing out the contrasts and similarities between early modern and medieval discussions of mental representation the authors conclude that there is no clear dividing line between western late medieval and early modern philosophy that they in fact represent one continuous tradition in the philosophy of mind

The Nature of Thought Wayne L. Wessman, 2007 The Nature of Thought Maturity of Mind addresses the lack of physical maturation of the brain throughout the last 10 000 years of human evolution which has resulted in an immaturity of thought throughout history to the present day With an offering of working definitions for many new terms scholars have invented to deal with the issue this work explores the ideal of a fundamental integrity of thought and a maturity of mind which is classless and upholds truth and reality to further the development of civilization

Representation in Mind Hugh

Clapin, Phillip Staines, Peter Slezak, 2004-06-04 Representation in Mind is the first book in the new series Perspectives on Cognitive Science and includes well known contributors in the areas of philosophy of mind psychology and cognitive science The papers in this volume offer new ideas fresh approaches and new criticisms of old ideas The papers deal in new ways with fundamental questions concerning the problem of mental representation that one contributor Robert Cummins has described as THE problem in philosophy of mind for some time now The editors introductory overview considers the problem for which mental representation has been seen as an answer sketching an influential framework outlining some of the issues addressed and then providing an overview of the papers Issues include the relation between mental representation and public non mental representation misrepresentation the role of mental representations in intelligent action the relation between representation and consciousness the relation between folk psychology and explanations invoking mental representations

Logos of Phenomenology and Phenomenology of The Logos. Book Three Anna-Teresa Tymieniecka, 2006-07-19 Situated at the crossroads of nature and culture physics and consciousness cosmos and life history intimately conjoined with time continues to puzzle the philosopher as well as the scientist Does brute nature unfold a history Does human history have a telos Does human existence have a purpose Phenomenology of life projects a new interrogative system for reexamining these questions We are invited to follow the logos of life as it spins in innumerable ways the interplay of natural factors human passions social forces science and experience through interruptions and kairic moments of accomplishment in the human creative imagination and intellectual reasoning There then run a cohesive thread of reality **The Biological Mind** Justin Garson, 2014-10-17 For some biology explains all there is to know about the mind Yet many big questions remain is the mind shaped by genes or the environment If mental traits are the result of adaptations built up over thousands of years as evolutionary psychologists claim how can such claims be tested If the mind is a machine as biologists argue how does it allow for something as complex as human consciousness The Biological Mind A Philosophical Introduction explores these questions and more using the philosophy of biology to introduce and assess the nature of the mind Drawing on the four key themes of evolutionary biology molecular biology and genetics neuroscience and biomedicine and psychiatry Justin Garson addresses the following key topics moral psychology altruism and levels of selection evolutionary psychology and modularity genes environment and the nature nurture debate neuroscience reductionism and the relation between biology and free will function selection and mental representation psychiatric classification and the maladapted mind Extensive use of examples and case studies is made throughout the book and additional features such as chapter summaries annotated further reading and a glossary make this an indispensable introduction to those teaching philosophy of mind and philosophy of psychology It will also be an excellent resource for those in related fields such as biology Representation Stuart Hall, 1997-04-08 This broad ranging text offers a comprehensive outline of how visual images language and discourse work as systems of representation Individual chapters explore representation as a signifying practice in a rich diversity of social contexts and

Thought's Footing Charles Travis,2009-03-19 Thought's Footing is an enquiry into the relationship between the ways things are and the way we think and talk about them It is also a study of Wittgenstein's Philosophical Investigations Charles Travis develops his account of certain key themes into a unified view of the work as a whole His methodological starting point is to see Wittgenstein's work as a response to Frege's The central question is how does thought get its footing How can the thought that things are a certain way be connected to things being that way Wittgenstein departs from Frege in holding that there are indefinitely many ways of filling out giving content to the notion of truth The truth of a thought or utterance is connected with the consequences of thinking or saying it That is the point of Wittgenstein's introduction of the notion of a language game The second key theme is this a representation of things as being a certain way cannot take the right form for truth bearing without a background of agreement in judgements its form must belong to thinkers of a given kind The third key theme is that the proprietary perceptions of a given sort of thinker as to what would be a case of judging when there is a particular way for things to be is not subject to criticism from outside it Along the way Travis gives his own distinctive take on such topics as the problem of singular thought the notion of a proposition rule following sense and nonsense the possibility of private language and the representational content of experience The result is an original and stimulating demonstration of the continuing value of Wittgenstein's work for central debates in philosophy today *Heidegger with Derrida* Dror Pimentel,2019-01-09 Heidegger with Derrida Being Written attempts for the first time to think Heidegger's philosophy through the lens of Derrida's logocentric thesis according to which speech has throughout the history of metaphysics been given primacy over writing The book offers a detailed account of Derrida's arguments about the debasement of writing an account that leads to a new definition of writing conceiving it epistemically rather than linguistically Heidegger's analysis of the gaze and critique of the modern subject are shown to have logocentric features This surprising conclusion entails that Heidegger is well within the metaphysical tradition which he labored so intently to overcome The book sheds new light on the philosophical roots of Heidegger's involvement with Nazism arguing that his hierarchical thinking the hallmark of logocentrism and metaphysics condones violent differentiation between the proper race and the Other
