of Italy Greece Germany and Austria but also discovers impressive and overlooked work in Slovenia Bosnia Hungary Finland Norway and the Netherlands in this book that ranges over nearly all of Europe including Russia While providing this stimulating and far ranging critical panorama Taylor brings to light key themes of European writing the depth of everyday life the quest of the thing in itself metaphysical aspiration and anxiety the dialectics of negativity and affirmation subjectivity and self effacement and uprootedness as a category that is as ontological as it is geographical historical political or cultural The book pays careful attention to the intersection of writing and history or politics as several poets featured here have faced the Second World War the Holocaust Communism the fall of Communism or the war in the former Yugoslavia Taylor gives the work of renowned upcoming and still little known poets a thorough look all the while scrutinizing recent translations of their verse He highlights several poets who are also masters of the prose poem He includes a few novelists who have fashioned a particularly original kind of poetic prose that stylistic category that has proved so difficult for critics to define Into the Heart of European Poetry should be of immediate interest to any reader curious about the aesthetic and philosophical ideas underlying major trends of contemporary European writing In a day and age when much too little is translated and thus known about foreign literature and when Europeans themselves are pondering the common denominators of their own culture this book is as indispensable as it is engaging

**A Century of Genocide** Eric D. Weitz, 2015-04-27 Why did the twentieth century witness unprecedented organized genocide Can we learn why genocide is perpetrated by comparing different cases of genocide Is the Holocaust unique or does it share causes and features with other cases of state sponsored mass murder Can genocide be prevented Blending gripping narrative with trenchant analysis Eric Weitz investigates four of the twentieth century s major eruptions of genocide the Soviet Union under Stalin Nazi Germany Cambodia under the Khmer Rouge and the former Yugoslavia Drawing on historical sources as well as trial records memoirs novels and poems Weitz explains the prevalence of genocide in the twentieth century and shows how and why it became so systematic and deadly Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world race and nation He demonstrates how in each of the cases a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies In moments of intense crisis these states targeted certain national and racial groups believing that only the annihilation of these enemies would enable the dominant group to flourish And in each instance large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin Hitler Pol Pot and Milosevic A controversial and richly textured comparison of these four modern cases it identifies the social and political forces that produce genocide
