Requirements Engineering for Software and Systems Phillip A. Laplante,2017-10-24 Solid requirements engineering has increasingly been recognized as the key to improved on time and on budget delivery of software and systems projects This textbook provides a comprehensive treatment of the theoretical and practical aspects of discovering analyzing modeling validating testing and writing requirements for systems of all kinds with an intentional focus on software intensive systems It brings into play a variety of formal methods social models and modern requirements for writing techniques to be useful to the practicing engineer This book was written to support both undergraduate and graduate requirements engineering courses Each chapter includes simple intermediate and advanced exercises Advanced exercises are suitable as a research assignment or independent study and are denoted by an asterisk Various exemplar systems illustrate points throughout the book and four systems in particular a baggage handling system a point of sale system a smart home system and a wet well

pumping system are used repeatedly These systems involve application domains with which most readers are likely to be familiar and they cover a wide range of applications from embedded to organic in both industrial and consumer implementations Vignettes at the end of each chapter provide mini case studies showing how the learning in the chapter can be employed in real systems Requirements engineering is a dynamic field and this text keeps pace with these changes Since the first edition of this text there have been many changes and improvements Feedback from instructors students and corporate users of the text was used to correct expand and improve the material This third edition includes many new topics expanded discussions additional exercises and more examples A focus on safety critical systems where appropriate in examples and exercises has also been introduced Discussions have also been added to address the important domain of the Internet of Things Another significant change involved the transition from the retired IEEE Standard 830 which was referenced throughout previous editions of the text to its successor the ISO IEC IEEE 29148 standard

Handbook of Research on Emerging Advancements and Technologies in Software Engineering Ghani, Imran,Kadir, Wan Mohd Nasir Wan,Ahmad, Mohammad Nazir,2014-04-30 Advanced approaches to software engineering and design are capable of solving complex computational problems and achieving standards of performance that were unheard of only decades ago Handbook of Research on Emerging Advancements and Technologies in Software Engineering presents a comprehensive investigation of the most recent discoveries in software engineering research and practice with studies in software design development implementation testing analysis and evolution Software designers architects and technologists as well as students and educators will find this book to be a vital and in depth examination of the latest notable developments within the software engineering community

A Process-Centric View on Predictive Maintenance and Fleet Prognostics. Development of a Process Reference Model and a Development Method for Fleet Prognostics to Guide Predictive Maintenance Projects Carolin Wagner,2022-08-12 In the age of digitalization and the fourth industrial revolution predictive maintenance is becoming increasingly important as a proactive maintenance type Despite the economic benefits that predictive maintenance generates for companies its practical application is still in its early stages This is often due to two prevailing challenges First there is a deficiency of knowledge about predictive maintenance and its concrete realization Second there is a lack of high quality and rich data of historical machine failures To increase the representativeness of data data from several similar machines i e a fleet should be considered To foster the effective implementation of predictive maintenance supportive guidance in the realization of a predictive maintenance project is needed For this reason this dissertation presents a process reference model and a development method for fleet prognostics The process reference model describes a comprehensive and application independent view of the complete predictive maintenance process The model is supplemented by the fleet prognostic development method To address the specific characteristics of the fleet a systematic process is depicted which provides a means to assess the heterogeneity of the fleet from a data driven perspective and simplifies the design of an algorithm

considering fleet data Finally the applicability and value of the research results are demonstrated with three industrial cases

The Executive's Guide to Information Technology John Baschab,Jon Piot,2007-07-13 Praise for the The Executive s Guide to Information Technology This book is important reading It offers practical real world insight and pragmatic no nonsense approaches for people who have a stake in corporate IT Lynda Applegate Henry R Byers Professor of Business Administration Harvard Business School Information systems and processes are very important parts of our due diligence assessment of a company yet the jargon is often more difficult to understand than many foreign languages Baschab and Piot effectively translate IT into words and concepts that businesspeople can easily understand and act upon This book is a helpful reference guide for corporate executives and private equity groups of all types Neal Aronson Managing Partner Roark Capital Group Business success increasingly depends on effective use of IT Effective use of IT depends on the kind of in depth practical insight in this book Baschab and Piot provide a pragmatic approach to information systems investment that should be required reading for senior executives and CIOs alike Erik Brynjolfsson Schussel Professor of Management Director of the Center for Digital Business MIT This book should provide valuable guidance for management and technology consultants The Executive s Guide to Information Technology provides field proven insight on all important aspects of IT planning and execution from governance to applications to operations and infrastructure Gary J Fernandes former vice chairman EDS member of the Board of Directors Computer Associates Baschab and Piot do a great job of laying out the fundamental issues and challenges that every IT organization faces More often than not the issues are not technical in nature but are a reflection of how the IT and business teams work together to define execute and implement new business tools The threshold issue is leadership Often it is difficult for business leaders to feel that they have the skills and perspective to provide that leadership on technical projects The Executive s Guide to Information Technology provides non technical business leaders a solid framework for engaging with their IT peers Tom Nealon Chief Information Officer J C Penney

Enterprise SOA Dirk Krafzig,Karl Banke,Dirk Slama,2005 Learn to apply the significant promise of SOA to overcome the formidable challenges of distributed enterprise development Data Model Patterns: A Metadata Map David C. Hay,2010-07-20 Data Model Patterns A Metadata Map not only presents a conceptual model of a metadata repository but also demonstrates a true enterprise data model of the information technology industry itself It provides a step by step description of the model and is organized so that different readers can benefit from different parts It offers a view of the world being addressed by all the techniques methods and tools of the information processing industry for example object oriented design CASE business process re engineering etc and presents several concepts that need to be addressed by such tools This book is pertinent with companies and government agencies realizing that the data they use represent a significant corporate resource recognize the need to integrate data that has traditionally only been available from disparate sources An important component of this integration is management of the metadata that describe catalogue and provide access to the

various forms of underlying business data The metadata repository is essential to keep track of the various physical components of these systems and their semantics The book is ideal for data management professionals data modeling and design professionals and data warehouse and database repository designers A comprehensive work based on the Zachman Framework for information architecture encompassing the Business Owner s Architect s and Designer s views for all columns data activities locations people timing and motivation Provides a step by step description of model and is organized so that different readers can benefit from different parts Provides a view of the world being addressed by all the techniques methods and tools of the information processing industry for example object oriented design CASE business process re engineering etc Presents many concepts that are not currently being addressed by such tools and should be **Data Modeling**

Essentials Graeme Simsion,Graham Witt,2004-12-03 Data Modeling Essentials Third Edition covers the basics of data modeling while focusing on developing a facility in techniques rather than a simple familiarization with the rules In order to enable students to apply the basics of data modeling to real models the book addresses the realities of developing systems in real world situations by assessing the merits of a variety of possible solutions as well as using language and diagramming methods that represent industry practice This revised edition has been given significantly expanded coverage and reorganized for greater reader comprehension even as it retains its distinctive hallmarks of readability and usefulness Beginning with the basics the book provides a thorough grounding in theory before guiding the reader through the various stages of applied data modeling and database design Later chapters address advanced subjects including business rules data warehousing enterprise wide modeling and data management It includes an entirely new section discussing the development of logical and physical modeling along with new material describing a powerful technique for model verification It also provides an excellent resource for additional lectures and exercises This text is the ideal reference for data modelers data architects database designers DBAs and systems analysts as well as undergraduate and graduate level students looking for a real world perspective Thorough coverage of the fundamentals and relevant theory Recognition and support for the creative side of the process Expanded coverage of applied data modeling includes new chapters on logical and physical database design New material describing a powerful technique for model verification Unique coverage of the practical and human aspects of modeling such as working with business specialists managing change and resolving conflict *Transforming Acquisitions and Collection Services* Michelle Flinchbaugh,Chuck Thomas,Rob Tench,2019-09-15 This book explores ways in which libraries can reach new levels of service quality and efficiency while minimizing cost by collaborating in acquisitions In consortial acquisitions a number of libraries work together usually in an existing library consortia to leverage size to support acquisitions in each individual library In cross functional acquisitions acquisitions collaborates to support other library functions For the library acquisitions manager technical services manager or the library director awareness of different options for effective consortial and cross functional acquisitions allows for the optimization of staff and resources to reach

goals This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each By supporting each other s acquisitions services in a consortium libraries leverage size to get better prices and share systems and expertise to maximize resources while minimizing costs Within libraries the acquisitions function can be combined with other library functions in a unit with more than one purpose or acquisitions can develop a close working relationship with another unit to support their work This book surveys practice at different libraries and at different library consortia and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium and how they work with other library units specifically collection management cataloging interlibrary loan and the digital repository in the form of case studies A final section of the book covers fundamentals of collaboration

Knowledge-Based Intelligent Information and Engineering Systems Rajiv Khosla, 2005-08-25 Dear delegates friends and members of the growing KES professional community welcome to the proceedings of the 9th International Conference on Knowledge Based and Intelligent Information and Engineering Systems hosted by La Trobe University in Melbourne Australia The KES conference series has been established for almost a decade and it continues each year to attract participants from all geographical areas of the world including Europe the Americas Australasia and the Pacific Rim The KES conferences cover a wide range of intelligent systems topics The broad focus of the conference series is the theory and applications of intelligent systems From a pure research field intelligent systems have advanced to the point where their abilities have been incorporated into many business and engineering application areas KES 2005 provided a valuable mechanism for delegates to obtain an extensive view of the latest research into a range of intelligent systems algorithms tools and techniques The conference also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas The combination of theory and practice represented a unique opportunity to gain an appreciation of the full spectrum of leading edge intelligent systems activity The papers for KES 2005 were either submitted to invited sessions chaired and organized by respected experts in their fields or to a general session managed by an extensive International Program Committee or to the Intelligent Information Hiding and Multimedia Signal Processing IIHMSP Workshop managed by an International Workshop Technical Committee
