Lord, Douglas J. Brown, 2003-09-12 Presenting a follower centered perspective on leadership this book focuses on followers as the direct determinant of leadership effects because it is generally through follower reactions and behaviors that leadership attempts succeed or fail Therefore leadership theory needs to be articulated with a theory of how followers create meaning from leadership acts and how this meaning helps followers self regulate in specific contexts In this book an attempt is made to develop such a theory maintaining that the central construct in this process is the self identity of followers In developing this theoretical perspective the authors draw heavily from several areas of research and theory The most critical constructs do not come directly from the leadership literature but from social and cognitive theory pertaining to follower s self identity self regulatory processes motivation values cognitions and emotions and perceptions of social justice Leaders may have profound effects on these aspects of followers and it is by analyzing such indirect follower mediated leadership effects that most ideas regarding leadership theory and practice are developed Due to its broad theoretical focus this book is relevant to a number of audiences The authors principal concern is with the development of leadership theory and the practice of leadership making the book relevant to audiences in management applied psychology and social psychology They have tried to clearly define key constructs and provide practical examples so that the book could be accessible to advanced undergraduate students However the diversity of the underlying theoretical literatures and the complexity of the framework developed also make the book appropriate for graduate courses in those disciplines and for readers with a professional interest in leadership theory or practice [Global Encyclopedia of Public Administration, Public Policy, and Governance](#) Ali Farazmand, 2023-04-05 This global encyclopedic work serves as a comprehensive collection of global scholarship regarding the vast fields of public administration public policy governance and management Written and edited by leading international scholars and practitioners this exhaustive resource covers all areas of the above fields and their numerous subfields of study In keeping with the multidisciplinary spirit of these fields and subfields the entries make use of various theoretical empirical analytical practical and methodological bases of knowledge Expanded and updated the second edition includes over a thousand of new entries representing the most current research in public administration public policy governance nonprofit and nongovernmental organizations and management covering such important sub areas as 1 organization theory behavior change and development 2 administrative theory and practice 3 Bureaucracy 4 public budgeting and financial management 5 public economy and public management 6 public personnel administration and labor management relations 7 crisis and emergency management 8 institutional theory and public administration 9 law and regulations 10 ethics and accountability
