Maloney, 2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been

omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of West European Politics

Idaho Politics and

Government Jasper M. LiCalzi, 2019 Examining politics in Idaho through the lens of ideology i.e. conservative versus liberal or partisanship i.e. Democrat versus Republican does not illuminate the more fundamental dynamics of the state's political environment Unlike other states that are divided on partisan or traditional ideological lines Idaho tends to be divided between its libertarian and communitarian visions of the role of government and the place of the individual in society In *Idaho Politics and Government* Jasper M. LiCalzi examines the complex world of Idaho politics where morality dominates but a heartily libertarian strain of individualism keeps lawmakers from falling into the liberal versus conservative dialogue prevalent in other states After opening with the ultrasound bill failure as a recent example of Idaho's political culture LiCalzi traces the influence of individuals and party factions from the 1960s through the present before moving on to the inner workings of government itself with all its institutions and extra governmental extensions He closes with another recent Idaho bill concerning the topics of child support and Sharia Islamic law giving readers yet another glimpse of the workings of Idaho politics and the continuing clash between the community and the individual Presenting a continuum of political views from an emphasis on the individual personified by Thomas Jefferson to a focus on community personified by Alexander Hamilton LiCalzi provides a new method for understanding political actions and situations in Idaho

The Oxford Companion to Comparative Politics Joel Krieger, 2013. The two-volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit. Comparativists apply various theories and concepts to analyze the similarities and differences between political units, using the results of their research to develop causalities and generalizations. Each of these theories and outcomes are thoroughly defined in the Companion, as are major resultant conclusions, those comparativists who have influenced the field in significant ways, and politicians whose administrations have shaped the evaluation of contrasting governments. Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set, while over 100 new entries would thoroughly examine the field in a lasting, more theoretical than current event-based way. New entries cover such topics as failed states, Grand Strategies and Soft Power. Important updates include such countries as China and

Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists
