Research Interviewing Context And Narrative:

Research Interviewing Elliot George MISHLER, Elliot George Mishler, 2009-06-30 Interviews hold a prominent place among the various research methods in the social and behavioral sciences This book presents a powerful critique of current views and techniques and proposes a new approach to interviewing At the heart of Elliot Mishler's argument is the notion that an interview is a type of discourse a speech event it is a joint product shaped and organized by asking and answering questions This view may seem self evident yet it does not guide most interview research In the mainstream tradition the discourse is suppressed Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech questions and the interviewer's behavior are standardized so that all respondents will receive the same stimulus respondents social and personal contexts of meaning are ignored While many researchers now recognize that context must be taken into account the question of how to do so effectively has not been resolved This important book illustrates how to implement practical alternatives to standard interviewing methods Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews Mishler shows how interviews can be analyzed and interpreted as narrative accounts He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice The respondents themselves he believes should be granted a more extensive role as participants and collaborators in the research process The book is an elegant work of synthesis clearly and persuasively written and supported by concrete examples of both standard interviewing and alternative methods It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool [The SAGE Handbook of Interview Research](#) Jaber F. Gubrium, 2012-02-14 The complete handbook on interviewing the Second Edition deals with conceptual and methodological challenges to interviewing in addition to the nuts and bolts of the interview process

Narrative Matters in Medical Contexts across Disciplines Franziska Gygax, Miriam A. Locher, 2015-03-13 This collection of original chapters gives center stage to the concept of narrative in medical contexts The contributors come from the disciplines of literary and cultural studies linguistics psychology and medicine and work with texts as diverse as autobiographies graphic novels Renaissance medical treatises and reports short stories reflective writing creative writing and online narratives The interdisciplinary dialogue shows the richness and scope of the concept narrative and demonstrates how crucial it is for practices in the medical context as well as in the contributing disciplines The collection raises awareness of the great variety and multivocality of narratives on the experience of illness besides paying heed to the many different positions and angles from which these narratives can be perceived read and analyzed The wide range of approaches assembled in this collection provides a comprehensive view on illness and health and on the multiple ways in which they are represented in narrative **The Discursive Interview** Carsten G. Ullrich, 2022-09-17 This book deals with the Discursive Interview a qualitative interview method originally developed for the recording and reconstruction of social patterns of

interpretation The central methodological assumptions are explained and all methodological steps of this comprehensive research method are outlined in particular sampling guideline development interviewing reconstructive analysis typing quality assurance Particular emphasis is placed on the role of questions and questioning techniques because these are of central importance for uncovering patterns of interpretation The content Interpretive patterns and interpretive pattern analysis Theoretical and methodological basic assumptions of the discursive interview Data collection with discursive interviews On the evaluation of discursive interviews Quality assurance with the discursive interview The author Dr Carsten G Ullrich holds the professorship for methods of qualitative social research at the Faculty of Education at the University of Duisburg Essen Narrative Methods for the Human Sciences Catherine Kohler Riessman, 2008 Cathy Riessman is the leading figure in narrative research and her new book is a delight Covering basic issues of transcription and research credibility as well as visual data and engagingly written it is a goldmine for students and researchers alike If we want to make narrative research serious and revealing it is to this book that we should turn David Silverman Professor Emeritus Goldsmiths College University of London Narrative Methods for the Human Sciences provides an accessible framework for researchers to analyse narrative texts with confidence empathy and humility NARRATIVE INQUIRY This is a terrific book Cathy Riessman has an encyclopedic knowledge of this field and of the participants in it This breadth and depth of knowledge is abundantly clear throughout the book Susan Bell Bowdoin College This book has been a great source of inspiration to me and my students not only for its methodological clarity but also for the spirit of social activism it engenders Ian Baptiste The Pennsylvania State University Narrative Methods for the Human Sciences is an essential starting point for both students and experienced researchers interested in using narrative analysis in applied or other contexts Written with admirable clarity an engaging style and supported by detailed examples of analysis the book outlines the main methodological issues and approaches within the exciting and fast developing field of narrative research Even researchers already familiar with narrative methods should find the presentation of thematic structural dialogic performance and visual forms of analysis a fruitful stimulus to new research endeavours Brian Roberts University of Central Lancashire U K I just had to thank you for paving the path for us new and hopeful narrative researchers I have been a student of both your books on narrative analysis and want to thank you for your guidance from your work and also your latest book Narrative Methods for the Human Sciences This work and the references you have chosen for us have helped me immensely during this time in my doctoral program especially as I enter into the analysis phase Maria T Yelle nursing doctoral candidate University of Wisconsin Madison Narrative Methods for the Human Sciences provides a lively overview of research based on constructing and interpreting narrative Designed to improve research practice it gives a detailed discussion of four analytic methods that students can adapt Author Catherine Kohler Riessman explains how to conduct the four kinds of narrative analysis using model studies from sociology anthropology psychology education and nursing Throughout the book she compares different

approaches including thematic analysis structural analysis dialogic performance analysis and visual narrative analysis The book helps students confront specific issues in their research practice including how to construct a transcript in an interview study complexities of working with materials translated from another language defining narrative segments relating text and context locating oneself as the researcher in a responsible way in an inquiry and arguing for the credibility of the case based approach Broad in scope Narrative Methods for the Human Sciences also offers concrete guidance in individual chapters for students and established scholars wanting to join the narrative turn in social research Key Features Focuses on four particular methods of narrative analysis This text provides specific diverse exemplars of good narrative research as practiced in several social science and human service disciplines Offers guidance for narrative interviewing The author discusses the complexities between spoken language and any written transcript In the process she encourages students to be mindful of the texts they construct from dialogues among speakers Presents arguments about validation in case based research Riessman presents several ways to think about credibility in narrative studies contextualizing validity in relation to epistemology and theoretical orientation of a study Explores the differences between grounded theory methods and narrative analysis The author clarifies distinctions between inductive thematic coding in grounded theory and other interpretive approaches and narrative analysis Presents social linguistic methods for analyzing oral narrative This text makes the approach accessible to readers not trained in social linguistics in part by providing rich examples from a number of different disciplines in the social and behavioral sciences Employs visual methods of analysis Riessman takes narrative research beyond the spoken or written texts by showing how exemplary researchers have connected participants words and images made during the research process She also discusses other research that incorporates found images in archives in a narrative inquiry This text is designed as a supplement to the qualitative research course taught in graduate departments across the social and behavioral sciences and as a core book in the narrative course

The Invisible Wounded Warriors in a Nation at Peace Jan Grimell, 2022-02-11 Although there has not been war in Swedish territory for many years this does not mean that the country has no veterans who have experienced the challenges of war zone deployments or suffer from combat trauma The Invisible Wounded Warriors in a Nation at Peace gives a rare look at the international operations of the Swedish military while offering the reader a unique and deeper understanding of life with PTSD The book uses terms such as moral injury to further describe the complexity Complex PTSD after deployment in a conflict zone is a uniquely complicated web of problems that can have medical psychological moral existential and spiritual dimensions The book discusses what this might mean from an identity and pastoral care perspective Jan Grimell is a postdoctoral researcher at the Department of Sociology at Uppsala University He has also conducted postdoctoral research in spiritual care at the Unit for Research and Analysis within the Church of Sweden He is affiliated with Linnaeus University and the Amsterdam Centre for the Study of Lived Religion at Vrije Universiteit

Postmodern Interviewing Jaber F. Gubrium, 2003-03-21 Interview roles are less clear

than they once were and in some cases the roles are even exchanged to promote new opportunities for understanding the shape and evolution of selves and experience Postmodern Interviewing offers readers an exploration of the postmodern interview a conversation with diverse purposes in which the communicative format is constructed as much within the interview conversation as it stems from predesignated research interests It provides cutting edge discussions of emerging horizons featuring reflexivity poetics and power along with discussions of new ways of gathering experiential knowledge Employing concepts from anthropology family studies history and sociology the contributors present the ambitious new directions in which the interview has gone such as How the interview process is refracted through the lens of language knowledge culture and difference How the dividing line between fact and fiction is blurred to promote richer understanding How standardized representation has given way to representational invention By exploring these exciting developments readers will be exposed to the engaging opportunities for understanding the shape and evolution of selves and social worlds that are made possible through changes in the interview process This volume is comprised of chapters from the Handbook of Interview Research Gubrium and Holstein SAGE 2001 The companion volume Inside Interviewing SAGE 2003 is also comprised of chapters from the Handbook The SAGE Handbook of Qualitative Data Analysis Uwe Flick, 2013-12-18 The wide range of approaches to data analysis in qualitative research can seem daunting even for experienced researchers This handbook is the first to provide a state of the art overview of the whole field of QDA from general analytic strategies used in qualitative research to approaches specific to particular types of qualitative data including talk text sounds images and virtual data The handbook includes chapters on traditional analytic strategies such as grounded theory content analysis hermeneutics phenomenology and narrative analysis as well as coverage of newer trends like mixed methods reanalysis and meta analysis Practical aspects such as sampling transcription working collaboratively writing and implementation are given close attention as are theory and theorization reflexivity and ethics Written by a team of experts in qualitative research from around the world this handbook is an essential compendium for all qualitative researchers and students across the social sciences *Narrative Analysis* Catherine Kohler Riessman, 2022-05-06 Recipient of the 1994 Critics Choice Award from the American Educational Studies Association People tell stories to help organize and make sense of their lives In the past their narratives have often been torn apart by social scientists looking for themes variables and specific answers to specific questions But in recent years the development of narrative analysis has given life to the study of the narrative as a form of information for social research Why are they constructed as they are How does one dissect a narrative to understand the lived experience of the narrator What steps can the researcher take to translate these tales and life stories into usable research Catherine Kohler Riessman provides a detailed primer on the use of narrative analysis its theoretical underpinnings and worldview and the methods it uses Replete with examples and transcriptions from previous narrative studies Narrative Analysis is a useful introduction to this growing body of literature Doing Interviews Steinar Kvale, 2012-08-14

Interviewing is an invaluable tool for the qualitative researcher Steinar Kvale provides coverage of both the theoretical background and the practical aspects of the interview process incorporating discussion of the wide variety of methods in interview based research and the different approaches to reading the data Consideration is also given to the crucial issue of how to ensure scientific rigour

Contextualising Narrative Inquiry Sheila Trahar, 2013-04-02 Narrative inquiry is growing in popularity as a research methodology in the social sciences medicine and the humanities In narrative inquiry the transparency of interactions between researcher and research participants together with rich contextual descriptions help to shape and structure research texts rendering them

engaging and readable Contextualising Narrative Inquiry argues that all researchers should foreground the importance of the context in which research takes place and develop methodological approaches that are grounded in their local contexts To do so they need to pay attention to how knowledge is constructed shared and understood in those contexts This is particularly important when contexts have been subjugated historically through colonialism and when local indigenous ways of knowing have been ignored or dismissed The contributors to this edited collection have all used narrative inquiry for a range of topics and in a range of contexts including Leadership styles of Asian women The Deaf community in the UK Voluntary celibacy in Malta Administrators in Ghanaian higher education Multiculturalism in primary education in Cyprus Teacher identities in Hong Kong The reflective practitioner in higher education in Malaysia The diversity of the topics illuminates the potential for narrative inquiry to be used to investigate a broad range of issues in many contexts by people with a wide range of backgrounds A common thread throughout is a reflexive discussion of how each contributor used narrative inquiry as a methodological approach highlighting not only its affordances but also the complexities of using it in specific cultural social and historical contexts Working with Qualitative Data William Gibson, William J. Gibson, Andrew Brown, 2009-06-04 This title provides a practical and accessible introduction to developing and applying strategies for the analysis of qualitative data by exploring the ways in which analysis is related to all aspects of research

The Sociolinguistics of Identity Tope Omoniyi, Goodith White, 2006-11-02 Across the social and behavioural sciences there has been an increased interest in identity as a subject of inquiry Despite this there remain questions to which researchers need to find answers and challenges to be made to older paradigms of analysis in order to continue to push the frontiers of knowledge in this research domain Identity is a problematic concept inasmuch as we recognise it now as non fixed non rigid and always being co constructed by individuals of themselves or by people who share certain core values or perceive another group as having such values This volume re examines the analytical tools employed in the sociolinguistic research of identity in order to assess their efficiency establish the roles of language in the identity claims of specific communities of people and determine the place of identity in a variety of social contexts including work places and language classrooms It will be of interest to academics and students working in sociolinguistics applied linguistics and second language learning

Narrative Research Molly Andrews, Mark Davis, Cigdem Esin, Barbara Harrison, Lars-Christer Hydén, Margareta Hydén, Aura Lounasmaa, Corinne Squire, 2025-01-23 First published Open Access under a Creative Commons license as What is Narrative Research this title is now also available as part of the Bloomsbury Research Methods series Narrative research has become a catchword in the social sciences today promising new fields of inquiry and creative solutions to persistent problems This book brings together ideas about narrative from a variety of contexts across the social sciences and synthesizes understandings of the field Rather than focusing on theory it examines how narrative research is conducted and applied It operates as a practical introductory guide basic enough for first time researchers but also as a window onto the

more complex questions and difficulties that all researchers in this area face The authors guide readers through current debates about how to obtain and analyse narrative data about the nature of narrative the place of the researcher the limits of researcher interpretations and the significance of narrative work in applied and in broader political contexts This new edition includes updated references and a greater focus on digitality throughout It addresses social justice and decoloniality more explicitly centrally and consistently drawing on examples around Black Lives Matter MeToo climate change and Extinction Rebellion and Covid and pandemic narratives

Reflexivity Linda Finlay, Brendan Gough, 2008-04-15 Reflexivity is a popular tool used to analyse personal intersubjective and social processes which shape research projects It enables researchers particularly within the qualitative tradition to acknowledge their role and the situated nature of their research In the current climate which sees the popularity of qualitative methods coupled with increased public and professional scrutiny of research reflexivity provides a means of bolstering greater transparency and quality in research This book recognises the considerable value of reflexivity to researchers and provides a means to navigate this field The book is foremost a practical guide which examines reflexivity at different stages of the research process The editors and contributors offer candid approaches to the subject which supply readers with diverse strategies on how to do reflexivity in practice Features Provides an accessible practical guide to reflexive research processes methods and outcomes Encompasses both the health and social science fields Includes contributions from international researchers The book is aimed at postgraduate and final year students of health and social sciences Interested clinicians will also find useful insights in the text

Illness in Context, 2010-01-01 This book is a contribution to humanistic studies of illness Medical humanities are by nature cross disciplinary and in recent years studies in this field have been recognized as a platform for dialogue between the two cultures of the natural sciences and the humanities Illness in Context is a result of an encounter of several disciplines including medicine history and literature The main stress is on the literary perspectives of the interdisciplinary collaboration The reading practices highlighting the clinical phenomenological and archeological approaches to illness take as their point of departure the living text that is the literary experience mediated and created by the text Literature is seen not solely as a medium for the representation of experiences of illness but also as a historical praxis involved in the forging of our common understanding of illness In contrast to traditional literary analysis primarily oriented toward the interpretation of the literary work s meaning the project will emphasize description and understanding of how literature itself performs as a means of interpretation of reality The target group for this book comprises professionals in the various disciplines and students of health and culture The ambition is to contribute to teaching in humanistic illness research and function as a topical resource book that formulates controversial problems in the crucial meeting of medicine and the humanities

Handbook of Emergent Methods Sharlene Nagy Hesse-Biber, Patricia Leavy, 2013-10-15 Social researchers increasingly find themselves looking beyond conventional methods to address complex research questions This is the first book to comprehensively examine emergent qualitative and

quantitative theories and methods across the social and behavioral sciences Providing scholars and students with a way to retool their research choices the volume presents cutting edge approaches to data collection analysis and representation Leading researchers describe alternative uses of traditional quantitative and qualitative tools innovative hybrid or mixed methods and new techniques facilitated by technological advances Consistently formatted chapters explore the strengths and limitations of each method for studying different types of research questions and offer practical in depth examples
