Inhaltsangabe Abstract In an economy where the only certainty is uncertainty the sure source of lasting competitive advantage is knowledge Peter Drucker 1953 Companies like Microsoft Netscape Coca Cola and Yahoo can be found under the top U S companies with the highest market values in 1999 The market value represents the measure of value that the investors and markets associate with the company However these companies are not valued for their tangible assets buildings inventory etc they are valued for something which cannot be shown on a balance sheet their intangibles These include brand recognition Patents customer loyalty innovative business ideas past achievements etc These companies are valued for the knowledge they possess However knowledge is of little value if it cannot be found when needed Therefore a successful knowledge management concept is of crucial importance for these companies The knowledge management market is growing rapidly and it will continue to advance over the next years Knowledge management is still a relatively young field with new concepts emerging constantly Most knowledge management initiatives have focused entirely on changes in tools and technologies such as intranets and Lotus Notes But knowledge management is more complex it covers everything the company does to make knowledge available to everyone The twenty first century gives companies the tools and connectivity to easily obtain share and act on information quickly Knowledge management uses these possibilities and recent studies

showed that companies gained a competitive advantage by implementing it According to Accenture research a well implemented knowledge management process can improve employee productivity by an average of 60% Often knowledge management is seen as storing documents in a database thus hoping to enhance knowledge sharing through the implementation of technology But to successfully apply knowledge management companies need to implement a process of motivating and inciting people to share information The old saying Knowledge is power is still popular The people who are hoarding their knowledge believe that it makes them irreplaceable However real power does not come from knowledge kept but from knowledge shared People are expected to cooperate to be open to participate within the new economy but resistance can be expected Obviously knowledge management is a combination of

Managing Knowledge in Project Environments Judy Payne, Eileen Roden, Steve Simister, 2019-05-10 Managing Knowledge in Project Environments illustrates how knowledge management KM contributes to successful project work KM is widely practised in project environments but managers don't always recognise the knowledge aspects of their work and tend to treat KM as a series of specific activities rather than a way of making project work produce better outcomes in different contexts To overcome this challenge the authors present KM as an integral part of project work and explain it using principles KM fundamentals that apply anywhere A series of context factors provides readers with a framework for understanding and thinking about what KM means for their context their goals their projects their organisations and their working environments Hidden KM is exposed myths are debunked and practical guidance explains how to build KM into projects and portfolios The approach is consistent with current guidance including the BS ISO management systems standard for KM and the seventh edition of APM's Body of knowledge The aim is to help project professionals sponsors PMO members and others who can make a difference manage knowledge more effectively in project environments Managing Knowledge in Project Environments offers everyone involved in project work a definitive short guide to the subject
