Organized Labour In The 21st Century:

Organized Labour in the 21st Century A. V. Jose, 2002 This volume contains selected case studies which explore the theme of trade union responses to globalisation in order to illustrate experiences drawn from three broad groups of countries industrialised middle income and developing economies Country case studies include Japan Sweden the United States Chile Israel Korea India and South Africa These studies seek to promote wider understanding of the role and changing priorities of organised labour in a range of countries at varying stages of development They highlight the fact that the major challenge for unions in all countries notably developing countries is the representation of non traditional sectors and the provision of new services

Network on Organized Labour in the 21st Century, 1999 The ILO's On-line Conference on Organized Labour in the 21st Century Jill Murray, 2000 *Globalization and Labour in the Twenty-First Century* Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work

Emotional Labor in the 21st Century Alicia Grandey, James Diefendorff, Deborah E. Rupp, 2013-05-07 This book reviews integrates and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years The concept of emotional labor was first proposed by Dr Arlie Russell Hochschild 1983 who defined it as the management of feeling to create a publicly observable facial and bodily display p 7 for a wage A basic assumption of emotional labor theory is that many jobs e.g. customer service healthcare team based work management have interpersonal and thus emotional requirements and that well being and effectiveness in these jobs is determined in part by a person's ability to meet these requirements Since Hochschild's initial work psychologists sociologists and management scholars have developed distinct theoretical approaches

aimed at expanding and elaborating upon Hochschild's core ideas. Broadly speaking, emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work, which has implications for performance and well-being in a wide range of occupations and organizational contexts. This book offers researchers and practitioners a review of emotional labor theory and research that integrates the various perspectives into a coherent framework and proposes an agenda for future research on this increasingly relevant and important topic. The book is divided into 5 main sections with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow. The second section consists of chapters describing emotional labor theory at different levels of analysis, including the event, person, dyad, and group. The third section illustrates the diversity of emotional labor in distinct occupational contexts, such as customer service (e.g., restaurant, retail, call centers) and caring work. The fourth section considers broader contextual influences, organizational, societal, and cultural level factors that modify how and when emotional labor is done. The final section presents a series of reflective essays from eminent scholars in the area of emotion and emotion regulation where they reflect upon the past, present, and future of emotion regulation at work.

Employment Relations in the Asia-Pacific Region Peter Holland, Julian Teicher, Richard Gough, 2013-09-13. This book focuses on new developments in employment in Asia. The context for this discussion is provided by the processes of globalisation and the associated debate on labour standards. Individual chapters focus on issues such as the role of NGOs as surrogate unions, employment regulation in export processing zones, social protection, and the impact of political reform on the employment relationship. This volume was previously published as a special issue of the journal *Asia Pacific Business Review*.

Workers' Movements and Strikes in the Twenty-First Century Jörg Nowak, Madhumita Dutta, Peter Birke, 2018-04-05. While workers' movements have been largely phased out and considered out-dated in most parts of the world during the 1990s, the 21st century has seen a surge in new and unprecedented forms of strikes and workers' organisations. The collection of essays in this book, spanning countries across global South and North, provides an account of strikes and working class resistance in the 21st century. Through original case studies, the book looks at the various shades of workers' movements, analysing different forms of popular organisation as responses to new social and economic conditions, such as restructuring of work and new areas of investment.

Left-of-Centre Parties and Trade Unions in the Twenty-First Century Elin Haugsgjerd Allern, Tim Bale, 2017-02-15. Both parties and interest groups matter to democracy. Historically, examples of close relationships between the two abound. But perhaps the best known, because it was supposedly the most intimate and politically important, is the relationship between left-of-centre parties and trade unions. Whether rooted in a shared history, culture, and ideology, or more a marriage of convenience, it is widely believed that their relationship helped socialist, social democratic, and labour parties win power and ensured the working class achieved huge gains in terms of full employment, the welfare state, and labour market regulation in the post-war period. In recent decades, however, it has been widely argued that the links between left-of-centre

parties and trade unions have declined as their collaboration has become less mutually beneficial not least as a consequence of structural changes in the economy and labour market This volume interrogates qualifies and even challenges that widespread assumption Based on a brand new dataset including organizational data gathered by a cross national team of experts it uncovers and explores what turns out to be considerable variation in the strength of contemporary organizational links between left of centre parties and unions in twelve different countries that have been democracies since at least the mid to late 1940 s Testing a series of hypotheses on the importance and the impact of particular political systems and socio economic factors and on the costs and benefits for both parties and unions detailed qualitative and quantitative analysis suggests that left of centre party trade union links are stronger where trade unions are larger denser and more unified and where parties are less able to rely on the state to finance their organizational activities and electoral campaigns Traditional partners that still have fairly strong links with each other seem to have greater incentives than others to maintain those links Moreover it remains the case that the links between parties and unions matter in policy terms *The Future of Organised Labour* Craig Phelan, 2007 This book offers analysis of the causes and extent of the movement s current malaise from a variety of vantage points It provides eight national and regional studies China Britain France the US Eastern Europe Brazil Ghana and Cameroon that detail problems face and the revitalisation strategies trade unions have pursued in response It also offers fresh scholarly perspective on a host of pressing labour issues the extent and impact of global corporate restructuring the ongoing fight to achieve core labour standards the enduring importance of gender and diversity the fortunes of the international labour movement the relationship between trade unions and NGOs the intellectual response to organised labour s present predicament and the role of labour in the global social justice movement **BACK COVER** **Women and Labour Organizing in Asia** Kaye Broadbent, Michele Ford, 2007-12-21 Providing a full account of the role of women in union activism in Asia covering all the major economies of the region this book successfully challenges the prevailing conception of women workers in Asia as passive and uninterested in industrial issues **Employment Relations in the 21st Century** Valeria Pulignano, Frank Hendrickx, 2019-11-07 It cannot be denied that in recent decades for many if not most people work has become unstable and insecure with serious risk and few benefits for workers As this reality spills over into political and social life it is crucial to interrogate the transformations affecting employment relations shape research agendas and influence the policies of national and international institutions This single volume brings together thirty nine scholars both academics and experienced industrial relations actors in the fields of employment relations and labour law in a forthright discussion of new approaches theories and methods aimed at ameliorating the world of work Focusing on why and how work is changing how collective actors deal with it and the future of work from different disciplinary angles and at an international level the contributors describe and analyse such issues and topics as the following new forms of social protection and representation differences in the power relations of workers and political dynamics balancing protection of workers dignity

and promotion of productivity intersection of information technology and workplace regulation how the gig economy undermines legal protections role of professional and trade associations workplace conflict management lay judges in labour courts undeclared work in the informal sector of the labour market work incapacity and disability in coherence of the work related case law of the European Court of Justice and business restructurings Derived from a major conference held in Leuven in September 2018 the book offers an in depth understanding of the changing world of work its main transformations and the challenges posed to classical employment relations theories and methods as well as to labour law With its wide range of insights analysis and reflection this unique contribution to the study of industrial relations offers an authoritative reference guide to scholars policymakers trade unions and business associations human resources professionals and practitioners who need to deal with the future of work challenges *Michał Kalecki in the 21st Century* J. Toporowski, L.
