Making British Indian Fictions A. Malhotra, 2012-06-18 This book examines fictional representations of India in novels plays and poetry produced between the years 1772 to 1823 as historical source material It uses literary texts as case studies to investigate how Britons residing both in the metropole and in India justified confronted and imagined the colonial encounter during this period

The Strangled Traveler Martine van Woerkens, 2002-11 British colonists in 1830s India lived in terror of the Thugs Reputed to be brutal criminals the Thugs supposedly strangled beheaded and robbed thousands of travelers in the goddess Kali's name The British responded with equally brutal repression of the Thugs and developed a compulsive fascination with tales of their monstrous deeds Did the Thugs really exist or did the British invent them as an excuse to seize tighter control of India Drawing on historical and anthropological accounts Indian tales and sacred texts and detailed analyses of the secret Thug language Martine van Woerkens reveals for the first time the real story of the Thugs Many different groups of Thugs actually did exist over the centuries but the monsters the British made of them had much more to do with colonial imaginings of India than with the real Thugs Tracing these imaginings down to the present van Woerkens reveals the ongoing roles of the Thugs in fiction and film from Frankenstein to Indiana Jones and the Temple of Doom

The Anglo-Maratha Campaigns and the Contest for India Randolph G. S. Cooper, 2003 This is a cross cultural study of the political economy of war in South Asia Randolph G S Cooper combines an overview of Maratha military culture with a battle by battle analysis of the 1803 Anglo Maratha Campaigns Building on that foundation he challenges ethnocentric assumptions about British superiority in discipline drill and technology He argues that these campaigns in which Arthur Wellesley served with distinction represent the military high water mark of the Marathas who posed the last serious opposition to the formation of the British Raj Dr Cooper asserts that the real contest for India was never a single decisive battle for the subcontinent Rather it turned on a complex social and political struggle for control of the South Asian military economy The author shows that victory in 1803 hinged as much on finance diplomacy politics and intelligence as it did on battlefield manoeuvre and war itself

Approaches to History Sabyasachi Bhattacharya, 2011 History as a social science is arguably more self reflective than associated disciplines in that family Other social scientists seem to see little reason to look beyond the paradigm they are developing in the present times Historians on the other hand tend to depend on the cumulative process of the development of their craft and the fund of accumulated knowledge Yet while this is acknowledged in the practice of research Historiography in itself as a subject of study has rarely found its place in the syllabi of Indian universities Knowledge of Historiography is taken for granted when a scholar plunges into research In an attempt to address this lacuna the Indian Council of Historical Research ICHR has planned a series of volumes on Historiography comprising articles by subject specialists commissioned by the ICHR The first volume in the series

Approaches to History Essays in Indian Historiography brings to the readers the first fruits of that endeavour While the essays encompass areas of research presently at the frontiers of new research scholars will also find the bibliographies accompanying the essays of significant appeal

Thuggee K. Wagner,2007-07-12 Based largely on new material this book examines thuggee as a type of banditry emerging in a specific socio economic and geographic context The British usually described the thugs as fanatic assassins and Kali worshippers yet Wagner argues that the history of thuggee need no longer be limited to the study of its representation

Empire and Gunpowder Moumita Chowdhury,2022-07-19 This book focuses on the relation between technology warfare and state in South Asia in the eighteenth and the nineteenth centuries It explores how gunpowder and artillery played a pivotal role in the military ascendancy of the East India Company in India The monograph argues that the contemporary Indian military landscape was extremely dynamic with contemporary indigenous polities Mysore the Maratha Confederacy and the Khalsa Kingdom attempting to transform their military systems by modelling their armies on European lines It shows how the Company established an edge through an efficient bureaucracy and a standardised manufacturing system while the Indian powers primarily focused on continuous innovation and failed to introduce standardisation of production Drawing on archival records from India and the UK this volume makes a significant intervention in our understanding of the rise of the British Empire in South Asia It will be of great interest to scholars and researchers of history especially military history military and strategic studies and South Asian studies
